The Press and the Decline of Democracy Robert G. Picard, 1985-12-06 The author discusses the role of economic concentration in limiting public access to information and reducing opportunities for public discourse Picard examines the government policies that have contributed to the erosion of democratic participation and have permitted the growth of large commercial press entities unobstructed by anti trust provisions He relates recent public policy responses to this problem to democratic socialist ideology and develops a social democratic theory of the press which draws upon ideas and policies found throughout the Western world Picard provides a democratic framework for understanding the changing nature of media economics and state press relations and offers proposals for achieving both a democratically functioning press and broader popular participation
