latinoamericana a España como parte de la misma realidad y cultura jurídica como a los numerosos países de Europa que se integran en EFELA *Oportunidades: emprendimiento verde, social y tecnológico* Francisco Blanco Jiménez, Alberto Romero Ania, Diana Gómez Fidalgo, Alberto Vizcaíno López, 2016-02-16 En este libro analizamos las oportunidades para emprender en los sectores ambiental, social y de las tecnologías de la información y comunicaciones que se han visto afectados por profundos cambios demográficos y sociales legislativos y tecnológicos. En el primer y segundo capítulo examinamos las características del emprendimiento verde. La forma de entender el medio ambiente ha evolucionado mucho en los últimos años, generando nuevas oportunidades de actividad económica. La legislación ambiental también ha cambiado por un lado, ofreciendo mecanismos de información al consumidor sobre el comportamiento ambiental de aquello que compra y, por otro lado, tiende a hacer efectivo el principio de quien contamina paga y repara. Se liberaliza la puesta en marcha de negocios a cambio de una mayor responsabilidad del empresario que debe velar por la preventión y asumir el coste de las reparaciones de los posibles daños al medio ambiente que cause su actividad. *Oportunidades de emprendimiento verde*

El cambio climático y el sector energético Diego Fernando Otero Prada,2023-06-16 Este libro presenta una discusión sobre temas que tienen que ver con el cambio climático y el sector energético centrado en Colombia y además se introducen discusiones sobre los modelos de desarrollo y la ecología El principal mensaje es que no se puede confundir a Colombia con el resto del mundo por las especificidades del país a diferencia de los países desarrollados El principal argumento es que en Colombia el sector el petróleo

emite pocos gases de efecto invernadero un 4 5% del total mientras que el sector agropecuario y el uso del suelo explican 45% en especial la deforestación con un 20% De ah que los esfuerzos deben dedicarse a los sectores donde se causan más emisiones de gases de efecto invernadero Se critica el énfasis en el sector eléctrico cuando aquí no es el problema ya que la generación de energía eléctrica es 70% producida por hidroeléctricas por lo cual centrarse en energía solar y eólica es exagerado Se argumenta que el país debe tener una política industrial basada en el sector energético para que no se siga dependiendo tecnológicamente del exterior cuando podría pensarse en tener fibras de paneles solares y aerogeneradores Enfatiza que hay que usar el potencial hidroeléctrico de Colombia que es enorme Se analiza el consumo de energía por sectores mostrando que se exagera también el efecto del sector transporte en las emisiones que explica el 15% de las mismas cuando en los países desarrollados es más del 30% y que la electrificación del transporte es un objetivo de muchas Define que hay que eliminar el consumo de combustible y de carbón en forma inteligente y sin causar desequilibrios económicos jurídicos y sociales Finaliza con una análisis de la compra de ISA empresa de transmisión de energía eléctrica de alto voltaje por Ecopetrol y desenmascara todos los argumentos equivocados que se dieron para justificar esta compra [Libros españoles en venta](#), 1995 *Introducción a la química y el ambiente* Pérez Salazar, Salvador Mosqueira, 2020-06-02 Introducción a la química y el ambiente
