Kuczaj, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in develop mental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive devel opment is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series

Metalinguistic Awareness in Children W.E. Tunmer,J. Bowey,C. Pratt,R. Grieve,M. Herriman,M. Myhill,A.

Nesdale,2013-03-07 In the past fifteen years there has been a growing interest in the development of children s awareness of language as an object in itself a phenomenon now generally referred to as metalinguistic awareness Until the publication of an earlier volume in the Springer Series in Language and Communication The Child s Conception of Language edited by A Sinclair R J Jarvella and W J M Levelt there had been no systematic treatment of metalinguistic awareness The major goal of

that volume was to map out the field of study by describing the phenomenon of interest and defining major theoretical issues. The aim of the present volume is to present an overview of metalinguistic awareness in children which reflects the current state of research and theory. The volume is divided into three major sections. The first considers various conceptual and methodological issues that have arisen from efforts to study metalinguistic awareness. It addresses such questions as what is metalinguistic awareness when does it begin to emerge and what tasks and procedures can be employed to assess its development in young children. The second section critically reviews the research that has been conducted into the four general types of metalinguistic awareness: phonological, word, syntactic and pragmatic awareness. In the final section the development of metalinguistic awareness is examined in relation to general cognitive development, reading acquisition, bilingualism and early childhood education.

Resources in Education, 1998 *An Open Book: What and How Young Children Learn From Picture and Story Books* Jessica S. Horst, Carmel Houston-Price, 2016-01-21 Looking at and listening to picture and story books is a ubiquitous activity frequently enjoyed by many young children and their parents. Well before children can read for themselves they are able to learn from books. Looking at and listening to books increases children's general knowledge, understanding about the world and promotes language acquisition. This collection of papers demonstrates the breadth of information pre-reading children learn from books and increases our understanding of the social and cognitive mechanisms that support this learning. Our hope is that this Research Topic eBook will be useful for researchers as well as educational practitioners and parents who are interested in optimizing children's learning.

Development of Emotional Competence in Young Children Susanne A. Denham, 2023-02-14 This engaging authoritative text synthesizes a vast body of research on how young children develop the ability to understand, express and manage their emotions as well as the impact of these capacities on relationships, school readiness and overall well-being. Illustrated with vivid vignettes, the book explains specific ways that parents, teachers and education systems can foster or hinder emotional competence and reviews relevant assessments and interventions. Compelling topics include emotion regulation as both product and process, cultural variations in emotion socialization, the expression of empathy and self-conscious emotions, risk factors for delays in emotional development and connections between emotional competence and social-emotional learning (SEL). Almost entirely new, this book replaces Susanne A. Denham's influential earlier work *Emotional Development in Young Children*.
