*Stones, Bones, and Ancient Cities* Lawrence H. Robbins, 1990 The author details several dozen great discoveries including King Tutankhamen's tomb in the Valley of the Kings the Rosetta Stone the long sought after key to Egyptian hieroglyphics China's buried clay army of Qin Shi Huang and the lost cities of Troy and Herculaneum **Stones, Bones, and Ancient Cities** Lawrence H. Robbins, 1990 Describes the explorations excavations and triumphs of the men and women responsible for forty great archaeological discoveries from Schliemann's Troy to the Rosetta Stone to Leakey's finds at Olduvai Gorge A Chaos of Delight Geoffrey Dobson, 2016-06-16 Humans throughout history have sought ways of understanding their place within the world Religion science and myth have been at the forefront of this quest for meaning A Chaos of Delight examines how various cultures from the early Sumerians Egyptians and Greeks to contemporary Western society have looked at the same phenomena and devised totally different world views The rise of modern science is examined alongside questions of evolution and the origins of life This comprehensive volume is an essential read for students and scholars interested in the history of ideas and the role of religion science and myth in the development of Western thought

**Reading Programs for Young Adults** Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs **Astronomy Across Cultures** Helaine Selin, 2012-12-06 Astronomy Across Cultures A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups The Corpse Christine Quigley, 1996-01-01 Throughout the centuries different cultures have

established a variety of procedures for handling and disposing of corpses. Often the methods are directly associated with the deceased's position in life such as a pharaoh's mummification in Egypt or the cremation of a Buddhist. Treatment by the living of the dead over time and across cultures is the focus of study. Burial arrangements and preparations are detailed including embalming, the funeral service, storage and transport of the body and forms of burial. Autopsies and the investigative process of causes of deliberate death are fully covered. Preservation techniques such as cryonic suspension and mummification are discussed as well as a look at the recycling of the corpse through organ donation, donation to medicine, animal scavengers, cannibalism, and of course natural decay and decomposition. Mistreatments of a corpse are also covered.

Renowned archaeologist Patrick Hunt brings his top ten list of ancient archaeological discoveries to life in this concise and captivating book. **Anil's Ghost** Michael Ondaatje, 2010-10-08. Winning a Governor General's Literary Award for Fiction, the Kiriyama Pacific Rim Book Prize, and the Scotiabank Giller Prize, *Anil's Ghost* is another award-winning novel from Michael Ondaatje. Steeped in centuries of cultural achievement and tradition, Sri Lanka has been ravaged in the late twentieth century by bloody civil war. Anil Tissera, born in Sri Lanka but educated in England and the U.S., is sent by an international human rights group to participate in an investigation into suspected mass political murders in her homeland. Working with an archaeologist, she discovers a skeleton whose identity takes Anil on a fascinating journey that involves a riveting mystery. What follows is a novel rich with character, emotion, and incident, a story about love and loss, about family, identity, and the unknown enemy. And it is a quest to unlock the hidden past. Like a handful of soil analyzed by an archaeologist, the story becomes more diffuse the farther we reach into history. A universal tale of the casualties of war unfolding as a detective story, the book gradually gives way to a more intricate exploration of its characters, a symphony of loss and loneliness haunted by a cast of solitary strangers and ghosts. The atrocities of a seemingly futile, muddled war are juxtaposed against the ancient, complex, and ultimately redemptive culture and landscape of Sri Lanka.
