Evaluation of the International Finance Corporation's Global Trade Finance Program, 2006-12 The World Bank, 2013-09-04 As part of its strategy to support global trade the World Bank Group seeks to enhance trade finance in emerging markets In 2005 the International Finance Corporation IFC part of the Bank Group introduced the Global Trade Finance Program GTFP to support the extension of trade finance to underserved clients globally This IEG evaluation found that overall the GTFP was a relevant response to the demand to reduce risk in trade finance in emerging markets The program significantly improved IFC's engagement in trade finance by introducing an open network of banks and a quick flexible response platform to support the supply of trade finance IEG's evaluation covers the program's operations from its inception in 2005 through FY2012 The program grew from a 500 million annual commitment to 5 billion in FY12 It accounted for 39 percent of total IFC commitments and has low costs it accounted for 2.4 percent of IFC's capital use and 1.2 percent of its staff costs and has had no claims to date It is profitable as well although not to the extent originally expected accounting for 0.6 percent of IFC's net profit IEG found that the GTFP has particular additionality among higher risk countries In its early years it was concentrated in these countries particularly in Africa During the global crisis the program

risk mitigation instrument became relevant in much broader markets Client feedback on the program has been positive In its evaluation IEG does offer several recommendations to enhance its effectiveness including on issues of transparency and reporting methods as well as expanding the share of the program in needier markets For development professionals the lessons in this evaluation can be applied to private sector development situations particularly mitigation of financing risks in emerging markets

Although women own an estimated one third of all small and medium sized enterprises SMEs in emerging markets they are deeply underrepresented in global supply chains

In what the author refers to as the Women in Trade Deficit women owned enterprises earn less than 1% of all money spent on vendors by large corporations and governments worldwide

Drawing on an in depth empirical investigation of a range of SMEs in Bangladesh Nigeria and Sri Lanka this book investigates how women enter the supply chains of major global firms and multinational corporations and the challenges they face in doing so
