Rösing, Maria Teschler-Nicola, 2012-12-06 Shelley Saunders This book offers a welcome diversity of topics covering the broader subjects of teeth and the study of teeth by anthropologists There is an impressive array of coverage here including the history of anthropological study of the teeth morphology and structure pathology and epidemiology the relationship between nutrition human behavior and the dentition age and sex estimation from teeth and geographic and genetic variation Most chapter

authors have provided thorough reviews of their subjects along with examples of recent analytical work and recommendations for future research North American researchers should particularly appreciate the access to an extensive European literature cited in the individual chapter bibliographies Physical anthropologists with even a passing interest in dental research should greet the publication of this book with pleasure since it adds to a growing list of books on how the study of teeth can tell us so much about past human populations In addition to the archaeological applications there is the forensic objective of dental anthropology which the editors refer to in their introduction which is dealt with in this volume The chapters dealing with methods of sex determination age estimation of juveniles and age estimation of adults using the teeth are exhaustive and exacting and of critical importance to both osteoarchaeologists and forensic anthropologists Authors Liversidge Herdeg and Rosing provide very clear guidelines for the use of dental formation standards in juvenile age estimation recommendations that are so obviously necessary at this time **The Biology of Pulp and Dentine** Louis J.

Baume,1980 **Dynamic Aspects of Dental Pulp** Reizo Inoki,Teruo Kudo,Leif M. Olgart,2012-12-06 This book presents a circumspective overview and update of the present existing knowledge of the biology chemistry and pathophysiology of the dental pulp It details numerous observations of a group of highly specialized investigators who have united in the common purpose of presenting their observations for the benefit of clinicians teachers researchers and students Fortunately the dental literature presents abundant research findings about pulp biology and the pulp s responses to various stimuli This abundance has resulted in an increased interest and expansion of research on this subject For example publications abound on the response of pulp tissue to various medications and to a variety of types of dental materials which may be placed near to or at some distance from the pulp through the medium of dentine One of the reasons the pulp is of such interest is that it not only provides the vitality to the teeth but also produces the dentine both the primary and secondary as well as reparative The latter type dentine is a result of the pulp s functions in response to disease as the former dentine is in response to health As an example some investigators have reported the effects of cutting of dentine and the placement of restorations in dentine which in turn reflect changes on the pulp tissue These reports have raised a number of questions which in turn have created a need for answers

Aging Mouth D. B. Ferguson, 1987-11-24 Medical Bulletin of the European Command, 1968 **Recording Structures of Mammals** Galina A. Klevezal, 2017-10-19 This text focuses on the principles and methods of using growth layers formed in teeth and bones of mammals to make a judgement on essential traits of the animal's life history. In nearly all mammalian species including man the age of individuals can be determined from the number of growth layers and at least in some of them it is possible to estimate the season of an animal's birth and death age of sexual maturation periodicity of reproduction certain feeding habits and other aspects of the individual's biology. It is also possible from tooth enamel analysis to assess doses of radiation accumulated by animals and human beings during their lifetime. This book is intended for zoologists wild game biologists and zoo archaeologists but some of the sections could also be of interest for anthropologists radioecologists and conservation biologists **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1965
