## **Storks Ibises And Spoonbills Of The World:**

**Storks, Ibises and Spoonbills of the World** James Hancock, James A. Kushlan, M. Philip Kahl, 2010-09-30 Everything you ever wanted to know about storks ibises and spoonbills Some of the world's largest and most spectacular birds are to be found among this group of wading birds Tragically they also include many of the world's most endangered species as changes in land use erode their wetland habitats Some like the White Stork have lived alongside humans for hundreds of years and are well known from numerous studies Others like the Storm's stork and ibises of West Africa South East Asia and South America live so secluded a life in the remote corners of the globe that they will probably be extinct before even the most basic details of their biology are known In this monograph three authors and two artists have combined their skills to capture what is known of this group of wading birds The text opens with general chapters on taxonomy and feeding breeding and behaviour followed by detailed coverage of each species     Waterbirds Around the World G. C. Boere, Colin A. Galbraith, David A. Stroud, 2006 This book is the outcome of a major international conference on waterbirds held in Edinburgh in April 2004     **The Painted Stork** A. J. Urfi, 2011-07-15 The book will cover the entire range of the Painted Stork beyond its stronghold in India and Sri Lanka to other countries E Asia as well For the sake of comparison relevant information will be included about the other species of storks both solitary as well as colonial of Asia as well as those in other parts of the world Certainly plenty of references will be made about the work done on the American Wood Stork Studies are underway in order to better understand the role of the monsoon rains on the nesting pattern of Painted Stork besides attempting a review of the global status of the species The former is likely to be of interest in augmenting our understanding about how global climate change is going to affect birds across India and the second is likely to raise interesting points about the distribution of species and their ranges Both these studies will be carried through 2009 and should hopefully be included in the proposed book Naturally the focused interest in field research on the Painted Stork has resulted in accumulation of considerable information on this particular species which is beyond the information contained on some standard Indian and international works and ornithological texts The author hopes to include the entire spread of information of this species from its systematics evolution distribution ecology to its role in human culture as well as its association with mythologies In other words topics have not been restricted to the areas of the author's research but have spilled over into areas of anthropology ecology conservation etc     **The Painted Stork** Abdul Jamil Urfi, 2024-01-16 A charismatic and arresting bird the Painted Stork inhabits the plains and wetlands of India and Southeast Asia This near threatened species provides a good model through which to explore a variety of ecology and conservation issues As a colonial nester it is also useful for considering questions related to evolution and the development of avian coloniality The Painted Stork sometimes nests opportunistically in the middle of large cities the Delhi Zoo colony for instance has been active since 1960 This offers a splendid opportunity to study the species at close range as attested by this book's lively photographic component The Painted Stork is an important

indicator of its wetland habitats which themselves are highly threatened Since environmental toxins particularly organochlorine pesticides travel rapidly along aquatic food chains the study of piscivorous birds like the Painted Stork assumes special significance Equally vulnerable today are the nesting colonies located in marshes village reservoirs and the wider countryside including in urban settings Perhaps because their natural nesting areas are becoming scarce due to habitat loss colonial waterbirds look for suitable sites in parks and gardens Hence the behaviour of this species reflects changes occurring in its environment Birds also help us monitor the effects of global climate change and one of the most significant dimensions of the Painted Stork is its dependence upon the monsoon How exactly do these seasonal rains govern the food cycles in wetlands And what happens when the monsoon fails Covering all aspects of Painted Stork ecology behaviour conservation and its relationship with humans this accessible monograph contains a wealth of new insights

**Animals and the Environment in Turkish Culture** Kim Fortuny, 2019-08-22 Landscape and animals have been fundamental elements of Turkish culture from the Ottomans to the present day This book examines representations of and attitudes toward land and animals in selected Turkish literary texts and cultural contexts Informed by global debates in ecocriticism ecopoetics and animal studies Kim Fortuny explores literary and arts activism as well as environmental interventions in the Turkish cultural sphere in light of ongoing ecological degradation in Turkey Writers from the Turkish canon such as Ahmet Hamdi Tanpınar and Nâzım Hikmet are explored alongside American and English texts to reveal common transnational environmental and ecological concerns across these distinct literary cultures Analysing works of Turkish literature within the emerging field of ecocriticism this interdisciplinary work will be of interest to scholars of Turkish and comparative literature and animal studies and ecocriticism across the humanities *Common Coastal Birds of Florida and the Caribbean* David W.
