Kingsland, 2005 In the 1890s several initiatives in American botany converged The creation of new institutions such as the New York Botanical Garden coincided with radical reforms in taxonomic practice and the emergence of an experimental program of research on evolutionary problems Sharon Kingsland explores how these changes gave impetus to the new field of ecology that was defined at exactly this time She argues that the creation of institutions and research laboratories coupled with new intellectual directions in science were crucial to the development of ecology as a discipline in the United States The main concern of ecology the relationship between organisms and environment was central to scientific studies aimed at understanding and controlling the evolutionary process Kingsland considers the evolutionary context in which ecology arose especially neo Lamarckian ideas and the new mutation theory and explores the relationship between scientific research and broader theories about social progress and the evolution of human civilization By midcentury American ecologists were leading the rapid development of ecosystem ecology and society in the postwar context foreshadowing the environmental critiques of the 1960s As the ecosystem concept evolved so too did debates about how human ecology should be incorporated into the biological sciences Kingsland concludes with an examination of ecology in the modern urban environment reflecting on how scientists are now being challenged to produce innovative responses to pressing problems The Evolution of American Ecology 1890 2000 offers an innovative study not only of the scientific landscape in turn of the century America but of current questions in ecological science Running Dogs and Rose's Children Eric George de Jong, *Running Dogs and Rose s Children* tell the story of how Eric and wife Jenny are plunged into parenthood after adopting three siblings aged eleven five and one after their mother died of cancer The new family set about starting over building a family life together from scratch in their rambling farmhouse outside Harare Zimbabwe Their story was on course for a happily ever after ending until their lives and the lives of those around them were destroyed by Robert Mugabe s war of terror unleashed on white farmers and opposition party members launching an era of economic social and political turmoil which eventually saw the family fleeing the country for fear of being killed Eric s fierce love of his country and his principles saw him immersing himself in the dangerous opposition politics of the day where elections were rigged and fellow party members were tortured and murdered Somehow Eric de Jong s irrepressible sense of humour bubbles throughout this absorbing honest and deeply personal account of a growing family of love entrepreneurial success and failure mental illness political exile and the distressing and often absurd collapse of a beautiful African country and stoicism of its people *The Natural History of Flowers* Michael Fogden, Patricia Fogden, 2018-09-05 Flowers have played an important role in human culture and survival for thousands of years The final
