adults overcome early obstacles while rafts of competent even gifted women choose jobs that pay less or decide to opt out at pivotal moments in their careers Weaving interviews with men and women into the most recent discoveries in psychology neuroscience and economics Pinker walks the reader through these minefields Are men the more fragile sex Which sex is the happiest at work What does neuroscience tell us about ambition Why do some male school drop outs earn more than the bright motivated girls who sat beside them in third grade Pinker argues that men and women are not clones and that gender discrimination is just one part of the persistent gender gap A work world that is satisfying to us all will recognize sex differences not ignore them or insist that we all be the same     **Encyclopedia of Evolution** Stanley A. Rice,2009
