Earth Ways Gary Backhaus, John Murungi, 2004-01-01 How do you connect the discipline of anthropology to both philosophy and geography What about history sociology and other applied and theoretical forms of knowledge In *Earth Ways Framing Geographical Meanings* Gary Backhaus and John Murungi challenge contributors to find the organizing component or framings that enables them to bridge their own work to philosophy and geography What emerges are truly creative contributions to interdisciplinary thought

Dangers in the Incommensurability of Globalization Gary Backhaus, John Murungi, 2009-03-26 The thesis of incommensurability concerns the interrelation between subjective culture and objective culture through which the constitutive agency of chaos incommensurability emerges The objectifications products the constituents of objective culture carry their own Being and this Being transcends the original subjective expressivities intentions The constitutive agency of this incommensurable interrelation becomes apparent in an age of globalization where its effects become global bringing about dangerous socio political volatilities To illustrate global warming has been neither the expressive intention of subjective culture nor a constituent of energy per se as an objectivated product in the context of objective culture It emerges in the interrelation an unforeseen incommensurability a chaos in the culture of

energy that threatens the globe world in various ways Incommensurability the cultural form of chaos is recognized as dramatically foiling human instrumental rationality spoiling its hubris or belief in its own progress The doctrine of incommensurability shows that we can not know what we are doing while we are doing it for the empirical manifestations of chaos are only knowable after the fact and its effects are unpredictable This book of essays is divided into two parts the first dealing with contemporary themes in subjective culture and the second with those in objective culture A few of the pressing topics treated in this volume are abstracted information of a computer based society versus locally based grounded knowledge abstracted neo liberal economics versus place grounded economics the geo politics of peak oil and the intensification of natural disasters as a consequence of global warming reveal the tenuous character of the contemporary world
