Feminine Look Jennifer Friedlander, 2009-01-01 *Feminine Look* shows how the Lacanian concept of sexualization makes possible a new account of the relationship among feminism psychoanalysis and spectatorship Whereas previous studies have tended to ask how spectatorship may be influenced by sexual difference Jennifer Friedlander asks how particular spectatorial encounters may engender different sexualized responses In so doing she traces a fresh path through Freud's account of the relationship

between visual perception and sexual difference and rereads Freud's fable of castration anxiety suggesting that sexual identity arises as a response to the symbolic order's indifference to the subject's need for a solid identity She examines provocative and controversial artistic images by Jamie Wagg Marcus Harvey and Sally Mann to demonstrate how images not only create and embody social practices but also precipitate viewer anxieties and pleasures Logic, Language and Reality Bimal Krishna Matilal, 2008-01-01 The word philosophy as well as the conjuring expression Indian philosophy has meant different things to different people endeavours and activities old and new grave and frivolous edifying and banal esoteric and exoteric In this book the author has chosen deliberately a very dominant trend of the classical Sanskrit philosophical literature as his subject of study The age of the material used here demands both philological scholarship and philosophical amplification Classical pramanasastras usually deal with the theory of knowledge the nature of inference and language and the related questions of ontology and semantics Several important concepts and theories have been singled out for critical analysis and clarification in modern terms so that the results may be intelligible to modern students of both Sanskrit and philosophy It is hoped that such an attempt will kindle the enthusiasm of young scholars in the field and inspire them to proceed in this comparatively new area of research and explore further and more interesting possibilities **A History of Indian Logic** Satis Chandra Vidyabhusana, 1988 The author has in this work clearly marked the principal stages of Indian logic in the vast period of about two thousand years beginning from 640 and has traced how from Anviksiki the science of debate Indian logic developed into the science of knowledge Pramanasastra and then into the science of dialectics Prakarana of Tarkasastra The treatment of the subject is both historical and critical The author has traced some Greek influence on Indian logic For instance he has shown how the five membered syllogism of Aristotle found its way through Alexandria Syria and other countries into Taxila and got amalgamated with the Nyaya doctrine of inference The book is one of the pioneer works on the subjects It has drawn on original sources exhaustively Besides the preface introduction foreword and table of contents the work contains several appendices and indexes *The Pyrocene* Stephen J. Pyne, 2022-08-02 A provocative rethinking of how humans and fire have evolved together over time and our responsibility to reorient this relationship before it's too late The Pyrocene tells the story of what happened when a fire wielding species humanity met an especially fire receptive time in Earth's history Since terrestrial life first appeared flames have flourished Over the past two million years however one genus gained the ability to manipulate fire swiftly remaking both itself and eventually the world We developed small guts and big heads by cooking food we climbed the food chain by cooking landscapes and now we have become a geologic force by cooking the planet Some fire uses have been direct fire applied to convert living landscapes into hunting grounds forage fields farms and pastures Others have been indirect through pyrotechnologies that expanded humanity's reach beyond flame's grasp Still preindustrial and Indigenous societies largely operated within broad ecological constraints that determined how and when living landscapes could be burned These ancient relationships between humans and fire

broke down when people began to burn fossil biomass lithic landscapes and humanity's firepower became unbounded Fire catalyzed climate change globalized the impacts into a new geologic epoch The Pleistocene yielded to the Pyrocene Around fires across millennia we have told stories that explained the world and negotiated our place within it The Pyrocene continues that tradition describing how we have remade the Earth and how we might recover our responsibilities as keepers of the planetary flame

Sinless Mwanandeke Kindembo, 2021-04-27 In this book the author Mwanandeke has examined the most confused and controversial topic of all the time That is to say The Origin Sin or the sin that was committed by Adam and Eve It is the most misunderstood concept that resulted in the three major Abrahamic religions going their separate ways The doctrine of the Origin Sin implies that there is no free will and we must all follow in the footsteps of our father Adam and mother Eve In other words we are left without choice but to inherit their sins and expect to be judged accordingly Following the Christians doctrine Jesus was born raised and died on the cross in order to break the burden of the Origin Sin Again all in the name of paying the price of the damage that was done before his existence washing away your sins and thus achieving salvation Whereas the Jews in the Old Testament and Muslims in the Qur'an took a different approach of achieving salvation These last two groups demolished the idea of a single individual dying for the sins of mankind and the sacrifice of blood as the means of achieving salvation

Contents The Origin Sin 1 Who Died for Our Sins 4 How to identify the True Believer 7 The Source of the Smoke 11 How to achieve Salvation 14 The Sign of Jonah according to Jesus 19 The Lamb of God 23 The Cry Upon The Cross 27 Lion of Judah 34 Who's the Redeemer 40 The Beloved One 42 Spiritual Separation from God 47 Contradictory Teachings 50 Summary 57 Religious Quotes 64 Book Description 88 About The Author 90
