Social Capital And Participation:

Social Capital and Participation in Everyday Life Paul Dekker, Eric M. Uslaner, 2003-12-16 This timely volume puts emphasis on the effect of social capital on everyday life how the routines of daily life lead people to get involved in their communities Focussing on its micro level causes and consequences the book's international contributors argue that social capital is fundamentally concerned with the value of social networks and about how people interact with each other The book suggests that different modes of participation have different consequences for creating or destroying a sense of community or participation The diversity of countries institutions and groups dealt with from Indian castes to Dutch churches from highly competent everyday makers in Scandinavia to politics avoiding Belgian women and Irish villagers offers fascinating case studies and theoretical reflections for the present debates about civil society and democracy

Engagement, Trust, and Reciprocity Rebecca Elyse Feiler, 2006 This study examines the extent to which various forms of social capital impact participation in nonprofit organizations Previous research has focused on the importance of trust and engagement among social and political networks to form strong community ties that can cultivate the growth of social capital and promote participation in nonprofit organizations The data analyzed in this study were derived from the Central Florida Social Capital Benchmark survey collected at the University of Central Florida's Institute for Social and Behavioral Sciences To represent three specific aspects of social capital related variables from the survey are combined to create indices that represent civic engagement community trust and political trust For the purposes of this study participation in nonprofit organizations is defined by volunteerism and philanthropy Results from this analysis provide evidence that 1 social capital assets are predictors of volunteerism and philanthropy and 2 higher levels of social capital are correlated with increased participation in nonprofit organizations Although participation in nonprofit organizations can vary depending on a community's characteristics social capital can be seen as an important element in the development of the nonprofit sector

The Handbook of Social Capital Dario Castiglione, Jan W. van Deth, Guglielmo

Wolleb,2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital

Social Capital and Participation in Every Day Life Paul Dekker, Eric M. Uslaner, 2001 **Exploring 'unseen' Social Capital in Community Participation** Sam Wong, 2007 This volume argues that using social capital to eradicate poverty is unlikely to succeed because its mainstream approach mistakenly assumes that social capital necessarily benefits poor people The inadequacy of that assumption Sam Wong argues calls for a reassessment of human motivations institutional dynamics and the complexity of structures in social capital building Proposing a pro poor perspective in which poverty specific outcomes are highlighted he suggests an exploration of unseen social capital is in order not only to challenge the mainstream understanding of seen social capital but to demonstrate the need for everyday cooperation which is shaped by social norms influenced by conscious and unconscious motivations and subject to changes in priority based on livelihood A useful volume for both policy makers and practitioners *Exploring Unseen Social Capital in Community Participation* offers a fresh perspective in thinking about civic and social agency *France, Social Capital and Political Activism* F.

Vassallo, 2010-01-27 This book deals with the theme of political participation in France focusing on conventional and unconventional forms of political activism over the last three decades Measures of social integration and political involvement are used to question the validity of social capital theory *Understanding the Relationship Between Participation and Social Capital for Collective Action* Farzana Julie Ahmed, 2016 This study is an attempt to provide a

contextual analysis of the processes that link social capital and participation and examine how the processes that link the two are acting as enabling or constraining factors for collective action within the context of Kenya Slum Dwellers Internationals Muungano self help saving groups system in Korogocho Mathare and Mukuru The four main conclusions that the study draws are 1 a contextualized understanding of social capital demands social science research to examine the processes through which structural and cognitive social capital reinforce each other 2 Capable agency is the missing ingredient that determines how and if existing stocks of social capital will be harnessed and activated for collective action 3 A contextualized understanding of the processes that simultaneously link productive and perverse social capital which are mutually reinforcing is important in designing participatory tools that are fair inclusive and equitable thus encourage collective action and 4 When a participatory tool is more concerned with results as opposed to process it creates or exacerbates existing divisions within the community failing to achieve collective action **Social Capital** Nan Lin, Bonnie Erickson, 2008-03-06
