William George Aston

The Deification And Worship Of Ancestors:

The Deification and Worship of Ancestors Edward Clodd, 2005-12 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **Towards a Christian Theology of African Ancestors** Thomas Ochieng Otanga, 2023-04-21 This book examines the similarities and relationship between Christian saints and African ancestors Further it analyzes the deep cultural roots of African peoples and the ancestral frame as a point of departure for developing an indigenous African theology Questions dealt with include Does the conversion of Africans to Christianity require a break with their African cultural heritage Who is an African ancestor Is syncretism a good thing for an African Christian What contribution can the African church make to the universal church The author argues that rather than being antithetical to formal Christianity an African Christian theology of ancestors is an example of how an indigenous African tradition can best express Christianity as well as make considerable impact on world Christianity **History Of Medicine In Chinese Culture, A (In 2 Volumes)** Boying Ma, 2020-02-20 This book set covers the last 3000 years of Chinese Medicine as a broadly flowing river from its source to its mouth It takes the story from the very beginnings in proto scientific China to the modern age with a wealth of historical and cultural detail It is unique in presenting many anecdotes sayings and excerpts from the traditional classics The content is organized into four parts Part one focuses on the medical activities in Chinese primitive society and the characteristic features of the witchcraft stage of medicine Part two traces the progress of Chinese medicine as it entered the stage of natural philosophy It also discusses how other aspects of philosophy religion and politics influenced Chinese medical theory and practice at the time Chinese medicine having a kind of social existence was also impacted by the natural and social environment and multiple cultural factors Some of these factors are discussed in Part three The last part concludes by examining the cultural process of Chinese medicine in history and offers a glimpse into the future of Chinese Medicine *The Golden Bough: A Study in Magic and Religion (Complete)* Sir James George Frazer, 1957-01-01 Who does not know Turner s picture of the Golden Bough The scene suffused with the golden glow of imagination in which the divine mind of Turner steeped and transfigured even the fairest natural landscape is a dream like vision of the little woodland lake of Nemi Diana s Mirror as it was called by the ancients No one who has seen that calm water lapped in a green hollow of the Alban hills can ever forget it The two characteristic Italian villages which slumber on its banks and the equally Italian palazzo whose terraced gardens descend steeply to the lake hardly break the stillness and even the solitariness of the scene Dian herself might still linger by this lonely shore still haunt these woodlands wild In antiquity this sylvan landscape was the scene of a strange and recurring tragedy On the northern shore of the lake right under the precipitous cliffs on which the modern village of Nemi is perched stood the sacred grove

and sanctuary of Diana Nemorensis or Diana of the Wood The lake and the grove were sometimes known as the lake and grove of Aricia But the town of Aricia the modern La Riccia was situated about three miles off at the foot of the Alban Mount and separated by a steep descent from the lake which lies in a small crater like hollow on the mountain side In this sacred grove there grew a certain tree round which at any time of the day and probably far into the night a strange figure might be seen to prowl In his hand he carried a drawn sword and he kept peering warily about him as if every instant he expected to be set upon by an enemy He was a priest and a murderer and the man for whom he looked was sooner or later to murder him and hold the priesthood in his stead Such was the rule of the sanctuary A candidate for the priesthood could only succeed to office by slaying the priest and having slain him he held office till he was himself slain by a stronger or a craftier This strange rule has no parallel in classical antiquity and cannot be explained from it To find an explanation we must go farther afield No one will probably deny that such a custom savours of a barbarous age and surviving into imperial times stands out in striking isolation from the polished Italian society of the day like a primeval rock rising from a smooth shaven lawn It is the very rudeness and barbarity of the custom which allow us a hope of explaining it For recent researches into the early history of man have revealed the essential similarity with which under many superficial differences the human mind has elaborated its first crude philosophy of life Accordingly if we can show that a barbarous custom like that of the priesthood of Nemi has existed elsewhere if we can detect the motives which led to its institution if we can prove that these motives have operated widely perhaps universally in human society producing in varied circumstances a variety of institutions specifically different but generically alike if we can show lastly that these very motives with some of their derivative institutions were actually at work in classical antiquity then we may fairly infer that at a remoter age the same motives gave birth to the priesthood of Nemi Such an inference in default of direct evidence as to how the priesthood did actually arise can never amount to demonstration But it will be more or less probable according to the degree of completeness with which it fulfils the conditions indicated above The object of this book is by meeting these conditions to offer a fairly probable explanation of the priesthood of Nemi I begin by setting forth the few facts and legends which have come down to us on the subject According to one story the worship of Diana at Nemi was instituted by Orestes who after killing Thoas King of the Tauric Chersonese the Crimea fled with his sister to Italy bringing with him the image of the Tauric Diana The bloody ritual which legend ascribed to that goddess is familiar to classical readers it is said that every stranger who landed on the shore was sacrificed on her altar But transported to Italy the rite assumed a milder form Within the sanctuary at Nemi grew a certain tree of which no branch might be broken Only a runaway slave was allowed to break off if he could one of its boughs Success in the attempt entitled him to fight the priest in single combat and if he slew him he reigned in his stead with the title of King of the Wood Rex Nemorensis Tradition averred that the fateful branch was that Golden Bough which at the Sibyl's bidding Aeneas plucked before he essayed the perilous journey to the world of the dead The flight of the slave represented it was said the

