Mueller, 2014-08-20 The Logical Foundations of Social Theory describes Gert Mueller's argument that physical biological social moral and cultural reality form an asymmetrical hierarchy of founding and controlling relationships that condition social reality rather than mechanically determining it This book analyzes social stratification as labor wealth and power the moral order as solidarity ideology and morality and culture systems as art science and religion      [The Phantom of the Ego](#) Nidesh Lawtoo, 2013-10-01 The Phantom of the Ego is the first comparative study that shows how the modernist account of the unconscious anticipates contemporary discoveries about the importance of mimesis in the formation of subjectivity Rather than beginning with Sigmund Freud as the father of modernism Nidesh Lawtoo starts with Friedrich Nietzsche's antimetaphysical diagnostic of the ego his realization that mimetic reflexes from sympathy to hypnosis to contagion to crowd behavior move the soul and his

insistence that psychology informs philosophical reflection Through a transdisciplinary comparative reading of landmark modernist authors like Nietzsche Joseph Conrad D H Lawrence and Georges Bataille Lawtoo shows that before being a timely empirical discovery the mimetic unconscious emerged from an untimely current in literary and philosophical modernism This book traces the psychological ethical political and cultural implications of the realization that the modern ego is born out of the spirit of imitation it is thus strictly speaking not an ego but what Nietzsche calls a phantom of the ego The Phantom of the Ego opens up a Nietzschean back door to the unconscious that has mimesis rather than dreams as its via regia and argues that the modernist account of the mimetic unconscious makes our understanding of the psyche new *Social Structure and Forms of Consciousness* István Mészáros, 2011 In *The Dialectic of Structure and History* Volume Two of *Social Structure and Forms of Consciousness* Istvan Meszaros brings the comprehension of our condition and the possibility of emancipatory social action beyond the highest point reached to date Building on the indicatory flashes of conceptual lightning in the *Grundrisse* and other works of Karl Marx Meszaros sets out the relations of structure and agency individual and society base and superstructure nature and history in a dialectical totality open to the future The project is brought to its conclusion by means of critique an analysis that shows not only the inadequacies of the thought critiqued but at the same time their social historical cause The crucial questions are addressed through critique of the highest point of honest and brilliant thought in capital s ascending phase that of Adam Smith Kant and Hegel as well as the irrationalities and dishonesty of the apologists of the capital system s descending phase such as Hayek and Popper The dead ends of both Levi Strauss s structuralism and post modernism arising from their denial of history are placed in their context as capital apologetics What Meszaros the leading Marxist philosopher of our times has achieved is of world historical importance He has cleared the philosophical ground to permit the illumination of a path to transcend the destructive death spiral of the capital system **Consciousness and the Social Brain** Michael S. A. Graziano, 2013-08-01 Princeton neuroscientist Michael Graziano lays out an audacious new theory to account for the deepest mystery of them all what is consciousness Linking consciousness with social intelligence Graziano discusses the science the philosophy and the implications **Psychological Register**, 1929 [Psychological Abstracts](#) Walter Samuel Hunter, 1929 **Journal of Philosophical Studies**, 1928 Includes section New books

[Cognition](#) Tom Rockmore, 1997-01-01 Hegel s *Phenomenology of Spirit* the philosopher s first and perhaps greatest work is the most important philosophical treatise of the nineteenth century In this companion volume to his general introduction to Hegel Tom Rockmore offers a passage by passage guide to the *Phenomenology* for first time readers of the book and others who are not Hegel specialists Rockmore demonstrates that Hegel s concepts of spirit consciousness and reason can be treated as elements of a single coherent theory of knowledge one that remains strikingly relevant for the contemporary discussion He shows how the various conceptions of cognition developed in the text culminate in absolute knowing which Rockmore reads in opposition to the frequent religious readings of Hegel in a wholly secular manner Unlike commentators

