**Every American an Innovator** Matthew

Wisnioski, 2025-05-13 A landmark cultural history that reveals how the relentless pursuit of innovation has transformed our society our institutions and our inner selves For half a century innovation served as a universal good in an age of fracture That consensus is cracking While the imperative to innovate for a better future continues to fuel systemic change around the world critics now assail innovation culture as an engine of inequality or accuse its do gooders of woke groupthink What happened Drawing on a decade of research *Every American an Innovator* by Matthew Wisnioski investigates how innovation a once obscure academic term became ingrained in our institutions our education and our beliefs about ourselves Wisnioski argues that innovation culture did not spring from the digital revolution nor can it be boiled down to heroic entrepreneurs or villainous capitalists Instead he reveals the central role of a new class of experts in spreading toolkits and mindsets from the cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society's most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon's dream of a Nobel Prize for innovators how anti military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute

Thomas, Victoria C. Plaut, Ny Mia Tran, 2014-01-10 Since the increased attention toward diversity in the workplace the concepts of diversity initiatives and diversity management have become a common place in many conversations among academics and practitioners alike The diversity movement in the workplace originated from the increased avocation for equal

treatment of minority groups due to the dynamic composition of the modern workforce Many organizations were forced to face these changes and the dilemma of how to respond to group differences to maintain and or increase organization effectiveness and productivity This volume will present new research on the colorblindness versus multiculturalism debate assist in broadening the diversity ideology conversation share this conversation across social science domains including industrial organizational psychology social psychology and law and public policy and highlight how the nature of diversity ideology may be fluid and therefore be different depending on the diversity dimension discussed

*Innovation and Adaptation in War* Matthew A. Tattar, 2025-05-20 An analysis of advances in military technology that illustrates the importance of organizational flexibility in both an attacker's innovations and an opponent's adaptations How important is military innovation in determining outcomes during armed conflict In *Innovation and Adaptation in War* Matthew Tattar questions the conventional wisdom that to succeed military organizations must innovate early and often Because successful methods of warfare are soon widely imitated or countered on the international stage the advantages of a particular innovation quickly evaporate Therefore Tattar argues large scale innovations at the cost of organizational flexibility and the ability to adapt to an adversary's innovations may not be the optimal path not just because force readiness is vital but also because innovation does not provide as long lasting and decisive an advantage as may have been previously thought Although other scholars have analyzed the sources of military innovation Tattar is the first to focus on the relationship between innovation and specific military outcomes Looking at several different types of military organizations and many different types of battles he draws on theoretical works in depth historical research and case studies and finds that the initial advantages that are generated by innovation disappear far too rapidly in wartime for militaries to depend on them for victory Furthermore as Tattar demonstrates emphasizing innovation in defense planning at the expense of organizational flexibility can have significant negative consequences The decisive factor in successful adaptation more often than not is a well positioned and flexible organization Providing both a new framework for studying military innovation and a comprehensive review of the current literature in this field *Innovation and Adaptation in War* offers crucial policymaking insights into when and under what circumstances militaries should innovate and adapt

Power, Politics and Exclusion in Organization and Management Robert McMurray, Alison Pullen, 2019-05-24 There is a long tradition of research on politics power and exclusion in areas such as sociology social policy politics women s studies and philosophy While power has received considerable attention in mainstream management research and teaching it is rarely considered in terms of politics and exclusion particularly where the work of women writers is concerned This second book in the Routledge Series on Women Writers in Organization Studies analyses the ways in which women have theorised and embodied relations of power Women like Edith Garrud who trained in the Japanese art of jujutsu confronted the power of the state to champion feminist politics Others such as Beatrice Webb and Alva Myrdal are shown to have been at the heart of welfare reforms and social justice movements that responded to the worst excesses of industrialisation based on considerations of class and gender The writing of bell hooks provides a necessarily uncomfortable account of the ways in which imperialism white supremacy and patriarchy inflict unspoken harm while Hannah Arendt s work considers the ways in which different modes of organizing restrict the ability of people to live freely Taken together such writings dispel the myth that work or business can be separated from the rest of life a point driven home by Rosabeth Moss Kanter s observations on the ways in which power and inequality differentially structure life chances These writers challenge us to think again about power politics and exclusion in organizational contexts They provide provocative thinking which opens up new avenues for organization theory practice and social activism Each woman writer is introduced and analysed by experts in organization studies Further reading and accessible resources are also identified for those interested in knowing thinking more This book will be relevant to students researchers and practitioners with an interest in business and management organizational studies critical management studies gender studies and sociology Like all the books in this series it will also be interest to anyone who wants to see think and act differently
