Taking Teaching Seriously Meeting The Challenge Of Instructional Improvement:

Taking Teaching Seriously: Meeting the Challenge of Instructional Improvement Michael B. Paulsen, Kenneth A. Feldman, 1995-03-14 This report reviews the research and literature on the improvement of college teaching through use of a model that stresses a supportive teaching culture and helps motivate individual faculty members to improve their teaching by utilizing a variety of sources of informative feedback The sources include colleagues and consultants department chairs students and self evaluation The report provides 1 an examination of the nature of instructional improvement and the challenge of motivating faculty to improve their teaching through identifying making and maintaining necessary changes 2 an exploration of important factors in the creation of a supportive campus teaching culture 3 explanations and illustrations of five sources of feedback for improving instruction teachers themselves students colleagues consultants and department chairs and 4 an analysis of the special needs of new and junior faculty for instructional improvement The following characteristics of a culture supportive of teaching improvement are identified administrator support shared values about the importance of teaching and involvement of faculty in instructional improvement programs an expanded view of scholarship a requirement that effective teaching be demonstrated as part of the hiring process faculty interaction and collaboration a faculty development program effective department chairs and connection of tenure promotion decisions to teaching evaluations Contains approximately 250 references DB Taboo ,2003 University Teaching James Forest, 2018-10-10 Originally published in 1998 *University Teaching* looks at the world of university and college teaching in the study of higher education Providing a broad perspective it examines preparation assessment and reward from cross cultural perspectives and explores the cultural and social influences that affect these dimensions The book provides a considerable richness in diversity of topics and authors and provokes the reader to observe the many commonalities in the thinking and approaches towards college teaching that pervade the higher education systems worldwide *Understanding the Working College Student* Laura W. Perna, 2023-07-14 How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional age students with minimal on campus or no work commitments Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students with a substantial number of traditional dependent undergraduates in employment and working independent undergraduates averaging 34 5 hours per week little attention has been given to how working influences the integration and engagement experiences of students who work especially those who work full time or how the benefits and costs of working differ between traditional age students and adult students The high and increasing prevalence and intensity of working among both dependent and independent students raises a number of important questions for public policymakers college administrators faculty academic advisors student services and financial aid staff and institutional and educational researchers including Why do so many college students work so many hours What are the characteristics of undergraduates who work What are the implications of working

for students educational experiences and outcomes And how can public and institutional policymakers promote the educational success of undergraduate students who work This book offers the most complete and comprehensive conceptualization of the working college student available It provides a multi faceted picture of the characteristics experiences and challenges of working college students and a more complete understanding of the heterogeneity underlying the label undergraduates who work and the implications of working for undergraduate students educational experiences and outcomes The volume stresses the importance of recognizing the value and contribution of adult learners to higher education and takes issue with the appropriateness of the term non traditional itself both because of the prevalence of this group and because it allows higher education institutions to avoid considering changes that will meet the needs of this population including changes in course offerings course scheduling financial aid and pedagogy

Reflection and the College Teacher Rachel Wlodarsky,Howard Walters,2013-12-01 Higher education is facing many challenges not least of which is retaining excellent faculty and cultivating their continued professional growth This book explicitly ties the literature to the practical concerns and recommendations related to applying the reflective process in a college setting In this way the theories and empirical findings of the most recent literatures are linked to practical recommendations The reflective tools described in this book provide an important resource for facultys reflective practice Unlike other books on the topic the model developed and presented in this book allows for the reflective process to validate faculty s previous actions or accomplishments and maintain these practices In other words the endpoint of reflective process supports self satisfaction Instead of a deficit model the focus is development In this comprehensive volume readers discover the seminal and the recent research in reflective practice drawn from a wide range of sources including the authors recent research findings on college teachers reflection Altogether Wlodarsky and Walters systematically address these critical questions a What is reflection b Of what practical use or benefit does reflection serve c How do college teachers model reflection in the workplace d What are the steps in the reflective process e How can the reflective process be harnessed for program improvement in the college setting and in individual faculty practices Wlodarsky and Walters understand and address the real needs of college teachers today They created not only a thorough academic book but also a compelling relevant read Specifically they designed the chapters to include scenarios developed from interview transcripts with college teachers These stories powerfully contextualize the types of problems and tensions which surround the professional work environment of a college campus and the roles of the college teacher *Higher Education: Handbook of Theory and Research* 13 J.C. Effective Grading Barbara E. Walvoord, Virginia Johnson Anderson, 2011-01-13 The second edition of *Effective Grading* the book that has become a classic in the field provides a proven hands on guide for evaluating student work and offers an in depth examination of the link between teaching and grading Authors Barbara E Walvoord and Virginia Johnson Anderson explain that grades are not isolated artifacts but part of a process that when integrated with course objectives provides rich

information about student learning as well as being a tool for learning itself The authors show how the grading process can be used for broader assessment objectives such as curriculum and institutional assessment This thoroughly revised and updated edition includes a wealth of new material including Expanded integration of the use of technology and online teaching A sample syllabus with goals outcomes and criteria for student work New developments in assessment for grant funded projects Additional information on grading group work portfolios and service learning experiences New strategies for aligning tests and assignments with learning goals Current thought on assessment in departments and general education using classroom work for program assessments and using assessment data systematically to close the loop Material on using the best of classroom assessment to foster institutional assessment New case examples from colleges and universities including community colleges When the first edition of Effective Grading came out it quickly became the go to book on evaluating student learning This second edition especially with its extension into evaluating the learning goals of departments and general education programs will make it even more valuable for everyone working to improve teaching and learning in higher education L Dee Fink author Creating Significant Learning Experiences Informed by encounters with hundreds of faculty in their workshops these two accomplished teachers assessors and faculty developers have created another essential text Current faculty as well as graduate students who aspire to teach in college will carry this edition in a briefcase for quick reference to scores of examples of classroom teaching and assessment techniques and ways to use students classroom work in demonstrating departmental and institutional effectiveness Trudy W Banta author Designing Effective Assessment

Calvin James L. Codling, 2010-06-09 This study examines the influence of John Calvin in ethics eschatology and education as well as those influences that affected him It examines his writings to determine if his vision made him an innovator The research searched for reforms in the areas of ethics curriculum understanding of the teaching office and universal education It also looked at philosophy economics and labor A belief in the after life and end times was an ethical motivation for Calvin and education was a means by which the people that he worked with and wrote to could understand how they should live and why they should live like that Thus there is an important connection among ethics eschatology and education All people were to work to their potential at their job because in doing their job they would honor God Teachers were especially important Those who taught would affect the quality of education Calvin worked to provide teacher training and support He believed that all occupations could be a special calling from God and education was a means to prepare the young person for his or her calling Schools existed in Geneva before Calvin arrived in 1536 however they did not function in the way that Calvin would have liked Calvin provided the elementary students with a needed text when he prepared a catechism The students had written material that they could read and study and a systematic presentation of the basic doctrines of the Christian faith Calvin also wanted more appropriate facilities in which the students could learn Although his organization of the schools improved the atmosphere for learning the building of the Academy was his dream

and became his major educational achievement in the city of Geneva Because 16th century students needed to be prepared for the new world there was a need for curriculum change The students were required to read many of the prominent Greek and Roman authors in the ancient languages but the student learned theology Hebrew poetry dialectic and rhetoric physics and mathematics as well Calvin wished to graduate a well rounded scholar who could take his or her place in society In this way the citizens of Geneva and all those of the Reformed belief would be better prepared for life on earth and the after life

Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and

others that scholars and practitioners of higher education study discuss and grapple with on a daily basis
