The Art of Sympathy in Fiction Howard

Sklar, 2013 Focuses on the sympathetic effects of stories and the possible ways these feelings can contribute to what has been called the moral imagination This book examines the dynamics of readers beliefs regarding fictional characters and the influence of those impressions on the emotions that readers experience Wyndham Lewis the Radical Carmelo Cunchillos Jaime, 2007 This volume about the modernist writer and artist Wyndham Lewis 1882 1957 presents him as a radical figure in twentieth century modernism The authors rediscover aspects of Lewis s work which show how his fiction challenges modernist norms and how his acute and wide ranging critique of culture has a vital contemporary relevance Lewis s range is extraordinary it covers Nietzsche as well as classic cinema Renaissance art and English classicism Being politically conservative he had nonetheless a place on the political left and he can be seen as a postmodernist before his time These essays by leading Spanish and British specialists reveal Lewis as one of the key modernists of our time *Reading for Storyness* Susan Lohafer, 2020-03-03 The short story has been a staple of American literature since the nineteenth century taught in virtually every high school and consistently popular among adult readers But what makes a short story unique In *Reading for Storyness* Susan Lohafer former president of the Society for the Study of the Short Story argues that there is much more than length separating short stories from novels and other works of fiction With its close readings of stories by Kate Chopin Julio Cortázar Katherine Mansfield and others this book challenges assumptions about the short story and effectively redefines the genre in a fresh and original way In her analysis Lohafer combines traditional literary theory with a more unconventional mode of research monitoring the reactions of readers as they progress through a story to establish a new poetics of the genre Singling out the phenomenon of imminent closure as the genre s defining trait she then proceeds to identify preclosure points or places where a given story could end in order to access hidden layers of the reading experience She expertly harnesses this theory of preclosure to explore interactions between pedagogy and theory formalism and cultural studies fiction and nonfiction Returning to the roots of storyness Lohafer illuminates the intricacies of classic short stories and experimental forms of surreal postmodern and minimalist fiction She also discusses the impact of social constructions such as gender on the identification of preclosure points by individual readers *Reading for Storyness* combines cognitive science with literary theory to present a compelling argument for the uniqueness of the short story Reframing the Black Atlantic Aretha Phiri, 2024-08-09 Commemorating the thirtieth anniversary of Paul Gilroy s seminal text *The Black Atlantic* Modernity and Double Consciousness this book offers fresh interpretations of established black Atlantic scholarship from the perspective of those typically elided from its ideological purview and existential narrative The application of queer and or feminist lenses in each essay attempts to mediate these elisions and to advance potentially transformative democratising readings of the black Atlantic from both complex and complicating African and diasporic viewpoints With the aim of realigning black Atlantic scholarship in this way the edited volume proposes an interventionist approach that is concerned with problematizing ethnic cultural universalisms and challenging geographic and gendered hierarchizations Underlining the

importance of aesthetic and creative cultural archives Reframing the Black Atlantic's focus on transnational African diasporic literature and other intersecting popular cultural forms probes the imaginative limits and possibilities of the black Atlantic conventionally conceived To this end this book intends not just to complicate and enhance established views of black Africa inviting the reader to locate and perceive black life lived otherwise it points towards more inclusive and expansive global understandings and visions of blackness This volume will be of particular use to researchers and students in the fields of race gender diaspora transnational literary and cultural studies The chapters of this book were originally published in Cultural Studies

Seeing Perception Silke Horstkotte, Karin Leonhard, 2021-02-19 What do we see when we see how do we perceive vision itself and how do we speak and write about seeing and perception The articles collected in this volume attempt to observe the constitution of perception be it of a visual field or visible objects but also of images which emerge in the mind e g that of the reader in the act of reading The act of vision is profoundly impure and seeing very much entails other modes of sense based perception such as listening touching feeling tasting or smelling Various modes of seeing can moreover be observed within literary texts or in music dreams memory or all kinds of bodily experiences like dance pain sexuality etc so that there cannot be any such thing as a clearly defined realm called viscosity Moreover seer and seen are mutually permeable in any visual practice reflecting on the reciprocal relationship between the viscosity of objects and the very act of looking which could be understood not only as a sensual experience but also as an interaction an intellectual performance and interpretation But if there exists this inseparable bond between object and spectator how can we distance ourselves from the act of looking and show seeing how is it possible to talk and write about seeing perception The impurity of the visual and the contextuality of all acts of looking constitutes a common thread running through the articles collected in this volume The ways in which images are perceived in Western culture are inextricably linked with verbal and textual structures and ways of thinking However the contributions in this volume are less concerned with the practical political implications of a visual culture which formed the backbone of visual studies research a few years ago and more with an adequate understanding of the various concepts and operations at work in theories of visual perception of seeing the gaze and of focalisation
