Portland OR *The National Security Constitution* Harold Hongju Koh,1990-01-01 Discusses the Iran Contra affair and its implications *The National Security Constitution in the Twenty-First Century* Harold Hongju Koh,2024-06-25 A deeply researched fully updated edition of *The National Security Constitution* that explores the growing imbalance of institutional powers in American foreign affairs and national security policy Since the beginning of the American Republic a package of norms has evolved in the U S Constitution to protect the operation of checks and balances in national security policy This *National Security Constitution* promotes shared powers and balanced institutional participation in foreign policymaking Today it is under attack from a competing claim of executive unilateralism generated by recurrent patterns of presidential activism congressional passivity and judicial tolerance This dynamic has pushed presidents of both parties to press the limits of law in foreign affairs In his award winning *National Security Constitution* 1990 Harold Hongju Koh traced the evolution of this constitutional struggle across America s history This new book based on the earlier volume but with roughly 70 percent new material brings the story to the present placing recent events into constitutional perspective Reviewing the presidencies of the twenty first century he explains why modern national security threats have given presidents of both parties incentives to monopolize foreign policy decision making Congress incentives to defer and the courts reasons to rubber stamp Koh suggests both a workable strategy and crucial prescriptions to restore the balance of our constitutional order in addressing modern global crises *Richard M. Nixon and European Integration* Joseph M. Siracusa, Hang Thi Thuy Nguyen,2018-04-13 This book re examines the Nixon administration s attitude and approach to the European integration project The formulation of US policy towards European integration in the Nixon presidential years 1969 1974 was conditioned by the perceived relative decline of the United States Western European emergence and competition the feared Communist expansionism and US national interests Against that backdrop the Nixon administration saw the need to re evaluate its policy on Western Europe and the integration process on this continent Underpinning this study is the extensive use of newly released archival materials from the Nixon Presidential Library and Museum the Library of Congress and the State Department Furthermore the work is based on the public papers in the American Presidency Project and the materials on the topic of European integration and unification in the Archive of European Integration Finally the study has extensively used newspaper archives as well as the declassified online documents memoirs and diaries of former US officials Mining these sources made it possible to shed new light on the complexity and dynamism of the Nixon administration s policy towards European integration **The Destruction of a Nation** George Wright,1997 In this thorough examination of US policy towards Angola from 1945 up to the present George Wright assesses how each President from Truman to Clinton has carried out US foreign policy in general and in Angola specifically in a step by step case study that traces the dismantling of a Marxist regime by the West Wright demonstrates the influence that policy planning organisations have in determining foreign policy and emphasizes the internal debates and struggles inherent in carrying out foreign policy This well researched and well

documented book is an invaluable critique of US intervention in a Third World state over five decades before and after the end of the Cold War

National Security : Emerging Dimensions and Threats Navniit Gandhi, 2010 There is a visible change in the outlook towards security all over the world probably because of the increasing complexity of global problems and their repercussions for millions of people all over the world Insecurity is not just all pervasive but is reiterating its alarming overtones more forcefully than during the cold war era There are now threats very different from a military attack on a nation's territory The concept of National Security hence needs to be redefined The gamut of its perceptions has undergone a paradigm shift The context against which the policy makers seek to establish national security is undergoing tumultuous changes While not downplaying the relevance of strategic means of maintaining national security this book explores the emerging non strategic threats to national security with the obvious grave consequences on human security This book attempts to address several questions Can the concepts of National Security and Human Security be reconciled meaningfully Can their approaches and objectives be intertwined so that we can live a fuller life Can the nations and citizenry both feel equally secure at the same time

Presidential Doctrines Robert P. Watson, Charles Gleek, Michael Grillo, 2003 The first presidential doctrine was announced by President James Monroe on 2 December 1823 during his seventh annual message to Congress An international version of this phenomenon would be Winston Churchill's Iron Curtain speech Such was also the case when President George W Bush addressed the nation in the immediate aftermath of the 9/11 terrorist attacks This book examines American national security policies in the 20th century the century in which America rose to superpower or hyperpower status The same policies will probably determine how long she holds such a powerful position

The American Trajectory David Ray Griffin, 2018-08-05 In *The American Trajectory* Divine or Demonic David Ray Griffin traces the trajectory of the American Empire from its founding through to the end of the 20th century A prequel to Griffin's *Bush and Cheney* this book demonstrates with many examples the falsity of the claim for American exceptionalism a secular version of the old idea that America has been divinely founded and guided Supported by extensive research Griffin thoroughly debunks the myth of an American Empire as a benign exceptionalist divinely ordained historical agent Instead of Manifest Destiny what reality based Griffin charts is the malign ways of US foreign policy since the 19th century a trajectory founded by slavery and genocide of indigenous peoples and then imperially expanded non stop Malign happens to be a term currently very much in vogue across the Beltway but always to designate US competitors Russia and China Griffin consistently challenges Beltway gospel demonstrating that if the US had not entered WWI there may have been no WWII He unmasks the lies surrounding the true story of the Pearl Harbor attacks He asks If the US was really guided by God how could it choose to bomb Hiroshima and Nagasaki knowing that the atomic bombs were not necessary to end the war Griffin also shows how the Cold War was actually conceptualized several years before the 1950 National Security Council paper 68 NSC 68 He revisits the origins of irrational hatred of Iran the demonization of Cuba the lies surrounding the Vietnam debacle

the false flags across Europe via Operation Gladio the destruction of Yugoslavia the decades long evisceration of Iraq and the ramifications of the Full Spectrum Dominance doctrine This sharp concise history of the American Empire ultimately demonstrates in Griffin s analysis the fraud of endorsing self praising American Exceptionalism A must read Pepe Escobar Asia Times Hong Kong
