In the Beginning Michael Lienesch, 2007 In the Beginning Fundamentalism the Scopes Trial and the Making of the Antievolution Movement Rise of the Robots Martin Ford, 2015-05-05 The New York Times bestselling guide to how automation is changing the economy undermining work and reshaping our lives Winner of Best Business Book of the Year awards from the Financial Times and from Forbes Lucid comprehensive and unafraid an indispensable contribution to a long running argument Los Angeles Times What are the jobs of the future How many will there be And who will have them As technology continues to accelerate and machines begin taking care of themselves fewer people will be necessary Artificial intelligence is already well on its way to making good jobs obsolete many paralegals journalists office workers and even computer programmers are poised to be replaced by robots and smart software As progress continues blue and white collar jobs alike will evaporate squeezing working and middle class families ever further At the same time households are under assault from exploding costs especially from the two major industries education and health care that so far have not been transformed by information technology The result could well be massive unemployment and inequality as well as the implosion of the consumer economy itself The past solutions to technological disruption especially more training and education aren't going to work We must decide now whether the future will see broad based prosperity or catastrophic levels of inequality and economic insecurity Rise of the Robots is essential reading to understand what accelerating technology means for our

economic prospects not to mention those of our children as well as for society as a whole *Where Nation-States Come From* Philip G. Roeder, 2012-01-09 To date the world can lay claim to little more than 190 sovereign independent entities recognized as nation states while by some estimates there may be up to eight hundred more nation state projects underway and seven to eight thousand potential projects Why do a few such endeavors come to fruition while most fail Standard explanations have pointed to national awakenings nationalist mobilizations economic efficiency military prowess or intervention by the great powers *Where Nation States Come From* provides a compelling alternative account one that incorporates an in depth examination of the Russian Empire the Soviet Union and their successor states Philip Roeder argues that almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state a jurisdiction defined by both human and territorial boundaries Independence represents an administrative upgrade of a segment state Before independence segmental institutions shape politics on the periphery of an existing sovereign state Leaders of segment states are thus better positioned than other proponents of nation state endeavors to forge locally hegemonic national identities Before independence segmental institutions also shape the politics between the periphery and center of existing states Leaders of segment states are hence also more able to challenge the status quo and to induce the leaders of the existing state to concede independence Roeder clarifies the mechanisms that link such institutions to outcomes and demonstrates that these relationships have prevailed around the world through most of the age of nationalism *The Rise of the Robots* Martin Ford, 2015-09-03 Intelligent algorithms are already well on their way to making white collar jobs obsolete travel agents data analysts and paralegals are currently in the firing line In the near future doctors taxi drivers and ironically even computer programmers are poised to be replaced by robots Without a radical reassessment of our economic and political structures we risk the very implosion of the capitalist economy itself In *The Rise of the Robots* technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications From health and education to finance and technology his warning is stark all jobs that are on some level routine are likely to eventually be automated resulting in the death of traditional careers and a hollowed out middle class The robots are coming and we have to decide now whether the future will bring prosperity or catastrophe *São Paulo in the Twenty-First Century* Eduardo Cesar Leão Marques, 2016-05-20 This book analyzes in detail the main social economic and special transformation of the city of S o Paulo In the last 30 years S o Paulo has become a more heterogeneous and less unequal city Contrary to some expectations the recent economic transformations did not produce social polarization and the localized processes of spaces production and the plural is increasingly important are more and more key to define their respective growth patterns social conditions forms of housing production service availability and urban precariousness In other dimensions however inequalities remain present and strong and certain disadvantaged areas have changed little and are still marked by strong social inequalities The metropolis remains

heavily segregated in terms of race and class in a clear hierarchical structure The book shows that it is necessary to escape from dual and polarity interpretations This did not lead to the complete disappearance of a crudely radial and concentric structure not only due to geographic path dependence but superposes other elements over it leading to more complexes and continuous patterns A general summary of these elements could perhaps be stated as pointing to greater social spatial heterogeneity accompanied by smaller but reconfigured inequalities

American Political Economy in Global

Perspective Harold L. Wilensky, 2012-02-29 This book is a guide to claims about the proper role of government and markets in a global economy Moving between systematic comparison of 19 rich democracies and debate about what the United States can do to restore a more civilized egalitarian and fair society Harold L Wilensky tells us how six of these countries got on a low road to economic progress and which components of their labor crunch strategy are uniquely American He provides an overview of the impact of major dimensions of globalization only one of which the interaction of the internationalization of finance and the rapid increase in the autonomy of central banks undermines either national sovereignty or job security labor standards and the welfare state Although Wilensky views American policy and politics through the lens of globalization he concludes that the nation state remains the center of personal identity social solidarity and political action He concentrates on what national differences mean for the well being of nations and their people Drawing on lessons from abroad and from America's own past successes Wilensky shows how we can reverse our three decade decline He argues that in order to get off the low road we must overcome the myths of moderation the rise of the independent voter and a rightward shift of the electorate He specifies a feasible domestic agenda that matches majority sentiments in all rich democracies

The Decades of Henry Bullinger Heinrich Bullinger, 1849 *China in Disintegration* James E. Sheridan, 2008-06-30 After the 1911 fall of the Manchus came the most hideous breakdown in Chinese history Sheridan a Northwestern University scholar concentrates on the Kuomintang movement of Chiang Kai shek insisting that we judge a political force by whether it solves the problems posed to it not as Chiang's partisans prefer by means of what if's Sheridan's focus on the KMT brings more to light than do many surveys of Mao's revolutionaries The KMT failed either to create an effective dictatorship or to mobilize fascist passions which could ensure willingness to sacrifice Thus the difficulty in squeezing enough wealth out of the peasantry to meet a foreign debt which totaled half the national revenue The KMT did ensure that forced opium production took up at least a fifth of Chinese cropland by the 1929-1933 period and they consolidated a soldier recruitment system that approximated Nazi roundups However the book underlines Chiang's failure to give the masses a Strength through Joy spirit and as wartime inflation of 300% gave way to postwar collapse the anti Communist pitch became emptier and emptier The Kuomintang turned into a mere holding operation and faded into chaos Sheridan gives a strong sense of the rapine of the warlords who were Chiang's off and on allies and of the feeble heritage of Sun Yat sen's patriotic platitudes He leaves out explicit investigation of the international context while underlining more than most writers Chiang's commitment to repay external

Ackerman,Richard Douglas Green,Geoffrey Thomas,Caroline S. Kelly,Michael Tuuri,Peter Leithart, This issue of the Journal of Christian Reconstruction focuses on the specific and immediate application of Christian Reconstruction in our society today Our major concern in this symposium is not with long term future scenarios such as a vast revival although we pray for it every day or some type of economic crisis although this is likely enough but with what we can trace of the blessed work of the Holy Spirit in applying the transforming Gospel of grace to all areas of our contemporary life and society here and now We conservative Christians have been fairly adept at discerning and describing the evils and impending disasters of our time Calling evil by its true name is after all an important part of any biblically based prophetic ministry Diagnosis is an essential part of the curative process in medicine theology and every other field But at the same time many of us have so tended to focus on the diagnosis of evil that we have failed to look up and see the widespread healing and impartation of new life that is going on all around us **Understanding The Small Business Sector** David J.
