Taking To Water:

Taking on Water Wendy J. Pabich, 2012-01-01 When Wendy Pabich received a monthly water bill for 30 000 gallons for a household of two people and one dog she was chagrined After all she is an expert on sustainable water use So she set out to make a change Taking on Water is the story of the author's personal quest to extract and implement from a dizzying soup of data and analysis day to day solutions to reduce water use in her life She sets out to examine the water footprint of the products she consumes process her own wastewater onsite revamp the water and energy systems in her home and make appropriate choices in order to swim the swim Part memoir part investigation part solution manual the book is filled with ruminations on philosophy science facts figures and personal behavioral insights metrics both serious and humorous to track progress and guidelines for the general public for making small or perhaps monumental but important changes in their own lives Told with humor and grace Taking on Water offers a raw account of how deep we need to dig to change our wasteful ways

Taking Our Water for the City April M. Beisaw, 2022-12-09 Tap water enables the development of cities in locations with insufficient natural resources to support such populations For the last 200 years New York City has obtained water through a network of nineteen reservoirs and controlled lakes some as far as 125 miles away Engineering this water system required the demolition of rural communities removal of cemeteries and rerouting of roadways and waterways The ruination is ongoing This archaeological examination of the New York City watershed reveals the cultural costs of urban water systems Urban water systems do more than reroute water from one place to another At best they redefine communities At worst they erase them

Taking Water to the Thirsty Al Hagy Sr, Rev. Matthew Ricks, 2016-01-26 From the beginning our instincts and reflexes are tuned to survival Over a lifetime we learn and hone those skills but there comes a point when we of necessity surrender to the search of the ultimate goal spiritual peace This search is best done with family support and friends as they bring the message of grace and the mercy of God But all too often loneliness blocks this message and spiritual emptiness and suffering remain as companions Mother Teresa wrote Loneliness and the feeling of being unwanted is the most terrible poverty The authors of this short book believe this to be true We wish to relieve this distress and need your help Loneliness does occur in many places even the crowded streets of the cities of the world In this book we are focused on spiritual poverty in long term care facilities where we believe the problem exists in significant numbers despite the best efforts of those charged with recreation and socialization In addition we believe loneliness travels with a paucity of spiritual attention which must mean unrest The combination of being alone and spiritually weak or disconnected when peace is the goal for those in their last days is the challenge Part of the problem is our lack of awareness of these people and their situation which brings us to our mission to prod beg and stimulate people of faith to become involved in passing their faith and peace to those in need