flight of Orestes his combat with the priest was a reminiscence of the human sacrifices once offered to the Tauric Diana This rule of succession by the sword was observed down to imperial times for amongst his other freaks Caligula thinking that the priest of Nemi had held office too long hired a more stalwart ruffian to slay him

The Future of Life: Meta-Evolution

David Hunter Tow, 2006-10 The Future of Life Meta Evolution represents the first comprehensive formulation of the hypothesis that evolution is the unifying force underlying the dynamics of all processes in the universe both organic and inorganic These include all facets of human existence and civilisation the sciences technology arts humanities and religion In essence by applying quantum information network and decision theory it is demonstrated that an overarching evolutionary process shapes the spectrum of life and phenomena in the universe as a generic paradigm beyond Darwin's original biology based theory The Theory of Evolution is undoubtedly the most powerful paradigm ever conceived by humans to explain their own existence Since Darwin's epoch making treatise Origin of Species published in 1859 evolution has been centre stage universally recognised as the driving force in the emergence of modern humans from the genesis of life on this planet almost 4 billion years ago However despite its ubiquitous brilliance as the jewel in the crown of human intellectual achievement the notion of evolution has never been developed to its full potential It remains instead constrained within its biological cradle often reduced in everyday connotation to its lowest common denominator of survival of the fittest The intention of this book to re evaluate and expand the Darwinian model of evolution to demonstrate that its current application is only the tip of the intellectual iceberg and that by combining its formidable biological principles with those of decision complexity network quantum and information theory it emerges as an incalculably deeper and richer model than previously contemplated It will be demonstrated that the evolutionary engine which drives biological development also drives all other dynamic adaptive processes the physical social cognitive economic political and technological and is in fact the major dynamic governing the Universe past present and future It is further proposed to demonstrate that recent developments in artificial intelligence and ubiquitous computing through the Internet mark the next crucial stage in life's evolution involving the inevitable symbiosis of vast computational intelligence with the human mind The major hypothesis developed in this book of a global all encompassing Theory of Evolution coupled with its potential for realising the emancipation of human intelligence and potential provides a vastly more powerful paradigm for exploring the Future of Life than current scientific scenarios The resulting Omega state of infinite knowledge and wisdom which is proposed has been actively championed by a number of eminent 19th and 20th century philosophers such as Teilhard de Chardin Henri Bergson Schelling Alfred Whitehead Samuel Alexander and more recently by the leading physicist and futurist Professor Frank Tipler However to date no equivalent scientific framework for supporting such a hypothesis has been provided In conclusion The Future of Life Meta Evolution has been written not as an academic text but as primarily a non technical review of the evidence to support such a hypothesis in much the same vein as other recent publications in the popular science philosophy genre It is hoped that this approach will

therefore provide a window into the wider evolutionary debate for the general reader interested in one of the most critical emerging paradigm shifts of the 21st century
