The Design of Rural Development Uma J. Lele, World Bank, 1975      **The design of rural development** Uma Jayant Lele, 1975      The Design of Rural Development Uma Lele, 1975      *The Development of Aid* Gerard Van Bilzen, 2015-01-12

Aid to developing countries started well before World War II but was undertaken as an ad hoc activity or was delivered by private organizations. This changed after the War. In his Inaugural Address in 1949 the American President Harry Truman announced a bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations: the so-called Point IV Plan. At that time it was thought that this support would be needed only for a limited number of years comparable to the Marshall Plan assistance to Europe. But reality proved to be different: providing aid was a very long term affair. Since the Fifties the aid provided has changed at different occasions. In the beginning aid concentrated on constructing infrastructure such as roads, railways, dams and harbours in order to promote industrial development. In the Sixties aid to agriculture was added and in the Seventies aid to social sectors. Basic Needs was also provided. The Eighties brought worldwide debt problems. Major donors applied structural adjustment policies: some called this the lost decade or *cada perdida*. The Nineties saw the arrival of the first environmental considerations and asked for attention for the role of women and good governance. The form of aid changed from projects to programmes and budget support. Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book. Professionals and students in the area of international cooperation will benefit from studying this history as at this moment old concepts are reappearing or applied by new donors like China. Is the pendulum really swinging back as Louis Emmerij at one point suggested?
