*Historical Dictionary of Polynesia* Robert D. Craig, 2011 The term Polynesia refers to a cultural and geographical area in the Pacific Ocean bound by what is commonly referred to as the Polynesian Triangle which consists of Hawai'i in the north New Zealand in the southwest and Easter Island in the southeast Thousands of islands are scattered throughout this area most of which are currently included in one of the modern island states of American Samoa Cook Islands French Polynesia Hawai'i New Zealand Samoa Tonga Tokelau Tuvalu and Wallis and Futuna The third edition of the *Historical Dictionary of Polynesia* greatly expands on the previous editions through a

chronology an introductory essay an expansive bibliography and over 400 cross referenced dictionary entries on significant persons events places organizations and other aspects of Polynesian history from the earliest times to the present Appendixes of the major islands and atolls within Polynesia the rulers and administrators of the 13 major island states and basic demographic information of those states are also included      *Discovery and Empire* John West-Sooby,2013 The French connection with the South Seas stretches back at least as far as the voyage of Binot Paulmier de Gonneville 1503 1505 who believed he had discovered the fabled great south land after being blown off course during a storm near the Cape of Good Hope The story of his voyage remained largely forgotten for over 150 years but eventually resurfaced in 1664 thanks to the publication by the Abbe Jean Paulmier of a document in which he argued on the basis of this supposed discovery for the establishment of a Christian mission in this third part of the world While historians today contest the authenticity of various aspects of the Abbe Paulmier s Memoires there is no doubt about the impact it had in France both on the collective imagination and more concretely on French plans for exploration and colonial expansion It was not until the eighteenth century however that France began sending mariners to the southern oceans on a regular basis and by that time a new maritime power had begun to emerge Great Britain Together these two nations would play a decisive role in determining the configuration of these little known parts of the globe and particularly of the Pacific which had for so long been the almost exclusive preserve of Spain From the Introduction by John West Sooby DISCOVERY AND EMPIRE is a collection of essays originating out of a symposium that was held at the State Library of South Australia on 8 July 2009 The symposium formed one of the strands of the XVIIth Biennial Conference of the Australasian Association of European Historians 6 9 July 2009 the overall theme for which was Europe s Expansions and Contractions      **Science, Voyages, and Encounters in Oceania, 1511-1850** Bronwen Douglas,2014-03-26 Blending global scope with local depth this book throws new light on important themes Spanning four centuries and vast space it combines the history of ideas with particular histories of encounters between European voyagers and Indigenous people in Oceania Island Southeast Asia New Guinea Australia New Zealand and the Pacific Islands      **In Search of Jeanne Barret: The Woman who Sailed the World** Danielle Clode,2023-08-26 When the first woman to circumnavigate the world completed her journey in 1776 she returned home without any fanfare at all Jeanne Barret an impoverished peasant from Burgundy disguised herself as a man and sailed on the 1766 Bougainville voyage as the naturalist s assistant For over two centuries the story of who this young woman was why she left her home to undertake such a perilous journey and what happened when she returned has been shrouded in uncertainty Biologist and award winning author Danielle Clode embarks on a journey to solve the mysteries surrounding Jeanne Barret The result is an ode to the sea to science and to one remarkable woman who like all explorers charted her own course for others to follow      **Where Fate Beckons** John Dunmore,2010-01-20 French explorer and naval officer Jean Franois de la Prouse 1741 88 was after James Cook the greatest explorer of the Pacific in the eighteenth century In 1785 La Prouse was commissioned by

*The Giant Squid in Transatlantic Culture* Otto Latva, 2023-09-30 This book builds upon the extensive study of the historical relationship between sea animals and humans in transatlantic culture during the eighteenth and nineteenth centuries It exposes the present understanding of the human relationship with the giant squid not only as too simplistic but also as historically inaccurate For instance it redefines the earlier understanding that humans and especially seafarers have understood giant squid as horror evoking and ugly creatures since the dawn of history and explains the origins of mythical sea monsters such as the Kraken The book is however more than a critical response to previous work It will point out that animals such as cephalopods which have largely been defined in biological contexts in recent times have a fascinating and

multivariate past entangled with the history of humans in many remarkable ways Hence this book is not just about perceptions of giant sized squid or cephalopods but a historical inquiry into the transatlantic culture from the late eighteenth century to the turn of the twentieth century It will provide new knowledge about the history of mollusc studies seafaring culture and more broadly of the relationship between humans and animals during the period *Strangers in the South Seas* Richard Lansdown,2006-04-30 Long before Magellan entered the Pacific in 1521 Westerners entertained ideas of undiscovered oceans mighty continents and paradisaal islands at the far ends of the earth First set down by Egyptian storytellers Greek philosophers and Latin poets such ideas would have a long life and a deep impact in both the Pacific and the West With the discovery of Tahiti in 1767 another powerful myth was added to this collection the noble savage For the first time Westerners were confronted by a people who seemed happier than themselves This revolution in the human sciences was accompanied by one in the natural sciences as the region revealed gaps and anomalies in the great chain of being that Charles Darwin would begin to address after his momentous visit to the Galapagos Islands The Pacific produced similar challenges for nineteenth century researchers on race and culture and for those intent on exporting their religions to this immense quarter of the globe Although most missionary efforts ultimately met with success others ended in ignominious retreat As the century wore on the region presented opportunities and dilemmas for the imperial powers leading to a guilty desire on the part of some to pull out along with an equally guilty desire on the part of others to stay and help This process was accelerated by the Pacific War between 1941 and 1945 After more than two millennia of fantasies the story of the West's fascination with the insular Pacific graduated to a marked sense of disillusion that is equally visible in the paintings of Gauguin and the journalism of the nuclear Pacific *Strangers in the South Seas* recounts and illustrates this story using a wealth of primary texts It includes generous excerpts from the work of explorers soldiers naturalists anthropologists artists and writers some famous some obscure It begins in 1521 with an account of Guam by Antonio Pigafetta one of the few men to survive Magellan's circumnavigation voyage and ends in the late 1980s with the writing of an American woman Joana McIntyre Varawa as she faces the personal and cultural insecurities of marriage and settlement in Fiji It shows how the Great South Sea has been an irreplaceable distant mirror of the West and its intellectual obsessions since the Renaissance Comprehensively illustrated and annotated this anthology will introduce readers to a region central to the development of modern Western ideas This is a carefully conceived anthology covering an excellent range of subjects The selections are well chosen and interesting and the introductory materials are both scholarly and accessible It should be widely used in university courses dealing with almost any aspect of the Pacific Rod Edmond University of Kent at Canterbury *Falklands or Malvinas* Manuel Pedro Peña,Juan Ángel Peña,2017-11-20 Historical analysis with the intention of providing the reader with judicial arguments and facts necessary to determine through an objective analysis who are the rightful owners of the Falkland Islands regardless of the current state of occupation *From Venus to Antarctic* John Dunmore,2010-11-07 High

adventure drama discovery science and map making This is the first ever full length English language biography of D Urville one of the nineteenth century s great explorers Bad tempered and irreverent D Urville was loved by his men but hated by his superiors He didn t care either way His passion for science drove him forward as he explored the Pacific from Guam to Antarctica and from New Guinea to Chile collecting a vast number of natural history specimens and recording extensive hydrographical information Hobart was frequently a base and D Urville is credited with making the single greatest contribution to perfecting the map of the Pacific He was not consumed with French colonial arrogance often preferring the societies he visited to his own He was however given the prestigious French Legion of Honour He is often remembered for arranging the purchase of the famous statue Venus De Milo whose arms were broken off in the battle to get her to Paris His life ended in a railway accident in 1842
