Small Steps Towards Abundance Crops For A More Sustainable Agriculture:

Small Steps Towards Abundance Elaine M. Solowey, 2003 *Managing Water and Agroecosystems for Food Security* Eline Boelee, 2013 Water protection food production and ecosystem health are worldwide issues Changes in the global water cycle are affecting human well being in many places while widespread land and ecosystem degradation driven by poor agricultural practices is seriously limiting food production Understanding the links between ecosystems water and food production is important to the health of all three and sustainably managing these connections is becoming increasingly necessary This book shows how sustainable ecosystems especially agroecosystems are essential for water management and food production

The Jordan River and Dead Sea Basin Clive Lipchin, Deborah Sandler, Emily Cushman, 2009-10-09 The 21st century will present unprecedented challenges Already in its first decade we have seen the dramatic impact of two systemic risks that of climate change and that of the financial crisis The cause but also the solution to these crises lies in a deeper understanding of the underlying factors and int dependencies New ways must be found to overcome deep obstacles and find common solutions to seemingly intractable problems The water crisis in the Middle East is a central challenge of the 21st century The future of the people of the region depends on finding lasting solutions Due to the exhaustion and pollution of available sources compounded by climate change demographic change and economic development the pressures of water resource management will grow New solutions must urgently be found as business as usual is not sustainable This book provides vital new insights into possible elements of a sustainable future in one key area that of the Jordan River and Dead Sea Basin The future development of the Jordanian Palestinian and Israeli people depends on finding a just and sustainable system of water resource management in this Basin Given the potential for regional and other conflicts arising out of tensions over water the ramifications are wider and even global in significance This volume provides fresh regional and international perspectives which greatly assist in our understanding of the issues and their possible resolution

Management of Biological Nitrogen Fixation for the Development of More Productive and Sustainable Agricultural Systems J.K. Ladha,M.B. Peoples,1995-09-30 Reprinted from Plant and Soil v 174 nos 1 2 1995 this volume is devoted to discussions on the role of biological nitrogen fixation BNF in agricultural sustainability Papers presented on BNF in crop forage and tree legumes are augmented with discussion of integrated farming systems involving BNF soil and N management and recycling of legume residues BNF by non legumes is discussed and attempts to transform cereals into nodulating plants are critically reviewed Also described are advances in the development of new methodologies to understand symbiotic interactions and to assess N₂ fixation in the field means of enhancing BNF through plant and soil management breeding and selection problems encountered in exploiting BNF under farmers field conditions and promising approaches to improve BNF exploitation Lacks a subject index Annotation copyright by Book News Inc Portland OR 15N

Tracing of Microbial Assimilation, Partitioning and Transport of Fertilisers in Grassland Soils Alice Fiona Charteris,2019-10-28 This book presents innovative research on soil nitrogen cycling and nitrate leaching with a view to improving soil management and fertiliser nitrogen use efficiency and reducing nitrogen leaching losses In this regard nitrogen 15 15N labelled fertiliser was used as a biochemical and physical stable isotope tracer in laboratory and field experiments The major outcome of the research was the development validation and application of a new compound specific amino acid 15N stable isotope probing method for assessing the assimilation of fertiliser nitrogen by soil microbial biomass The novelty of the method lies in its tracing of incorporated nitrogen into newly biosynthesised microbial protein in time course experiments using gas chromatography combustion isotope ratio mass spectrometry The approach provides previously unattainable insights into the microbial processing of different nitrogen fertilisers in different soils Further it identifies the mechanistic link between molecular scale processes and observations of field scale fertiliser nitrogen immobilisation studies The method and the results presented here will have far reaching implications for the development of enhanced recommendations concerning farm based soil management practices for increasing soil productivity and reducing nitrogen losses which is essential to minimising environmental impacts

Soil Basics, Management and Rhizosphere Engineering for Sustainable Agriculture Channarayappa C.,D P Biradar,2018-10-16 Increase in global population drastic changes in the environment soil degradation and decrease in quality and quantity of agricultural productivity warranted us to adapt sustainable farming practices This book focuses on soil health management and creating biased rhizosphere that can effectively augment the needs of sustainable agriculture

Unlearning Charles L. Briggs,2021-05-03 A provocative theoretical synthesis by renowned folklorist and anthropologist

Charles L Briggs Unlearning questions intellectual foundations and charts new paths forward Briggs argues through an expansive look back at his own influential works as well as critical readings of the field that scholars can disrupt existing social and discourse theories across disciplines when they collaborate with theorists whose insights are not constrained by the bounds of scholarship Eschewing narrow Eurocentric modes of explanation and research foci Briggs brings together colonialism health media and psychoanalysis to rethink classic work on poetics and performance that revolutionized linguistic anthropology folkloristics media studies communication and other fields Beginning with a candid memoir that credits the mentors whose disconcerting insights prompted him to upend existing scholarly approaches Briggs combines his childhood experiences in New Mexico with his work in graduate school his ethnography in Venezuela working with Indigenous peoples and his contemporary work which is heavily weighted in medical folklore Unlearning offers students emerging scholars and veteran researchers alike a guide for turning ethnographic objects into provocations for transforming time worn theories and objects of analysis into sources of scholarly creativity deep personal engagement and efforts to confront unconscionable racial inequities It will be of significant interest to folklorists anthropologists and social theorists and will stimulate conversations across these disciplines

Climate Change Impact and Adaptation in Agricultural Systems Jurg Fuhrer, Peter J Gregory, 2014-06-18 The focus of this book is future global climate change and its implications for agricultural systems which are the main sources of agricultural goods and services provided to society These systems are either based on crop or livestock production or on combinations of the two with characteristics that differ between regions and between levels of management intensity In turn they also differ in their sensitivity to projected future changes in climate and improvements to increase climate resilience need to be tailored to the specific needs of each system The book will bring together a series of chapters that provide scientific insights to possible implications of projected climate changes for different important types of crop and livestock systems and a discussion of options for adaptive and mitigative management

Biopesticides in Environment and Food Security: Issues and Strategies Opender Koul, G.S. Dhaliwal, S. Khokhar, Ram Singh, 2012-06-01 Drivers behind food security and crop protection issues vis vis the food losses caused by pests include rapid human population increase climate change loss of beneficial on farm biodiversity reduction in per capita cropped land water shortages and pesticide withdrawals Integrated pest management therefore becomes a compulsory strategy in agriculture which offers a toolbox of complementary crop and region specific crop protection solutions to address these rising pressures IPM aims at more sustainable solutions by using complementary technologies and one of them is the use of biopesticides including genetically modified cropping systems The aim is to reduce pests below economic thresholds utilizing key ecological services particularly

biocontrol systems via semiochemicals biopesticides precision pest monitoring tools and rapid diagnostics In fact we are facing twin problems of environment and food security for the expanding population and it is necessary to ensure adequate pesticide free food The ecofriendly nature of biopesticide products suggests environment protection and safety for natural enemies and non target organisms However their adoption and use have lagged behind due to certain constraints like variable performance under field situations lack of quality standards and interest by big industrial houses and cumbersome regulatory procedures The present book is an attempt to critically debate over all these issues and suggest a road map for future **Agricultural Practices, Farm Policy, and the Conservation of Biological Diversity** Philip W.
