**Australian Sociology** K. Harley, G. Wickham, 2014-07-22 Battered and bruised by injuries often self inflicted sustained in the first half of the twentieth century since 1950 sociology in Australia has fought its way back into the academic mainstream This has not been easy its fortunes seem forever mixed good in some places and dismal in others But it has proved itself resilient it is a survivor

**Social Process and the City** Peter Williams, 2019-03-08 Contemporary urban studies engages a wide range of approaches in the analysis of the processes at work in urban areas These approaches derive from anthropology economics geography history politics and sociology as well as from the professional experience of town planning and architecture Social process and the city reflects this growing cross disciplinary engagement This shows the important problematic role which cities in particular and urban change in general have played in the growth of Australia The overriding concern of each essay in this collection is to develop an understanding of the ways urban areas function and an awareness of how differing interpretations of urban phenomena might be applied This attention to the nature of the forces at work and the processes these forces manifest themselves in is extended both empirically and conceptually This book was first published in 1983

**Social Policy and Its Administration** Joanna Monie, Adrienne Wise, 2013-10-22 Social Policy and Its Administration contains an index of literature that defines the output created by social scientists for the welfare of human beings This literary survey originates out of the need to present a comprehensive bibliographic work The book covers areas that encompass the concept social policy Topics such as the standards in social welfare services are also the focus of the book The book traces the beginning of social science and the major proponents of the subject The improvements made on the field are also enumerated and the countries that contributed to the progress of society are named in the book Social revolutions such as the liberation of women and the abolishment of servitude as well as the transition from colonial status to political independence are discussed in the book The text will be a useful tool for sociologists historians students and researchers in the field of political science

**Activism and the Policy Process** Anna Yeatman, 2020-07-29 Activists protecting rainforests demanding increased childcare developing local community housing campaigning for AIDS funding or protecting consumers are as much part of the political landscape as the media parliament peak industry groups political parties or trade unions This collection explores the idea of policy activism and its relationship to the processes that not only set but implement and deliver the policy agenda Policy activists operate both inside and outside government They include community based organisers activist bureaucrats service providers and professionals Policy activism has been barely explored in existing literature This collection puts the idea on the map It is an innovative contribution to the literature using case studies across a broad range of policy areas This volume opens the window on an aspect of the policy process that rarely

receives attention from students of politics or policy anywhere across the globe The framework presented and the cases included in these pages provide a glimpse of the workings of a complex democracy describing a range of actors responding creatively to the dynamics of social political and economic change It is fascinating to see how policy functions and social values appear to be more important to these processes than the formal structures of the government in which they are placed

Beryl A Radin Professor of Public Administration and Policy State University of New York at Albany      **Migration, Class and Transnational Identities** Val Colic-Peisker, 2010-10-01 Val Colic Peisker harnesses concepts and theories from sociology anthropology and political science to compare the vastly different experiences of two Croatian immigrant cohorts in the city of Perth Western Australia The populations explored represent an earlier group of working class migrants arriving from communist Yugoslavia from the 1950s to 1970s and a later group of urban professionals arriving in the 1980s and 1990s as independent or skills based migrants This latter group integrated into professional ranks but also used their Australian experience as a stepping stone in becoming part of a highly mobile global professional middle class Employing a refined theoretical analysis this rich ethnography challenges the domination of the ethnic perspective in migration studies and the idea of ethnic community itself It emphasizes the importance of class focusing on the intersection of class ethnicity and gender in the process of migration migrant incorporation and transnationalism In theorizing the connection of the two migrant cohorts with their native Croatia the study introduces concepts of ethnic and cosmopolitan transnationalism as two distinctive experiences mediated by class      *The Politics of Australian Child Care* Deborah Brennan, 1998-04-06 This revised edition is a political history of child care in Australia from the 1890s to the late 1990s      **Reimagining Class in Australia** Henry Paternoster, 2017-09-21 This book re evaluates New Left and Marxist texts from the 1980s in order to explore problems facing the study of class which have emerged within Australian and international theories The author contrasts the popular ideas of Connell Bourdieu and the Death of Class thesis with those of lesser known texts concluding that no single definition can account for the various historical meanings of class Instead loosely following Castoriadis the concept of class can best be understood as creatively imagined and institutionalised Paternoster proposes that class is best studied through historical phenomenology which can be used to link political economy cultural sociology and anthropological ethnographies This approach allows the contributions of Marxist and New Left authors to be reintegrated with contemporary theories Doing so highlights the significance of labour populism while cautioning against the ahistorical applications of texts such as Bourdieu's *Distinction* *Reimagining Class in Australia* will be of interest to students and scholars across a range of disciplines including sociology history political economy and anthropology      **Migration, Multiculturalism and Language Maintenance in Australia** Beata Leuner, 2008 Analyses push and pull factors for migration from Poland to Australia and examines the costs of migration Polish migrants experiences of Australia's multicultural policy an evaluation of parent's migration by their children re migration to Poland and much more Beata Leuner Monash University      **Australian**

**Creating White Australia** Jane Carey, Claire McLisky, 2009 The adoption of White Australia as government policy in 1901 demonstrates that whiteness was crucial to the ways in which the new nation of Australia was constituted And yet historians have largely overlooked whiteness in their studies of Australia s racial past Creating White Australia takes a fresh approach to the question of race in Australian history It demonstrates that Australia s racial foundations can only be understood by recognising whiteness too as race Including contributions from some of the leading as well as emerging scholars in Australian history it breaks new ground by arguing that whiteness was central to the racial ideologies that created the Australian nation This book pursues the foundations of white Australia across diverse locales It also situates the development of Australian whiteness within broader imperial and global influences As the recent apology to the Stolen Generations the Northern Territory Intervention and controversies over asylum seekers reveal the legacies of these histories are still very much with us today

What really happened on the Australian home front during the Second World War For the people of Melbourne these were years of social dislocation and increased government interference in all aspects of daily life On the Home Front is the story of their work leisure relationships and their fears for by 1942 the city was pitted with air raid trenches and in the half light of the brownout Melburnians awaited a Japanese invasion As women left the home to replace men in factories and offices the traditional roles of mothers and wives were challenged The presence of thousands of American soldiers in Melbourne raised new questions about Australian nationalism and identity and the carnival spirit of many on the home front created anxiety

about the issues of drunkenness gambling and sexuality Kate Darian Smith's classic and evocative study of Melbourne in wartime draws upon the memories of men and women who lived through those turbulent years when society grappled with the tensions between a restrictive government and new opportunities for social and sexual freedoms

**Images Of Japanese Society** Hb Ross Mouer, Yoshio Sugimoto, 2013-10-28 The popular image of Japanese society is a stereotypical one that of a people characterised by a coherent set of thought and behaviour patterns applying to all Japanese and transcending time Ross Mouer and Yoshio Sugimoto found this image quite incongruous during their research for this book in Japan They ask whether this stereotype of the Japanese is not only generated by foreigners but by the Japanese themselves This is likely to be a controversial book as it does not contribute to the continuing mythologising of Japan and the Japanese The book examines contemporary images of Japanese society by surveying an extensive sample of popular and academic literature on Japan After tracing the development of holistic theories about the Japanese commonly referred to as the group model attention is focused on the evaluation of that image Empirical evidence contrary to this model is discussed and methodological lacunae are cited A sociology of Japanology is also presented In pursuit of other visions of Japanese society the authors argue that certain aspects of Japanese behaviour can be explained by considering Japanese society as the exact inverse of the portrayal provided by the group model The authors also present a multi dimensional model of social stratification arguing that much of the variation in Japanese behaviour can be understood within the framework as having universal equivalence
