Syntactic Categories Gisa Rauh, 2010-06-03 This book offers a systematic account of syntactic categories the building blocks of sentences and the units of grammatical analysis and explains their place in different theories of language It sets out and clarifies the conflicting definitions of competing frameworks which frequently make it hard or impossible to compare grammars Gisa Rauh describes the history and nature of traditional and contemporary accounts and definitions of grammatical categories She explains their properties and use in generative cognitive and functional theories and considers their function in language typology She distinguishes between the cognitive functions of categories that relate to traditional parts of speech and serve to structure a language s lexicon and those which determine the syntactic behaviour of the linguistic items they specify Professor Rauh illustrates her account with a wide range of examples Her clear and balanced exposition will be welcomed by students and scholars in all branches of linguistics as well as by those in related subjects such as computational science and the philosophy of language

Key Terms in Syntax and Syntactic Theory Silvia Luraghi, Claudia Parodi, 2008-08-31 Key Terms in Syntax and Syntactic Theory explains all of the relevant terms which students of linguistics and English language are likely to encounter during their undergraduate study The book includes definitions of key terms within syntax and syntactic theory as well as outlines of the work of key thinkers in the field including Noam Chomsky M A K Halliday Lucien Tesni re and Robert van Valin The list of key readings is intended to direct students towards classic articles as well providing a springboard to further study Accessibly written with complicated terms and concepts explained in an easy to understand way Key Terms in Syntax and Syntactic Theory is an essential resource for students of linguistics

Argument Structure and Syntactic Relations Maia Duguine, Susana Huidobro, Nerea Madariaga, 2010-07-14 The topic of this collection is argument structure The fourteen chapters in this book are divided into four parts Semantic and Syntactic Properties of Event Structure A Cartographic View on Argument Structure Syntactic Heads Involved in Argument Structure and Argument Structure in Language Acquisition Rigorous theoretical analyses are combined with empirical work on specific aspects of argument structure The book brings together authors working in different linguistic fields semantics syntax and language acquisition who explore new findings as well as more established data but then from new theoretical perspectives The contributions propose cartographic views of

argument structure as opposed to minimalistic proposals of a binary template model for argument structure in order to optimally account for various syntactic and semantic facts as well as data derived from wider cross linguistic perspectives

Syntax - Theory and Analysis. Volume 1 Tibor Kiss, Artemis Alexiadou, 2015-02-17 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discuss do not only serve to show syntactic analyses but also to compare theoretical approaches with each other Instruments and Related Concepts at the Syntax-Semantics Interface Koen Van

Hooste, 2018-04-30 This series Dissertations in Language and Cognition explores issues of mental representation linguistic structure and representation and their interplay The research presented in this series is grounded in the idea explored in the Collaborative Research Center The structure of representations in language cognition and science SFB 991 that there is a universal format for the representation of linguistic and cognitive concepts **Parts of Speech** Umberto Ansaldi, Jan

Don, Roland Pfau, 2010-09-15 Parts of Speech are a central aspect of linguistic theory and analysis Though a long established tradition in Western linguistics and philosophy has assumed the validity of Parts of Speech in the study of language there are still many questions left unanswered For example should Parts of Speech be treated as descriptive tools or are they to be considered universal constructs Is it possible to come up with cross linguistically valid formal categories or are categories of language structure ultimately language specific Should they be defined semantically syntactically or otherwise Do non Indo European languages reveal novel aspects of categorical assignment This volume attempts to answer these and other fundamental questions for linguistic theory and its methodology by offering a range of contributions that spans diverse theoretical persuasions and contributes to our understanding of Parts of Speech with analyses of new data sets These articles were originally published in Studies in Language 32 3 2008 Grammar from the Human Perspective Marja-Liisa

Helasvuo, Lyle Campbell, 2006-10-19 The papers of this volume investigate how grammar codes the subjective viewpoint of human language users that is how grammar reflects human conceptualization Some of the articles deal with spatial relations

and locations They discuss how basic attributes of human conceptualization are encoded in the grammatical expression of spatial relations Other articles concern embodiment in language showing how conceptualization is mediated by one's embodied experience of the world and ourselves Finally some of the articles discuss coding of person focusing on the subjectivity of conceptualization and how it is reflected in grammar The articles show that conceptualization reflects the speaker's construal of the situation and furthermore that it is intersubjective because it reflects the speaker's understanding of the relations between the speech act participants The papers deal with Finnish utilizing the rich resources of Finnish grammar to contribute to issues in contemporary linguistics and in particular to Cognitive Grammar

