Sound States Innovative Poetics And Acoustical Technologies:

Sound States Adalaide Morris, 2018-06-15 By investigating the relationship between acoustical technologies and twentieth century experimental poetics this collection with an accompanying compact disc aims to turn up the volume on printed works and rethink the way we read hear and talk about literary texts composed after telephones phonographs radios loudspeakers microphones and tape recorders became facts of everyday life The collection s twelve essays focus on earplay in texts by James Joyce Ezra Pound H D Samuel Beckett William Burroughs Amiri Baraka Bob Kaufman Robert Duncan and Kamau Brathwaite and in performances by John Cage Caribbean DJ poets and Cecil Taylor From the early twentieth century soundscapes of Futurist and Dadaist sonosphers to Henri Chopin s electroacoustical audio poemes the authors argue these states of sound make bold but wavering statements statements held only partially in check by meaning The contributors are Loretta Collins James A Connor Michael Davidson N Katherine Hayles Nathaniel Mackey Steve McCaffery Alec McHoul Toby Miller Adalaide Morris Fred Moten Marjorie Perloff Jed Rasula and Garrett Stewart

Poetics of Cognition Jessica Lewis Luck, 2023-08-14 Poetics of Cognition investigates the material effects of experimental poetics using new evidence emerging from cognitive science It asks How do experimental poems think and how do we think through them Examining experimental modes such as the New Sentence proceduralism projective verse sound poetry and visual poetry Jessica Lewis Luck argues that experimental poems materialize not so much the content as the activity of the embodied mind and they can thus function as a powerful scaffolding for extended cognition both for the writer and the reader While current critical approaches tend to describe the effects of experimentalism solely in terms of emotion and sensation Luck shifts from the feeling to the thinking that these poems can generate expanding the potential blast radius of experimental poetic effects into areas of linguistic sonic and visual processing and revealing a transformational potency that strictly affective approaches miss The cognitive research Luck draws upon suggests that the strangeness of experimental poetry can reshape the activity of the reader s mind creating new forms of attention perception and cognition This book closes by shifting from theory to praxis extracting forms of teaching from the forms of thinking that experimental poems instill in order to better enable their transformative effects in readers and to bring poetry pedagogy into the twenty first century

American Poetry as Transactional Art Stephen Fredman, 2020-06-02 Explores the ways American poetry engages with visual art music fiction spirituality and performance art Many people think of poetry as a hermetic art as though poets wrote only about themselves or as if the subject of poetry were finally only poetry its forms and traditions Indeed much of what constitutes poetry in the lyric tradition depends on a stringently controlled point of view and aims for a timeless intransitive utterance Stephen Fredman s study proposes a different perspective American Poetry as Transactional Art explores a salient quality of much avant garde American poetry that has so far lacked sustained treatment namely its role as a transactional art Specifically Fredman describes this role as the ways it consistently engages in

conversation talk correspondence going beyond the scope of its own subjects and forms its existential interactions with the outside world Poetry operating in this vein draws together images ideas practices rituals and verbal techniques from around the globe and across time not to equate them but to establish dialogue to invite as many guests as possible to the World Party which Robert Duncan has called the symposium of the whole Fredman invites new readers into contemporary poetry by providing lucid and nuanced analyses of specific poems and specific interchanges between poets and their surroundings He explores such topics as poetry's transactions with spiritual traditions and practices over the course of the twentieth century the impact of World War II on the poetry of Charles Olson and George Oppen exchanges between poetry and other art forms including sculpture performance art and ambient music the battle between poetry and prose in the early work of Paul Auster and in Lyn Hejinian's *My Life* The epilogue looks briefly at another crucial transactional occasion teaching American poetry in the classroom in a way that demonstrates that it is at the center of the arts and at the heart of American culture

Poetics and Precarity Myung Mi Kim, Cristanne Miller, 2018-05-01 Poets and critics address the potential of language to address the increasing level of discord and precarity in the twenty first century At a time when wars acts of terrorism and ecological degradation have intensified and isolationism misogyny and ethnic divisiveness have been given distinctively more powerful voice in public discourse language itself often seems to have failed The poets and critics in this book argue that language has the potential to address this increasing level of discord and precarity and they negotiate ways to understand poetics or the role of the poetic in relation to language the body politic the human body breath the bodies of the natural environment and the body of form Poetry makes urgent issues audible and poetics helps to theorize those issues into critical consciousness Poetry also functions as a cry to protest late capitalist imperialism misogyny racism climate change and all the debilitating conditions of everyday life Hubs of concern merge and diverge precarity takes differently gendered historied embodied geopolitical manifestations The contributors articulate a poetics that renders what has not yet been crystallized as discourse into fields of force They also acknowledge the beauties of sound poetry and music and celebrate the power of community marking the surge of energy that can occur at a particular place at a particular moment Ultimately Poetics and Precarity fosters further conversations that will imagine the concerns of poetics as a continuously emerging field **Lost**

Bodies on the Line Raphael Allison, 2014-12-01 *Bodies on the Line* offers the first sustained study of the poetry reading in its most formative period the 1960s Raphael Allison closely examines a vast archive of audio recordings of several key postwar American poets to explore the social and literary context of the sixties poetry reading which is characterized by contrasting differing styles of performance the humanist style and the skeptical strain The humanist style made mainstream by the Beats and their imitators is characterized by faith in the power of presence emotional communion and affect The skeptical strain emphasizes openness of interpretation and multivalent meaning a lack of stability or consistency and ironic detachment By comparing these two dominant styles of reading Allison argues that attention to sixties poetry readings reveals poets struggling between the kind of immediacy and presence that readings suggested and a private retreat from such performance based publicity one centered on the text itself Recordings of Robert Frost Charles Olson Gwendolyn Brooks Larry Eigner and William Carlos Williams all of whom emphasized voice breath and spoken language and who were inveterate professional readers in the sixties expose this struggle in often surprising ways In deconstructing assertions about the role and importance of the poetry reading during this period Allison reveals just how dramatic political and contentious poetry readings could be By discussing how to hear as well as read poetry *Bodies on the Line* offers startling

new vantage points from which to understand American poetry since the 1960s as both performance and text
