Leenaars, 2013-02-01 Treatment of suicidal people takes three forms prevention strategies to avert conditions leading to suicide intervention treatment and care during the crisis and postvention response after the event has occurred. Unlike other current literature here the focus is on the state of the art of intervention. This type of examination is essential because suicidal people themselves are in need of such treatments crisis intervention psychotherapy psychopharmacology and hospitalization. Written by professionals in the field the *Treatment of Suicidal People* allows readers to participate in a learning experience. First is a case presentation of an individual Arthur Inman and his long road toward suicide as chronicled in his personal diary. The second section puts forth guidelines for the evaluation of suicide risk and crisis intervention. A focus on more sustained efforts in psychotherapy is next a theme which is continued in the fourth part by addressing psychiatric issues that are essential for treatment of highly disturbed and lethal patients. The following section examines a number of clinical and legal issues that transcend any one population of suicidal people and any particular treatment approach or context. And lastly the volume returns to Arthur Inman with case consultations providing alternative perspectives and recommendations on his treatment.