Syntactic and Semantic Variation in Copular Sentences Daniel J. Wilson, 2020-07-16 This book presents a novel account of syntactic and semantic variation in copular and existential sentences in Classical Hebrew Like many languages the system of Classical Hebrew copular sentences is quite complex containing zero pronominal and verbal forms as well as eventive and inchoative semantics Approaching this subject from the framework of Distributed Morphology provides an elegant and comprehensive explanation for both the syntactic and semantic variation in these sentences This book also presents a theoretical model for analyzing copular sentences in other languages included related phenomena such as pseudo copulas It is also a demonstration of what can be gained by applying modern linguistic analyses to dead languages Citing and building off previous studies on this topic this book will be of interest to those interested in the theoretical examination of copular and existential sentences and to those interested in Classical Hebrew more specifically

Mouton Classics, 2013-08-26 Mouton proudly presents this collection of articles considered to be representative of author achievements over the past quarter century of its publishing history A selection of course can do little more than make the readers wish for more it is hoped that these volumes will do just that The book contains essays on Phonology Morphology Formal Syntax Functional Linguistics Historical Linguistics Language and Cognition Language Acquisition Discourse and Text Sociology of Language Semiotics

Historical Linguistics, 1993 Henning Andersen, 1995-01-01 This volume contains a selection of 34 of the 96 papers presented at ICHL 1993 including several of the contributions to the workshop on Parameters and Typology organized jointly by Henning Andersen and David W Lightfoot Major topics represented are grammaticalization and functional renewal illustrated with changes in romance French Pennsylvania German Afrikaans English Finnish changes in syntax Indo European Indo Aryan Ancient Greek Romanian Spanish Portuguese French Japanese Dutch English and discourse structure Old Russian Old French morphology German Turkic phonology Romance Italian French German Old English English Several papers include sociolinguistic areal and typological perspectives on change a few are specifically concerned with reconstruction or with the principles of reconstruction and several demonstrate the continued importance of the philological methods in the study of texts

Contrastive Studies in Construction Grammar Hans C. Boas, 2010-11-11 The papers in this volume provide a contrastive application of Construction Grammar By referencing a well described constructional phenomenon in English each

paper provides a solid foundation for describing and analyzing its constructional counterpart in another language This approach shows that the semantic description including discourse pragmatic and functional factors of an English construction can be regarded as a first step towards a tertium comparationis that can be employed for comparing and contrasting the formal properties of constructional counterparts in other languages Thus the meaning pole of constructions should be regarded as the primary basis for comparisons of constructions across languages the form pole is only secondary This volume shows that constructions are viable descriptive and analytical tools for cross linguistic comparisons that make it possible to capture both language specific idiosyncratic properties as well as cross linguistic generalizations 200 Years of Syntax Giorgio Graffi, 2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools

Construction Grammar across Borders Tiago Timponi Torrent, Ely Edison da Silva Matos, Natália Sathler Sigiliano, 2022-07-15 Since its foundation in the 1980 s Construction Grammar has been crossing the traditionally imposed borders From superimposed levels of analysis to the lexicon grammar continuum the constructionist approach to language has been built by quoting Charles Fillmore the insistence on seeing specific grammatical patterns as serving given semantic and often pragmatic purposes and in the effort to construct a uniform theory capable of presenting both the simplest and most general aspects of language and the large world of complex grammatical structures In this volume five chapters derived from the plenary talks at the 9th International Conference on Construction Grammar provide a sample of the bridges the insistence and effort of construction grammarians have built in the past three decades with other analytical models namely Cognitive Grammar and Constructional Analysis perspectives Diachronic Construction Grammar and applications Language Pedagogy and Natural Language Understanding Originally published as special issue of *Constructions and Frames* 12 1 2020

syntactic phenomena Handbook of Japanese Syntax Masayoshi Shibatani, Shigeru Miyagawa, Hisashi Noda, 2017-10-23

