**Understanding Modernity** Richard Munch, 2010-11 First Published in 1988 this volume works towards a new understanding and exploration of the rise and development of modern society taking its lead from two classical theorists Emile Durkheim and Max Weber The key concept of this approach is the interpenetration of different spheres of action Richard Munch begins with an exploration of the points of convergence and divergence in the works of Durkheim and Weber He then builds from Durkheim

a new theory of social order as a complex set of ordering dynamizing identity producing and goal setting factors M nch also constructs a new theory of personality development based on Durkheim s view of the duality of human nature He concludes by assessing weber s contribution to our understanding of how modern social order emerged showing that the unique features of modern society emerged from the interpenetration of cultural political communal and economic spheres in action
