Searcy, 2011-05-15 In The Life Giving Stone Michael Searcy provides a thought provoking ethnoarchaeological account of metate and mano manufacture marketing and use among Guatemalan Maya for whom these stone implements are still essential equipment in everyday life and diet Although many archaeologists have regarded these artifacts simply as common everyday tools and therefore unremarkable Searcy s methodology reveals how for the ancient Maya the manufacture and use of grinding stones significantly impacted their physical and economic welfare In tracing the life cycle of these tools from production to discard for the modern Maya Searcy discovers rich customs and traditions that indicate how metates and manos have continued to sustain life not just literally in terms of food but also in terms of culture His research is based on two years of fieldwork among three Mayan groups in which he documented behaviors associated with these tools during their procurement production acquisition use discard and re use Searcy s investigation documents traditional practices that are rapidly being lost or dramatically modified In few instances will it be possible in the future to observe metates and manos as central elements in household provisioning or follow their path from hand manufacture to market distribution and to intergenerational transmission In this careful inquiry into the cultural significance of a simple tool Searcy s ethnographic observations are guided both by an interest in how grinding stone traditions have persisted and how they are changing today and by the goal of enhancing the archaeological interpretation of these stones which were so fundamental to pre Hispanic agriculturalists with corn based cuisines      Stones, Their Collection, Identification, and Uses Richard Vincent Dietrich, 1980
