Syntactic Development William O'Grady, 2007-12-01 Syntactic Development presents a broad critical survey of the research literature on child language development Giving balanced coverage to both theoretical and empirical issues William O'Grady constructs an up to date picture of how children acquire the syntax of English Part 1 offers an overview of the developmental data pertaining to a range of syntactic phenomena including word order subject drop embedded clauses wh questions inversion relative clauses passives and anaphora Part 2 considers the various theories that have been advanced to explain the facts of development as well as the learnability problem reporting on work in the mainstream formalist framework but also considering the results of alternative approaches Covering a wide range of perspectives in the modern study of syntactic development this book is an invaluable reference for specialists in the field of language acquisition and provides an excellent introduction to the acquisition of syntax for students and researchers in psychology linguistics and cognitive science

Syntactic Development, Its Input and Output Anat Ninio, 2011-03-03 This important new book places the syntactic learning process under close scrutiny Its focus is on the characteristics of linguistic input and the resultant output which it suggests do not follow the orderly uniform processes assumed by some versions of formalistic linguistic theory

Early Syntactic Development Melissa Bowerman, 1973-06-21 First published in 1973 this important work was the first systematic attempt to apply theoretical and methodological tools developed in America to the acquisition of a language other than English Dr Bowerman presents and analyses data from a longitudinal investigation of the early syntactic development of two Finnish children and compares their speech at two stages of development with that of American Samoan and Luo children The four language families Finno Ugric Indo European Malayo Polynesian and Nilotic respectively with very different structures and this is the first systematic comparison of the acquisition of several types of native language within a common analysis Similarities in the linguistic behaviour of children learning these four different languages are used to evaluate hypotheses about universals of language and to generate new proposals

Language Development: Syntax and semantics Stan A. Kuczaj, 1982 First published in 1981 Routledge is an imprint of Taylor Francis an informa company

Language and the Learning Curve Anat Ninio, 2006 Drawing on formal linguistic theory cognitive psychology and computational linguistics and complexity theory this volume takes the view that syntactic development is a simple process one that can be learned just like any other cognitive or motor skill

The Development of Language Martyn Barrett, 2016-01-28 This book presents a general overview of our current knowledge of language development in children All the principal strands of language development are covered including phonological lexical syntactic and pragmatic development bilingualism precursors to language development in infancy and the language development of children with developmental disabilities including children with specific language impairment Written by leading international authorities each chapter summarises clearly and lucidly our current state of knowledge and carefully explains and evaluates the theories

which have been proposed to account for children's development in that area

Mandarin Development of Indonesian Immigrants' Children Jenny Yi-chun Kuo, 2016-05-14 This book summarizes the results of a three year longitudinal project on Mandarin development among children of Indonesian mothers, the second largest non-Mandarin speaking immigrant group in Taiwan. These children were acquiring their first language while interacting primarily with a non-native learner of the language. The book discusses phonological, lexical, and syntactic development to provide a better understanding of the language development of the children of immigrants and has important implications for language education policy and language acquisition theories.

Language Development and Social Interaction in Blind Children Miguel Pérez Pereira, Gina Conti-Ramsden, 1999 This book provides an up-to-date account of blind children's developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age. It purports to foster dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and to provide insights and new explanations of why the development of blind children may differ from that of sighted children. The book also aims to identify and examine current theoretical issues which are likely to be at the centre of developments in the fields of child language and developmental psychology. Language Development and Social Interaction in Blind Children is also a timely book. The study of blind children's development constitutes a unique opportunity to study the effect of vision on development and more specifically on the development of language and certain aspects of social cognition. Current interest in the development of theory of mind and perspective taking in language learning make the case of blind children crucial to our understanding of certain aspects of psychological functioning. The book explores these issues, challenges some widely held beliefs about the development of communication in blind children, and provides a cohesive picture of our knowledge to date.

A Dynamic Systems Theory Perspective on L2 Writing Development Shaopeng Li, 2022-03-23 From the perspective of empirical complex dynamic systems, this book investigates the complex and nonlinear process of L2 writing, centering on three linguistic aspects of L2 writing development: vocabulary, syntax, and discourse. Combining dynamic systems theory, variation analysis, as well as data and case studies from Chinese EFL learners writing, the book critically engages with the heated discussion on dynamic patterns of L2 writing development that focus heavily on the linguistic dimensions of complexity, accuracy, and fluency. The author expands the scope of the research by integrating both linguistic and functional dimensions of L2 output and examines the interaction and co-development of these dimensions. This framework helps delineate a full picture of individual learners' L2 writing dynamic patterns across all components of their communicative repertoire. The research findings suggest the developmental path of writing system for each EFL learner may differ, which is influenced by their different learning characteristics and learning environments in China. The title will appeal to scholars interested in applied linguistics and second language acquisition. Suggestions on pedagogy and language learning advanced in the book will also make it a useful read for L2 language learners and TESOL and TEFL teachers.
