Social Comprehension And Judgment The Role Of Situation Models:

Social Comprehension and Judgment Robert S. Wyer, Jr., 2003-09-12 Written by one of the foremost authorities in social cognition Social Comprehension and Judgment examines how people process information encountered in their everyday lives In the book Dr Wyer proposes a new theory about the way in which information acquired in everyday life is comprehended and represented in memory and how it is later used as a basis for judgments and decisions A major emphasis throughout is on the construction and use of narrative representations of knowledge and the way that visual images influence the comprehension of these narratives and the judgments based on them The role of affective reactions in this cognitive activity is also discussed Social Comprehension and Judgment is divided into three sections Part I provides a conceptual overview by outlining the general theoretical framework focusing on assumptions about the storage and retrieval of information and reviews recent research on the impact of knowledge accessibility on judgments and decisions Part II deals with the comprehension of information and examines the role of these processes in impression formation persuasion and responses to humor Part III describes the inferences that are based on information conveyed in social situations This book is ideal for advanced students and researchers interested in the areas of social cognition or social information processing

Arguing for a General Framework for Mass Media Scholarship W. James Potter, 2008-12-11

Arguing for a General Framework for Mass Media Scholarship challenges scholars and students to consider and reconsider what we know about media and how we think about media. As such, the book provides an important framework for thinking about knowledge regardless of the discipline. The text provides all of the necessary tools to move the field forward in a way that will increase the rigor of the work being done and augment the overall profile of the discipline.

Dana Mastro, University of Arizona

In this groundbreaking book, W. James Potter presents an innovative perspective to media scholars and students who are frustrated with the fragmentation of research findings across so many journals, books, and fields. Arguing for a General Framework for Mass Media Scholarship presents a clear plan for a more efficient way to build knowledge about the mass media so that it can be better organized and made more useful.

Key Features:

- Conducts an in-depth analysis of mass media scholarship's four major facets: effects, content, audiences, and organizations.
- Presents a significant shift in conceptualizing media effects and ways research can be conducted to generate more useful knowledge about media influence.
- Develops narrative line as a tool to guide analyses about how content decisions are made by producers.
- Synthesizes a system of explanation about why audiences attend to certain messages and how individuals construct meaning from those messages.
- Incorporates an analysis of mass media organizations to provide greater context of understanding messages and their effects on individuals and macro units in society.

The book will play an important role in providing structure to a broad, fragmented discipline. I believe it will, at the very least, create important dialogues about what we now know, understand about areas of mass media, and where we should move as a discipline. This book is clearly a call to arms for mass media scholars to ratchet up the quality of research and what we know to see the interconnections within and among strands of scholarship and to move forward in a more

efficient organized manner Professor Potter should be commended for this Roger Cooper Ohio University This book is that call to action that comes forward every few years to wake us up and challenge our ways of doing things not by being radical but via synthesis I've been waiting for several years for a book like this Sahara Byrne Cornell University

Use and effects of humor in international teams Marco Sampietro, 2014-05-09T00:00:00+02:00 Humor and laughter are universal aspects of human life humans first vocalization is crying but laughter follows quickly after During childhood we often select our friends based on their funniness we especially women feel attracted by people that make us laugh and sharing a laugh is a powerful way to maintain good relationships Humor is mainly a social phenomenon we laugh and joke much more frequently when we are with other people than when we are alone All cultures throughout the world present some sort of humor even though each form may have its own differences From an academic standpoint the topic of humor seems to have gained over the years the reputation of being an elusive and mysterious phenomenon Earlier researchers did not regard humor as a proper topic for scientific investigation Nowadays there are many studies on humor in different fields Unfortunately in managerial disciplines there are very few This research aims at filling some of the existing knowledge gaps by exploring the type of humor used while working in national versus multinational teams and if humor has an impact on team performance The research compares G8 countries
