Amazon Bestseller 1 History of the Middle East and 2 Ancient Early Civilization History The Anunnaki gods from the planet Nibiru carried out a mission on Earth and the story was documented in clay tablets or Mesopotamian texts discovered in the ruins of buildings in the Middle East Scholars have proposed that some Genesis stories had already appeared in Mesopotamian texts thousands of years ago This proposal motivated us to evaluate the most relevant texts Although most scholars believe that the Mesopotamian texts are mythology the research was carried out under the premise that their content corresponds to real events Analysis of academic translations of the texts revealed that many details critical to understanding the story have not been revealed An exhaustive analysis of the data determined the most probable dates of the events The book presents the events related to the arrival of the Anunnaki to Earth and the consequences of their mission chronologically according to findings in Mesopotamian texts and ancient books Various sources including apocryphal books reports from ancient historians scientific research and archaeological records supplemented the research Many riddles were decoded including who the Anunnaki and the Igigi watchers Nephilim were Why when and how did H sapiens originate how did the other species arise and why did they become extinct Why and when did the Anunnaki arrive and finally leave Earth When will the planet Nibiru return to our area in the inner solar system The results and findings of this research deserve to be known due to the probability that the stories in the Mesopotamian texts really happened The book s proposals differ from what we have learned in educational institutions about the origin of humanity and invite critical thinking to reflect on the history of the Anunnaki gods Enthusiastic readers of the extraterrestrial theme will find innovative proposals

*Experimental Archaeology and Neolithic Architecture* John Hill,2024-03-04 Our understanding of the construction processes involved with British Neolithic architecture needs further investigation The people were preliterate and there is no archaeological evidence of written or pictorial information regarding construction So how could they build complex monuments like Stonehenge without a plan This book argues that the Neolithic builders used rudimentary techniques to plan before building their monuments circa 4000 2500 BC essentially using ropes to set out the physical design of any structure they intended to build whilst finger reckoning numeracy dictated how their measured ropes were folded to position the monument s features Finally they used the sun s shadow at midday to achieve orientation To support this premise the book offers both the results of the author s rope experiments and instructions for repeating them Importantly this form of experimental archaeology delivers a unique approach for understanding the nature of complex Neolithic architecture Essentially the book explains the mental processes involved between design and construction

*Druid History, Mysticism, Rituals, Magic, and Prophecy* Martin K. Ettington,2022-08-11 The history of the Druids has always fascinated me My first interest was reading as a child about Merlin the Magician who was also a Druid Then I learned they were the ancient priests of the Celts and had a deep history in the British Isles My family is also from Scotland and Northern Ireland so it makes me wonder if I have some Druidic ancestry too Recently I wrote a book about the

Mythical people of Ireland and it also included materials about the Tuatha Da Dannan who in many mythical histories were also forerunners of the Druids. Druids were also well known for their mystical prophecy and healing abilities. Being a student of the Paranormal and Spiritual this also holds a serious interest for me. In this book we will go through my research on Druid history, festivals, rituals, herbs, alphabets, magic, and much more. Some Druidic rituals and exercises are also included. In fact, Druidism seems to be the source of many modern approaches to witchcraft and magic.

Struik, 2012-06-28. This compact well-written history, first published in 1948 and now in its fourth revised edition, describes the main trends in the development of all fields of mathematics from the first available records to the middle of the 20th century. Students, researchers, historians, specialists, in short everyone with an interest in mathematics will find it engrossing and stimulating. Beginning with the ancient Near East, the author traces the ideas and techniques developed in Egypt, Babylonia, China, and Arabia, looking into such manuscripts as the Egyptian Papyrus Rhind, the Ten Classics of China, and the Siddhantas of India. He considers Greek and Roman developments from their beginnings in Ionian rationalism to the fall of Constantinople, covers medieval European ideas and Renaissance trends, analyzes 17th and 18th-century contributions, and offers an illuminating exposition of 19th-century concepts. Every important figure in mathematical history is dealt with: Euclid, Archimedes, Diophantus, Omar Khayyam, Boethius, Fermat, Pascal, Newton, Leibniz, Fourier, Gauss, Riemann, Cantor, and many others. For this latest edition, Dr. Struik has both revised and updated the existing text and also added a new chapter on the mathematics of the first half of the 20th century. Concise coverage is given to set theory, the influence of relativity and quantum theory, tensor calculus, the Lebesgue integral, the calculus of variations, and other important ideas and concepts. The book concludes with the beginnings of the computer era and the seminal work of von Neumann, Turing, Wiener, and others. The author's ability as a first-class historian as well as an able mathematician has enabled him to produce a work which is unquestionably one of the best. *Nature Magazine* [Literature 1984, Part 2](#) S.
