introduction to Stonehenge and its landscape and an introduction to archaeoastronomy the study of how ancient peoples understood phenomena in the sky and what role the sky played in their cultures Archaeoastronomy is a specialism critical to explaining the relationship of Stonehenge and nearby monuments to the heavens but interpreting archaeoastronomical evidence has often proved highly controversial in the past Stonehenge Sighting the Sun explains why It makes clear which ideas about Stonehenge are generally accepted and which are not with clear graphics to explain complicated concepts This beautifully illustrated book shines new light on this most famous of ancient monuments and is the first in depth study of this fascinating topic suitable both for specialists and for anyone with a general interest The volume includes a Foreword by British archaeologist and academic Professor Sir Barry Cunliffe
