## **The Dartmouth Atlas Of Health Care The Pacific States:**

*The Dartmouth atlas of health care, the Pacific states* Dartmouth Medical School. Center for the Evaluative Clinical Sciences, Geographic Information Systems and Health Applications Khan, Omar A., Skinner, Ric, 2002-07-01 This book presents a sampling of the many applications utilizing GIS in the field of health including needs of less developed countries in utilizing the concepts and technologies of mapping Provided by publisher *The Oxford Handbook of Health Psychology* Howard S. Friedman, 2014-02 The Oxford Handbook of Health Psychology brings together preeminent experts to provide a comprehensive view of key concepts tools and findings of this rapidly expanding core discipline *The Dartmouth Atlas of Health Care in Pennsylvania, 1998* Dartmouth Medical School. Center for the Evaluative Clinical Sciences, 1998 The Dartmouth Atlas of Health Care in Pennsylvania a part of the Dartmouth Atlas of Health Care series of publications demonstrates again that the way healthcare resources are distributed and used at the local level challenges the conventional wisdom that illness determines the use of medical care and that the supply of medical care arises in response to the demand for it **Capitation in California** Maurice J. Penner, 1997 This from the trenches guide can help you meet the challenges of forecasting a population's healthcare needs building a provider panel establishing financial incentives for providers establishing information systems for managed care negotiating managed care contracts managing utilization quality **The U.S. Healthcare Certificate of Need Sourcebook** Robert James Cimasi, 2005 A state by state analysis of the certificate of need statutes regulations case law and key state health department personnel **Pneumonia Before Antibiotics** Scott H. Podolsky, 2006-05 Pneumonia Osler's Captain of the Men of Death and still the leading infectious cause of death in the United States has until now received scant attention from historians In *Pneumonia Before Antibiotics* clinician historian Scott H. Podolsky uses pneumonia's enduring prevalence and its centrality to the medical profession's therapeutic self identity to examine the evolution of therapeutics in twentieth century America Focusing largely on the treatment of pneumonia in first half of the century with type specific serotherapy Podolsky provides insight into the rise and clinical evaluation of therapeutic specifics the contested domains of private practice and public health and as the treatment of pneumonia made the transition from serotherapy to chemotherapy and antibiotics the tempo and mode of therapeutic change itself Type specific serotherapy founded on the tenets of applied immunology justified by controlled clinical trials and grounded in a novel public ethos was deemed revolutionary when it emerged to replace supportive therapeutics With the advent of the even more revolutionary sulfa drugs and antibiotics pneumonia ceased to be a public health concern and became instead an illness treated in individual patients by individual physicians Podolsky describes the new therapeutics and the scientists and practitioners who developed and debated them He finds that rather than representing a barren era in anticipation of some unknown transformation to come the first decades of the twentieth century shaped the use of and reliance upon the therapeutic specific throughout the century and beyond This intriguing study will interest historians of medicine and science

**More than Medicine**

Robert M. Kaplan, 2019-02-04 Stanford's pioneering behavioral scientist draws on a lifetime of research and experience guiding the NIH to make the case that America needs to radically rethink its approach to health care if it wants to stop overspending and overprescribing and improve people's lives American science produces the best and most expensive medical treatments in the world Yet U.S. citizens lag behind their global peers in life expectancy and quality of life Robert Kaplan brings together extensive data to make the case that health care priorities in the United States are sorely misplaced America's medical system is invested in attacking disease but not in addressing the social behavioral and environmental problems that engender disease in the first place Medicine is important but many Americans act as though it were all important The United States stakes much of its health funding on the promise of high tech diagnostics and miracle treatments while ignoring strong evidence that many of the most significant pathways to health are nonmedical Americans spend millions on drugs for high cholesterol which increase life expectancy by only six to eight months on average But they underfund education which might extend life expectancy by as much as twelve years Wars on infectious disease have paid off but clinical trials for chronic conditions costing billions rarely confirm that new treatments extend life Meanwhile the National Institutes of Health spends just 3 percent of its budget on research on the social and behavioral determinants of health even though these factors account for 50 percent of premature deaths America's failure to take prevention seriously costs lives More than Medicine argues that we need a shakeup in how we invest resources and it offers a bold new vision for longer healthier living