Studies of Japanese syntax have played a central role in the long history of Japanese linguistics spanning more than 250 years in Japan and abroad. More recently Japanese has been among the languages most intensely studied within modern linguistic theories such as Generative Grammar and Cognitive Functional Linguistics over the past fifty years. This volume presents a comprehensive survey of Japanese syntax from these three research strands namely studies based on the traditional research methods developed in Japan, those from broader functional perspectives and those couched in the generative linguistics framework. The twenty-four studies contained in this volume are characterized by a detailed analysis of a grammatical phenomenon with broader implications to general linguistics, making the volume attractive to both specialists of Japanese and those interested in learning about the impact of Japanese syntax to the general study of language. Each chapter is authored by a leading authority on the topic. Broad issues covered include sentence types (declarative, imperative, etc.) and their interactions with grammatical verbal categories (modality, polarity, politeness, etc.), grammatical relations (topic, subject, etc.), transitivity, nominalizations, grammaticalization, word order, subject scrambling, numeral quantifier, configurationality, case marking, *ga* vs. *no* conversion, morphology and syntax modification (adjectives, relative clause and structure and interpretation, modality, negation, prosody, ellipsis). Chapter titles: Introduction; Chapter 1: Basic structures of sentences and grammatical categories (Yoshio Nitta, Kansai University of Foreign Studies); Chapter 2: Transitivity (Wesley Jacobsen, Harvard University); Chapter 3: Topic and subject (Takashi Masuoka, Kobe City University of Foreign Studies); Chapter 4: Focusing and defocusing of words, phrases and clauses (Hisashi Noda, National Institute for Japanese Language and Linguistics); Chapter 5: The layered structure of the sentence (Isao Iori, Hitotsubashi University); Chapter 6: Functional syntax (Ken Ichi Takami, Gakushuin University and Susumu Kuno, Harvard University); Chapter 7: Locative alternation (Seizi Iwata, Osaka City University); Chapter 8: Nominalizations (Masayoshi Shibatani, Rice University); Chapter 9: The morphosyntax of grammaticalization (Heiko Narrog, Tohoku University); Chapter 10: Modality (Nobuko Hasegawa, Kanda University of International Studies); Chapter 11: The passive voice (Tomoko Ishizuka, Tama University); Chapter 12: Case marking (Hideki Kishimoto, Kobe University); Chapter 13: Interfacing syntax with sounds and meanings (Yoshihisa Kitagawa, Indiana University); Chapter 14: Subject (Masatoshi Koizumi, Tohoku University); Chapter 15: Numeral quantifiers (Shigeru Miyagawa, MIT); Chapter 16: Relative clauses (Yoichi Miyamoto, Osaka University); Chapter 17: Expressions that contain negation (Nobuaki Nishioka, Kyushu University); Chapter 18: *Ga* vs. *No* conversion (Masao Ochi, Osaka University); Chapter 19: Ellipsis (Mamoru Saito, Nanzan University); Chapter 20: Syntax and argument structure (Natsuko Tsujimura, Indiana University); Chapter 21: Attributive modification (Akira Watanabe, University of Tokyo); Chapter 22: Scrambling (Noriko Yoshimura, Shizuoka Prefectural University).

Articles in the World's Languages Laura Becker, 2021-09-20. This study provides a systematic overview of articles and article systems in the world's languages using a sample of 104 languages. Articles can be classified into 10 types according to

their referential functions definite anaphoric weak definite recognitional indefinite presentational exclusive specific nonspecific inclusive specific and referential articles All 10 types are described in detail with examples from various languages of the world The book also addresses crosslinguistic trends concerning the distribution and the development of different article types and it proposes a typology of article systems The aim of this study is to provide a general crosslinguistic overview concerning the attested properties and distributions of articles It is geared towards readers with interests in language typology and the nominal domain and it can serve as a point of reference for language specific studies of articles or determiners *The Construal of Space in Language and Thought* Martin Pütz, René Dirven, 1996 No detailed description available for The Construal of Space in Language and Thought
