Sixty Squadron R.A.F. Group-Captain A. J. L. Scott, 2015-01-08 Example in this ebook This book tells the story of Squadron No 60 of the Royal Flying Corps afterwards of the Royal Air Force When the war began in August 1914 the Royal Flying Corps was a very small body which sent four squadrons on active service and had a rudimentary training organisation at home In those days the only functions contemplated for an airman were reconnaissance and occasionally bombing Fighting in the air was almost unknown The aeroplanes were just flying machines of different types but intended to perform substantially the same functions Gradually as the war continued specialisation developed Fighting in the air began machine guns being mounted for the purpose in the aeroplanes Then some aeroplanes were designed particularly for reconnaissance some particularly for fighting some for bombing and so on It was in the early part of this period of specialisation that Squadron No 60 was embodied And as this narrative tells us its main work was fighting in the air It was equipped for the most part with aeroplanes which were called scouts not very felicitously since a scout suggests rather reconnaissance than combat These machines carried only one man were fast easy to man uvre and quick in responding to control They were armed with one or two machine guns and they engaged in a form of warfare new in the history of the world and the most thrilling that can be imagined for each man fought with his own hand trusting wholly to his own skill and that not on his own element but in outrage of nature high in the air surrounded only by the winds and clouds The embodiment of the fighting scout squadrons was part of the expansion and organisation of what became the Royal Air Force Among all the achievements of the war there has been perhaps nothing more wonderful than the development of the Royal Flying Corps and the Royal Naval Air Service and their amalgamation in the great Royal Air Force which fought through the last year of the war When the war opened the Royal Flying Corps and the Royal Naval Air Service were bodies of few units ancillary to the Army and the Navy of which the control was in the hands of the Army Council and the Board of Admiralty It was not realised that warfare in the air was a new and distinct type of warfare Generals who would have laughed at the idea of commanding a fleet Admirals who would have shrunk from the leadership of an army corps were quite unconscious of their unfitness to deal with the problems of aerial war Every step therefore of the organisation and expansion of the flying services had to be conducted under the final control of bodies kindly and sympathetic indeed but necessarily ignorant That the Royal Flying Corps attained to its famous efficiency and was expanded more than a hundredfold should earn unforgetting praise for those who were responsible for leading and developing it The country owes a great debt which has not perhaps been sufficiently recognised to Sir David Henderson whose rare gifts of quick intelligence and ready resource must have been taxed to the utmost in his dual position as head of the Flying Corps and member of the Army Council to Sir Sefton Brancker who worked under him in the War Office and to Sir Hugh Trenchard who from the date that Sir David Henderson came back from France to that of the

amalgamation of the flying services in the Royal Air Force was in command in France It was the administrative skill of these distinguished men that stood behind the work of the squadrons and made possible their fighting or bombing or reconnaissance And this background of administrative skill and resource must not be forgotten or suffered to be quite outshone by the brilliant gallantry of the pilots and observers To be continue in this ebook Sixty Squadron RAF A.J.L. Scott, Hugh Cecil Lowther Earl of Lonsdale, 1920 *Sixty Squadron* A. J. L. Scott, A nail biting exciting narrative this is the
history of a specialist RFC Scout squadron formed in 1916 which served above the western front in the battles of the
Somme Arras third Ypres Passchendaele and the German offensives in March 1918 when it became Sixty Squadron of the
new RAF Although there is a full discussion of technical problems a glossary of technical terms and a guide to the aircraft
with which the Squadron was equipped the main aim of the book is telling the thrilling story of air combat against the
formidable German enemy As Lord Hugh Cecil writes in his vivid Preface Many people feel apprehensive at flying at all but to
fly and fight to sit alone in an aeroplane thousands of feet above the ground to catch sight of an enemy to go to attack him
flying faster than an express train moves to venture near as may be dared knowing that the slightest collision will cast both
helpless to the ground to dodge and dive and turn and spin to hide in clouds or in the dazzle of the sun to fire a machine gun
while not losing mastery of the control and rudder of one's own aeroplane to notice the enemy's bullets striking here and
there on one's machine and know that if a bullet hits the engine it means either death or a precarious landing and captivity
and if a bullet hits the petrol tank it means being burned alive in the air and yet to fight on and escaping to go forth afresh
next day surely to read of this is to realise with new and penetrating force the stupendous measure of what human skill can
do and human courage dare Illustrated with 21 photographs and pictures and two maps and accompanied by two appendices
listing officers who served in the squadron and their fates this is a book that no one remotely interested in the Great War in

failed because of the emerging dictatorships in Germany and Italy and the expansionist policies adopted by Japan Britain was
still reeling from the consequences of World War I and the RAF was sadly far behind the other major world powers in aircraft
design still relying on bi planes that were direct descendants of World War I thinking It gradually became apparent that
despite UK government dithering the RAF needed to develop new aircraft engines and increase production to confront the

bully boy tactics of the Axis powers As the turn of the decade approached extraordinary measures were taken to enable RAF to defend Britain's skies and this her freedom As with Volume 1 this book covers every conceivable part of the RAF's history through these pre War days It looks at the development and invention of new equipment such as radar monoplane fighters metal construction and the heavy bomber This was an era when science in aviation was rushing ahead and fortunately for Britain's freedom it laid the foundations of victory in 1943
