**Stocking the Arsenal** Linda S. Shaw, Jeffrey W. Knopf, Kenneth A. Bertsch, 1985      **The Higher Learning and High Technology** Sheila Slaughter, Sheila A. Slaughter, 1990-01-01 In this critical new work Slaughter investigates how university involvement in high technology influences higher education policy By conducting a case study of the Business Higher Education Forum a liaison organization consisting of Fortune 500 Chief Executive Officers and presidents of well known research universities the author explores the policy agenda of the Forum the historical and structural antecedents of that agenda and its organizational implications for various post secondary sectors and their faculty      **Depression, War, and Cold War** Robert Higgs, 2006-06-22 Other books exist that warn of the dangers of empire and war However few if any of these books do so from a scholarly informed economic standpoint In *Depression War and Cold War* Robert Higgs a highly regarded economic historian makes pointed fresh economic arguments against war showing links between government policies and the economy in a clear accessible way He boldly questions for instance the widely accepted idea that World War II was the chief reason the Depression era economy recovered The book as a whole covers American economic history from the Great Depression through the Cold War Part I centers on the Depression and World War II It addresses the impact of government policies on the private sector the effects of wartime procurement policies on the economy and the economic consequences of the transition to a peacetime economy after the victorious end of the war Part II focuses on the Cold War particularly on the links between Congress and defense procurement the level of profits made by defense contractors and the role of public opinion and not ideological rhetoric in the maintenance of defense expenditures over time This new book extends and refines ideas of the earlier book with new interpretations evidence and statistical analysis This book will reach a similar audience of students researchers and educated lay people in political economy and economic history in particular and in the social sciences in general      **Security and Arms Control: A guide to international policymaking** Edward A. Kolodziej, Patrick M. Morgan, 1989 This two volume comprehensive guide is organized around the assumption that national and international security and arms control studies are interdisciplinary in nature Volume 2 clarifies and defines selected current issues and problems from an international perspective The chapters look at the scope of the emerging field of security and arms control studies as a serious field of systematic inquiry they serve as a critical review and evaluation of the most important literature within each sub field The chapters identify major problems key concepts methods disciplinary approaches intellectual styles and data sources *Security and Arms Control* Volume 2 is organized by sub field First contending contemporary perspectives on the international system itself as the source of conflict and war are presented The various facets of nuclear deterrence including implications for the possible use of nuclear weapons follow The focus then shifts to conventional military power in the system including arms transfers The incidence of subconventional or low intensity conflicts including the practice of and possible responses to terrorism is analyzed The book concludes with strategic arms

control nuclear proliferation and the study of crisis decision making Security and Arms Control Volume 2 can be used as a text as well as serving as a valuable guide to the study of international and national security and arms control Interested students and policy makers will find valuable material for their studies and research      **American Reference Books**
