Storm Warnings Science Fiction Confronts The Future:

Exploring the Next Frontier Matthew Wilhelm Kapell, 2016-02-19 The 1960s and early 70s saw the evolution of Frontier Myths even as scholars were renouncing the interpretive value of myths themselves Works like Joe Haldeman's *The Forever War* exemplified that rejection using his experiences during the Vietnam War to illustrate the problematic consequences of simple mythic idealism Simultaneously Americans were playing with expanded and revised versions of familiar Frontier Myths though in a contemporary context through NASA's lunar missions *Star Trek* and Gerard K O'Neill's *High Frontier* This book examines the reasons behind the exclusion of Frontier Myths to the periphery of scholarly discourse and endeavors to build a new model for understanding their enduring significance This model connects NASA's failed attempts to recycle earlier myths wholesale to *Star Trek*'s revision of those myths and rejection of the idea of a frontier paradise to O'Neill's desire to realize such a paradise in Earth's orbit This new synthesis defies the negative connotations of Frontier Myths during the 1960s and 70s and attempts to resuscitate them for relevance in the modern academic context

Hollywood Presents Jules Verne Brian Taves, 2015-05-26 An illuminating look at how filmmakers have taken us around the world under the sea and to the center of the earth over the course of a century *Milwaukee Express* Even for those who have never read Jules Verne the author's very name conjures visions of the submarine in *Twenty Thousand Leagues Under the Sea* the epic race in *Around the World in Eighty Days* the spacecraft in *From the Earth to the Moon* and the daring descent in *Journey to the Center of the Earth* One of the most widely translated authors of all time Verne has inspired filmmakers since the early silent period and continues to fascinate audiences more than a century after his works were first published His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions In *Hollywood Presents Jules Verne* Brian Taves investigates the indelible mark that the author has left on English language cinema Adaptations of Verne's tales have taken many forms early movie shorts serials feature films miniseries and television shows and have been produced as both animated and live action films Taves illuminates how as these stories have been made and remade over the years each new adaptation looks back not only to Verne's words but also to previous screen incarnations He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo and how these figures are treated in pastiches such as *Journey 2: The Mysterious Island* Investigating the biggest box office hits as well as lower budget productions this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever-changing relationship between literature theater and film *Global Environmental Risk* Jeanne X. Kasperson, Roger E. Kasperson, 2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing ongoing destructive activities and creating a life-sustaining planet This book takes stock of the distinctive challenges posed

by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention turns on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that pertain to the particular societies locales and regions that will ultimately bear the risk

The Literature of Hope in the Middle Ages and Today Flo Keyes, 2006-03-31 The influence of medieval literature is instantly apparent in modern fantasy literature where knights and wizards populate castle strewn landscapes Less obvious but still recognizable is the influence in science fiction which draws on medieval story structure and themes Beyond these superficial similarities deeper connections become evident through an analysis of the literature's social function Like the fantasy and science fiction of today the romances of the Middle Ages were written in times of extreme and prolonged social upheaval In all three genres the storytellers draw on the same archetypes the hero the quest the transformation for stories whose goal is to provide hope Using Jungian theory and comparative analysis this book explores the connections between the three genres It finds common ground among them in plots that often reflect the recurring cycle of life and the elements of psychological rather than literal realism Representative texts such as Malory's *Le Morte D Arthur* the *Witch World* series by Andre Norton and *More Than Human* by Theodore Sturgeon are examined in depth and the use of archetypes in each is thoroughly explored Analysis reveals similarities in images structures and the pervasive belief that a perfectible universe is within man's capabilities if not now then someday

Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith 2001 *A Space Odyssey* and its sequels Japanese anime and Hong Kong cinema and electronic fiction

Science Fiction and Empire Patricia Kerslake,2007-04-01 This book is about the human desire to experiment with
empire In the past it was done with real soldiers and expeditions and slaves and trade and misery and force In the future it
will be done with generation ships and off world pioneers robots and invasion electronic sheep and people who just don t
want to be pushed around any more Beginning with a discussion of who we are hopefully the good guys and who they are
anyone who isn t us this narrative scans the lights of science fiction looking at the places where humans try to touch a variety
of futures Is SF designed to purge our dark imperialistic fantasies or is it a laboratory of mind experiments carefully
considered trials of political social and economic scenarios Which tomorrow are we more likely to accept where the blood of
empire is red or read Examining such classic SF texts as Lasswitz s Two Planets and Wells The War of the Worlds this book
investigates Asimov s Robots and Heinlein s Moon as well as Robinson s Mars and Banks postcolonial Culture We see the rise
and fall of empire through the eyes of Miller Clarke and Wyndham and the apparently inevitable failure of the imperial
project as discussed in Solaris The Dispossessed and The Forever War This book offers an insight into the darkest power
abuses of mankind where the oppression silencing and marginalisation of those who are not us continues and flourishes Who
are the monsters of our future the Others invading from another planet or the unseen and unrecognised Other within
