The Death Of The Body:

Death and the Body in the Eighteenth-Century Novel Jolene Zigarovich, 2023-01-10 *Death and the Body in the Eighteenth Century Novel* demonstrates that archives continually speak to the period's rising funeral and mourning culture as well as the increasing commodification of death and mourning typically associated with nineteenth-century practices. Drawing on a variety of historical discourses such as wills, undertaking histories, medical treatises and textbooks, anatomical studies, philosophical treatises and religious tracts and sermons, the book contributes to a fuller understanding of the history of death in the Enlightenment and its narrative transformation. *Death and the Body in the Eighteenth Century Novel* not only offers new insights about the effect of a growing secularization and commodification of death on the culture and its productions but also fills critical gaps in the history of death using narrative as a distinct literary marker. As anatomists dissected undertakers, preserved jewelers encased and artists figured the corpse, so too the novelist portrayed bodily artifacts. Why are these morbid forms of materiality entombed in the novel? Jolene Zigarovich addresses this complex question by claiming that the body itself, its parts or its preserved representation functioned as secular memento, suggesting that preserved remains became symbols of individuality and subjectivity. To support the conception that in this period notions of self and knowing center upon theories of the tactile and material, the chapters are organized around sensory conceptions and bodily materials such as touch, preserved flesh, bowel, heart, wax, hair, and bone. Including numerous visual examples, the book also argues that the relic represents the slippage between corpse and treasure, sentimentality and materialism, and corporeal fetish and aesthetic accessory. Zigarovich's analysis compels us to reassess the eighteenth-century response to and representation of the dead and dead-like body and its material purpose and use in fiction. In a broader framework, *Death and the Body in the Eighteenth Century Novel* also narrates a history of the novel that speaks to the cultural formation of modern individualism.

Death, Modernity, and the Body Eva Åhrén, 2009 Originally published in Swedish in 2002, *Death, Modernity, and the Body* explores the impact of modernization on customs and practices surrounding the dead body in Sweden in the late nineteenth and early twentieth centuries. This period of intense social and cultural change transformed Sweden from an agricultural society to a modern industrial state. The book focuses on five arenas: medical research and education, displays of the dead body for entertainment purposes, funerary preparations of the body, memorial photography, and cremation. The book takes an original approach to the history of death in modern society by focusing on the dead body in intersecting cultural domains. Medical, scientific, and technological history are thereby connected to popular culture, social and political history, as well as ethnography and anthropology. The scholarly literature on the history of death is disproportionately focused on the Anglophone world (France and Germany). This study contributes to the scholarship by examining the case of Sweden, where modernization was exceptionally rapid and pervasive and full of interesting particularities.

"Death, Torture and the Broken Body in European Art, 1300?650 " JohnR. Decker, 2017-07-05 Bodies mangled limbs broken skin flayed blood spilled from paintings to prints to small sculptures the art of the late Middle Ages and early modern period gave rise to disturbing scenes of violence Many of these torture scenes recall Christ s Passion and its aftermath but the martyrdoms of saints stories of justice visited on the wicked and broadsheet reports of the atrocities of war provided fertile ground for scenes of the body s desecration Contributors to this volume interpret pain suffering and the desecration of the human form not simply as the passing fancies of a cadre of proto sadists but also as serving larger social functions within European society Taking advantage of the frameworks established by scholars such as Samuel Edgerton Mitchell Merback and Elaine Scarry to name but a few **Death Torture and the Broken Body in European Art 1300 1650** provides an intriguing set of lenses through which to view such imagery and locate it within its wider social political and devotional contexts Though the art works discussed are centuries old the topics of the essays resonate today as twenty first century Western society is still absorbed in thorny debates about the ethics and consequences of the use of force coercion including torture and execution and about whether it is ever fully acceptable to write social norms on the bodies of those who will not conform