who isolate Hegel's text from its philosophical origins Rockmore analyzes the book in the philosophical context from which it emerged lucidly discussing notoriously difficult passages in relation to the ideas of Aristotle and Descartes and above all to those of Kant and other German idealists Hegel's Phenomenology of Spirit the philosopher's first and perhaps greatest work is the most important philosophical treatise of the nineteenth century In this companion volume to his general introduction to Hegel Tom Rockmore offers a passage by passage guide to the Phenomenology for first time readers of the book and others who are not Hegel specialists Rockmore demonstrates that Hegel's concepts of spirit consciousness and reason can be treated as elements of a single coherent theory of knowledge one that remains strikingly relevant for the contemporary discussion He shows how the various conceptions of cognition developed in the text culminate in absolute knowing which Rockmore reads in opposition to the frequent religious readings of Hegel in a wholly secular manner Unlike commentators who isolate Hegel's text from its philosophical origins Rockmore analyzes the book in the philosophical context from which it emerged lucidly discussing notoriously difficult passages in relation to the ideas of Aristotle and Descartes and above all to those of Kant and other German idealists      Conceptual Foundations of Social Research Methods David Baronov,2015-10-23

One of the common frustrations for students trying to make sense of the various debates and concepts that inform contemporary educational and social science research methods such as structuralism postpositivism hermeneutics and postmodernism is that most books introducing these topics are written at a level that assumes the reader comes to this material with a basic grasp of the underlying ideas Too often fundamental concepts and theories are presented without adequate preparation and without providing practical examples to illustrate key elements When the first edition of Conceptual Foundations of Social Research Methods was published it represented a sharp contrast with these other approaches and received much praise In this revised and expanded second edition David Baronov further develops his critically acclaimed treatment of the core conceptual tools of social research informing education and the social sciences updating his discussion of the current literature and adding a new chapter that explores the role of pragmatism Features of the Second Edition      **The Genesis and Transformation of Social Consciousness** Yang Chen,2024-03-22 This book focuses on the formation of human social consciousness and develops a naturalist approach to social normativity Beginning from Marx's uncompleted concept of social consciousness the book retrospects the studies about collective intentionality in the area of philosophy of mind and social ontology Specifically a reinterpretation of social consciousness with respect to collective intentionality can offer us a new naturalistic approach to the social formation and normativity According to the naturalistic approach we can discern the inner structure of social consciousness as a systematic pattern of Intentionality Social consciousness involves three levels of development subjective objective and absolute With this new pattern of social consciousness the naturalism of the young Karl Marx can be revived And by grasping the most essential ability of human Intentionality as the source of social formation it also makes an interdisciplinary study of social philosophy and philosophy of

 Jazz is one of the most influential American art forms of our times It shapes our ideas about musical virtuosity human action  
 and new forms of social expression In *Going for Jazz* Nicholas Gebhardt shows how the study of jazz can offer profound  
 insights into American historical consciousness Focusing on the lives of three major saxophonists Sidney Bechet Charlie  
 Parker and Ornette Coleman Gebhardt demonstrates how changing forms of state power and ideology framed and directed  
 their work Weaving together a range of seemingly disparate topics from Frederick Jackson Turner's frontier thesis to the  
 invention of bebop from Jean Baudrillard's Seduction to the Cold War atomic regime Gebhardt addresses the meaning and  
 value of jazz in the political economy of American society In *Going for Jazz* jazz musicians assume dynamic and dramatic  
 social positions that demand a more conspicuous place for music in our understanding of the social world      *Journal of*

*Philosophical Review* ,1917      *Resilience Process and Its Personal and Social Bases* Chau Kiu Cheung, 2024-10-30 This book  
 is to elucidate personal and social bases for personal resilience thus addressing the issue concerning the predominance of  
 social factors in shaping resilience Essentially the book starts with a clarification of resilience as a phenomenon rather than a  
 trait The clarification also identifies the personal bases in terms of the resilience process which specifies belief about  
 resilience as a precursor to learning about resilience action for resilience and resilience successively To justify the personal  
 and social bases the book expounds the analytical functionalist framework to specify voluntaristic and deterministic  
 mechanisms to perform the four requisite functions of goal attainment adaptation integration and latency Equipped with the  
 conceptual and theoretical grounds the book proceeds to scrutinize the effects of personal and social factors on resilience  
 and its process The personal factors include personal background characteristics personality functional disability and various  
 beliefs whereas the social factors include experiences of caring peace violence and social exclusion in society kindness

sociability and aid from other people and social capital The scrutiny engages five databases about 6 948 Chinese people in Hong Kong and neighboring Chinese cities composed of the public service users older adults students and people with visual impairment Overall the book presents ample theoretical and empirical substances to clarify the genesis of resilience