Closing Death's Door Michael J. Saks, Stephan Landsman, 2021-01-21 Closing Death's Door brings the psychology of decision making together with the law to explore ways to improve patient safety and reduce iatrogenic injury the cause of as many as 400 000 US deaths every year in a world where neither the healthcare industry itself nor the legal system has made a serious dent in the problem

Health Care Financing Review, 2003

Understanding Healthcare Economics Jeanne Wendel, PHD, Teresa D. Serratt, PHD, RN, William O'Donohue, PHD, 2017-11-22 Healthcare economics is a topic of increasing importance due to the substantial changes that are expected to radically alter the way Americans obtain

and finance healthcare Understanding Healthcare Economics 2nd Edition provides an evidence based framework to help practitioners comprehend the changes already underway in our nation s healthcare system It presents important economic facts and explains the economic concepts needed to understand the implications of these facts It also summarizes the results of recent empirical studies on access cost and quality problems in today s healthcare system The material is presented in two sections Section 1 focuses on the healthcare access cost and quality issues that create pressures for change in health policy The first edition was completed just as the Patient Protection and Affordable Care Act PPACA was debated and passed This new edition updates the information about access cost and quality issues It also discusses the pressure for change that led to the passage of the PPACA evidence that shaped the construction of the act evidence on the impacts of the PPACA and evidence on the pressures for future changes Section 2 focuses on changes that are underway including changes in the Medicare payment system new types of healthcare delivery organizations such as ACOs and patient centered medical homes It also discusses the current efforts to help patients build health such as wellness programs and disease management programs And finally health information technology will be discussed The new edition will maintain the current structure however each chapter will be updated to discuss post PPACA evidence on each type of type In addition to the updates previously mentioned the authors will present a series of data explorations to several chapters Most of the new data explorations present summarized statistical information based on de identified data from one hospital electronic data system These data explorations serve two purposes First they illustrate the impacts of the pressures for change and some of the changes on healthcare providers For example the data illustrates the financial impact of pre PPACA uncompensated care Second explanation of the data will require explanations of standard coding systems that are used nationwide DRGs CPT ICD codes Other data explorations provide detail about other sources of data useful for health policy analysis and for healthcare providers and insurers

**Getting Better Value in Health Care** United States. Congress. House. Committee on the Budget,2008

**The Problem of Practice Variation in Newborn Medicine** Joseph Schulman,2022-05-20 Neonatal intensive care unit NICU teams in the US and around the world receive performance reports that locate their particular value for selected process and outcome measures within the range of values from all reporting NICUs Understandably many providers focus primarily if not exclusively on their particular value When a value appears undesirable providers often justify it in an apparent reflex response rather than critically analysing their data Exceedingly few reflect on the width or implications of the range within which their performance lies Standard medical education does not include these skills yet unwarranted practice variation necessarily compromises a population s overall quality of care Researchers report wide variation in health care resource use with little connection to patient outcomes challenging the belief that directing incrementally more resources at certain healthcare problems necessarily produces better results This book provides requisite knowledge to enable readers without research expertise to understand the notion of unwarranted practice variation how to

recognize its ubiquity and why it is generally undesirable why narrowing is pervasiveness improves quality The book begins by describing practice variation its prevalence and why it matters Next it examines alternative conceptualizations of NICU work One view is task oriented while the other is aim oriented NICU teams rarely articulate their aims explicitly so this book offers examples that guide thinking and action Finally this book asks Which rate is right what is the performance target The answer entails identifying the lowest resource use rate associated with desirable outcomes This requires data describing efficient and predictably performing provision of current evidence based care along with relationships to a variety of outcomes Provider conceptualization of healthcare quality also is often vague The challenge lies in defining this notion operationally This book does precisely that and gives readers tools to think critically about process outcome and quality measures via some understanding of systems risk adjustment modelling and discriminating signal from noise in process data
