## **The Death Of Children:**

Explaining Death to Children Earl A. Grollman, 1998-07 Rabbi Earl A Grollman s best selling book on how we speak of the mystery of death to our children is now issued in a smaller format Also helpful for adults contemplating their own theology of death Thoughts on the Death of Little Children Samuel Irenæus Prime, 1854 **After the Death of a Child** Ann K. Finkbeiner, 2012-12-11 For a parent losing a child is the most devastating event that can occur Most books on the subject focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Based on extensive interviews and grief research Finkbeiner explains how parents have changed five to twenty five years after the deaths of their children The first half of the book discusses the short and long term effects of the child s death on the parent s relationships with the outside world that is with their spouses other children friends and relatives The second half of the book details the effect on the parents internal world their continuing sense of guilt their need to place the death in some larger context and their inability sometimes to consistently do so their new set of priorities the nature of their bond with the lost child and the subtle and creative ways they have of continuing that bond Finkbeiner s central point is not so much how parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner s is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived Never Too Young to Know Phyllis Rolfe Silverman, 1999-08-26 In spite of society s wish to protect and insulate children from death the experience of loss is unavoidable and there is surprisingly little guidance on how to help children cope with grief and bereavement Never Too Young to Know Death in Children s Lives is the first book to bring together diverse fields of study and offer a practical as well as multifaceted theoretical approach to how children cope with death Using stories of children s own experiences supported by data from a large research study Silverman explains the wide range of effects of loss upon children the challenges they face as they grieve and ways of supporting them as they change and grow in the bereavement process The book is divided into three parts an overview and theoretical framework a detailed analysis of how children experience mourning different types of death including the death of siblings parents and friends and death due to illness suicide accidents and violence and an accessible guide to helping children cope with grief Never Too Young To Know Death in Children s Lives is not only ideal for advanced undergraduate and graduate students learning about children but it is also useful for courses on death and dying and the

family It is also an invaluable book for general readers interested in learning how to deal with death in children's lives      *On the Death of a Child* Christine Hindmarch, 2016-07-06 The death of a child whether during or following birth through illness through accident or through suicide is one of the greatest challenges families carers friends and the health and social care professionals who support them can face This book provides professionals with practical advice resources for further support and reading and much needed reassurance that whatever contact they have with the bereaved and however inadequate they may feel to the task they can make a difference With revised material and an entirely new chapter reflecting recent developments in bereavement theory the third edition of this classic text offers unique insights for professionals with varying levels of experience From theory and narrative come practical ideas on what to say what to do how to behave how to stay humble in situations where the only real experts are the bereaved themselves and how professionals can look after themselves in what can be particularly traumatic and upsetting circumstances      *On the Death of a Child* Celia Hindmarch, 2009 With revised material and entirely new chapters the third edition of this classic text offers unique guidelines for professionals of varying levels of experience This book provides professionals with both practical advice and much needed reassurance that they can make a difference      **Global Perspectives on Death in Children's Literature** Lesley D. Clement, Leyli Jamali, 2015-07-30 This volume visits death in children's literature from around the world making a substantial contribution to the dialogue between the expanding fields of Childhood Studies Children's Literature and Death Studies Considering both textual and pictorial representations of death contributors focus on the topic of death in children's literature as a physical reality a philosophical concept a psychologically challenging adjustment and or a social construct Essays covering literature from the US Mexico El Salvador Guatemala Canada the UK Sweden Germany Poland Bulgaria Brazil Czechoslovakia the Soviet Union India and Iran display a diverse range of theoretical and cultural perspectives Carefully organized sections interrogate how classic texts have been adapted for the twenty first century how death has been politicized ritualized or metaphorized and visual strategies for representing death and how death has been represented within the context of play Asking how different cultures present the concept of death to children this volume is the first to bring together a global range of perspective on death in children's literature and will be a valuable contribution to an array of disciplines      **Children's Disturbed Reactions to the Death of a Sibling** ,      *Coping with the Death of a Child* Darin D. Schiffman, 2019-06-19 *Coping with the Death of a Child* shows clinicians how to integrate various therapeutic modalities and clinical approaches to grief therapy into one comprehensive model linked to positive change This integrated model shows mental health professionals how to offer practical and emotional support to the bereaved using descriptions of treatments care protocols and guidelines Through this approach practitioners can foster interpersonal support and growth among families even when grieving styles and timing differ between individuals Clinicians and the families they treat will come away from the book with tools for recognizing distorted and pathogenic exchanges between family members for valuing the

emotional elements of their individual experiences and for shifting toward solution focused activities After the Death of a Child Ann K.
