**Religion in Science Fiction** Steven Hrotic,2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

**Faith and Fatherland** Brian Porter-Szucs, 2011-06-03 Jesus instructed his followers to love your enemies do good to those who hate you bless those who curse you pray for those who mistreat you Luke 6:27-28 Not only has this theme long been among the Church's most oft repeated messages but in everything from sermons to articles in the Catholic press it has been consistently emphasized that the commandment extends to all humanity Yet on numerous occasions in the twentieth century Catholics have established alliances with nationalist groups promoting ethnic exclusivity anti-Semitism and the use of any means necessary in an imagined struggle for survival While some might describe this as mere hypocrisy Faith and Fatherland analyzes how Catholicism and nationalism have been blended together in Poland from Nazi occupation and Communist rule to the election of Pope John Paul II and beyond It is usually taken for granted that Poland is a Catholic nation but in fact the country's apparent homogeneity is a relatively recent development supported as much by ideology as demography To fully contextualize the fusion between faith and fatherland Brian Porter's concepts like sin the Church the nation and the Virgin Mary ultimately showing how these ideas were assembled to create a powerful but hotly contested form of religious nationalism By no means was this outcome inevitable and it certainly did not constitute the only way of being Catholic in modern Poland Nonetheless the Church's ongoing struggle to find a place within an increasingly secular European modernity made this ideological formation possible and gave many Poles a vocabulary for social criticism that helped make sense of grievances and injustices
