Stone Tools Theoretical Insights Into Human Prehistory:

Stone Tools George H. Odell, 1996-01-31 Lithic analysts have been criticised for being atheoretical in their approach or at least for not contributing to the development of archaeological theory Stone Tools addresses this issue by presenting contributions that employ explicitly theoretical constructs to interpret the archaeological record Understanding Stone Tools and Archaeological Sites Brian P. Kooyman, 2000 Covers manufacturing techniques lithic types and materials reduction strategies and techniques worldwide lithic technology production variables meaning of form and usewear and residue analysis Archaeological Research Peter Peregrine, 2021-12-30 The third edition of Archaeological Research introduces the basic methods of archaeological research including data collection analysis and interpretation as well as considering the state of the field today With new sections on curating archaeological collections and public archaeology the third edition also adds a new chapter on the analysis of metals and glass This popular concise textbook examines approaches to the archaeological record sampling and research design survey and excavation methods and strategies recordkeeping dating and analysis of archaeological materials and the professional practice of archaeology Archaeological Research continues to be an excellent text for undergraduate students in basic archaeology courses field methods courses and field schools *Projectile Technology* Heidi Knecht, 2013-06-29 Artifacts linked to projectile technologies traditionally have provided the foundations for time space systematics and cultural historic frameworks in archaeological research having to do with foragers With the shift in archaeological research objectives to processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts A projectile technology was a crucial part of most foragers strategies for survival it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically Being fundamental to meat acquisition and the principal source of calories projectile technologies were typically afforded greater time investment formal modification and elaboration of attributes than others Moreover such technologies tend to display greater standardization because of constraints on size morphology and weight that are inherent to the delivery system The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies And such sensitivity is immensely valuable in archaeological research *Artifact Classification* Dwight W Read, 2016-09-16 Archaeologists have been developing artifact typologies to understand cultural categories for as long as the discipline has existed Dwight Read examines these attempts to systematize the cultural domains in premodern societies through a historical study of pottery typologies He then offers a methodology for producing classifications that are both salient to the cultural groups that produced them and relevant for establishing cultural categories and timelines for the archaeologist attempting to understand the relationship between material culture

and ideational culture of ancient societies This volume is valuable to upper level students and professional archaeologists across the discipline

In the Beginning Nadia Durrani, Brian Fagan, 2025-02-28 In the Beginning describes the basic methods and theoretical approaches of archaeology This is a book about fundamental principles written in a clear engaging style with minimal use of technical jargon which approaches archaeology from a global perspective This new edition includes new case studies and updated sections on the latest archaeological methods theories and developments in archaeological science There are heavily updated chapters on cultural resource management public archaeology and the important role of archaeology in society as well as new material on multidisciplinary research ethics diversity underwater archaeology and the preservation of the archaeological record Beginning with a broad introduction to the field this book surveys the highlights of archaeology's vibrant history then covers the basics of preservation dating the past and the context of archaeological finds Descriptions of field surveys including the latest remote sensing methods excavation and artifact analysis lead into the study of ancient environments landscapes and settlement patterns and the people of the past There is also a chapter on archaeology as a potential career In the Beginning takes the reader on an evenly balanced journey through today's archaeology and introduces them to the importance of archaeology in the modern world This well illustrated account with its numerous boxes and sidebars is laced with interesting and often entertaining examples of archaeological research from around the globe It is aimed at introductory students in archaeology and anthropology taking survey courses on archaeology as well as more advanced readers

The Lithic Assemblages of Qafzeh Cave Erella Hovers, 2009-06-09 This book presents the first comprehensive description of the lithic assemblages from Qafzeh Cave one of only two Middle Paleolithic sites in the Levant that has yielded multiple burials of early anatomically modern Homo sapiens AMHs The record from this region raises the question of possible long term temporal overlap between early AMHs and Neanderthals For this reason Qafzeh has long been one of the pivotal sites in debates on the origins of AMHs and in attempts to compare and contrast the two species adaptations and behavior Although the hominin fossils from the site were published years ago until now the associated archaeological assemblages were incompletely described often leading to conflicting interpretations This monograph includes a thorough technological analysis of the lithic assemblages incorporated in their geological and sedimentological contexts This description serves as a springboard for regional comparisons as well as a more general discussion about Middle Paleolithic behavior which is relevant to important and as yet unresolved questions on the origins of modern behavior patterns The volume includes a wide ranging and up to date bibliography that provides the middle range for discussing the ecological context and behavioral complexity of the Middle Paleolithic period and ends with some thought provoking conclusions about the dynamic human interactions that existed in the region during this time

Humans at the End of the Ice Age Lawrence Guy Straus, Berit Valentin Eriksen, Jon M. Erlandson, David R. Yesner, 2012-12-06 Humans at the End of the Ice Age chronicles and explores the significance of the variety of cultural responses to the global environmental

changes at the last glacial interglacial boundary Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch detailing the nature speed and magnitude of the human adaptations that culminated in the development of food production in many parts of the world The text is aided by vital maps chronological tables and charts The Safford Valley Grids William Emery Doolittle, James A. Neely, Karen R. Adams, 2004 Crisscrossing Pleistocene terrace tops and overlooking the Gila River in southeastern Arizona are acres and acres of rock alignments that have perplexed archaeologists for a century Well known but poorly understood these features have long been considered agricultural but exactly what was cultivated how and why remained a mystery Now we know Drawing on the talents of a team of scholars representing various disciplines including geology soil science remote sensing geographical information sciences GISc hydrology botany palynology and archaeology the editors of this volume explain when and why the grids were built Between A D 750 and 1385 people gathered rocks from the tops of the terraces and rearranged them in grids of varying size and shape averaging about 4 meters to 5 meters square The grids captured rainfall and water accumulated under the rocks forming the grids Agave was planted among the rocks providing a dietary supplement to the maize and beans that were irrigated on the nearby bottom land a survival crop when the staple crops failed and possibly a trade commodity when yields were high Stunning photographs by Adriel Heisey convey the vastness of the grids across the landscape **Lithic Technological Systems and Evolutionary Theory** Society for American Archaeology. Annual Meeting, 2015-01-22 This collection of essays brings together several different evolutionary perspectives to demonstrate how lithic technological systems are a byproduct of human behavior The essays cover a range of topics including human behavioral ecology cultural transmission phylogenetic analysis macroevolution and various applications of evolutionary ecology
