The Depletion Myth A History Of Railroad Use Of Timber:

The Depletion Myth Sherry H. Olson, 1971 Undoubtedly the best narrative and critical analysis of the conservation movement of the Progressive period Oregon Historical Quarterly *Timber Supply, Land Allocation, and Economic Efficiency* William F. Hyde, 2013-11-26 First Published in 2011 This is the sixth volume in the Forests Lands and Recreation set of ten volumes This text is one of many on the topic of timber supply a perpetually central issue in forest economics and policy But it is also something else It is an attempt to examine the economic efficiency of investments in timber production Special attention is directed to the increasingly important issue of investments in forestland particularly public forestland where allocation of land between timber production and other forest uses is an issue of national policy importance

Water, Land, and Law in the West Donald J. Pisani, 1996 The series presents an interdisciplinary approach to the use and misuse of resources in the American West This volume comprises essays written between 1982 and 1994 and previously published in journals such as Western Historical Quarterly J of American History and Environmental History Review Pisani one of the nation's leading environmental and Western historians highlights the central role played by land water and timber allocation in the American West and shows how efforts to achieve justice and efficiency were compromised by the region's obsession with achieving rapid economic growth Annotation copyright by Book News Inc Portland OR A Burning Issue Robert Henry Nelson, 2000 Created in the early 20th century to provide scientific management of the nation's forests the U S Forest Service was for many years regarded as a model agency in the federal government The author contends that this reputation is undeserved and the Forest Service's performance today is unacceptable Not only has scientific management proven impossible in practice it is also objectionable in principle Furthermore the author argues that the Forest Service lacks a coherent vision and prefers to sponsor only fashionable environmental solutions most recently ecosystem management Describing its history and failures the author advocates replacing the service with a decentralized system to manage the protection of national forests *Manufacturing* David O. Whitten, Bessie E. Whitten, 1990-09-27 Overall this first volume in the series should render business research in manufacturing a good deal easier by bringing together insightful industry histories and detailed critical bibliographies This series has much to recommend it Future volumes will be eagerly awaited Reference Books Bulletin This historical and bibliographical reference work is the first volume of Greenwood Press's Handbook of American Business History a series intended to supplement current bibliographic materials pertaining to business history Devoted to manufacturing this work uses the Enterprise Standard Industrial Classification ESIC to divide the subject into distinct segments from which contributors have developed histories and bibliographies of the different types of manufacturing Though authors were given sets of guidelines to follow they were also allowed the flexibility to work in a format that best suited the material Each contribution in this volume contains three important elements a concise history of the manufacturing sector a bibliographic essay and a bibliography Some contributions appear in three distinct parts while

others are combined into one or two segments all build on currently available material for students and scholars doing research on business and industry The contributors who include business economic and social historians as well as engineers and lawyers have covered such topics as bakery products industrial chemicals and synthetics engines and turbines and household appliances Also included are an introductory essay that covers general works and a comprehensive index This book should be a useful tool for courses in business and industry and a valuable resource for college university and public libraries

The Atlas of U.S. and Canadian Environmental History Char Miller, 2003-08-08 This visually dynamic historical atlas chronologically covers American environmental history through the use of four color maps photos and diagrams and in written entries from well known scholars Organized into seven categories each chapter covers agriculture wildlife and forestry land use and management technology and industry pollution

Free Market Environmentalism Terry L. Anderson, 2019-03-04 Although there is in the United States a clear national consensus supporting the protection of the environment advocates often profoundly disagree about the policies best designed to achieve this end The traditional answer has been that government must intervene through legislation and regulation of behavior to preserve environmental values Th

Regulating Railroad Innovation Steven W. Usselman, 2002-03-11 Efforts to create and mould new technologies have been a central recurrent feature of the American experience since at least the time of the Revolution In *Regulating Railroad Innovation* historian Steven Usselman brings this neglected aspect of American history to light For nearly a century railroad technology persistently posed novel challenges for Americans prompting them to re examine their most cherished institutions and beliefs Business managers inventors consumers and politicians all strained to contain the forces of innovation and to channel technical change toward the ends they desired Moving through time from

the first experimental lines through the polished but troubled railroad machines of the early twentieth century Usselman examines diverse forums ranging from legislatures and evolving corporate bureaucracies to laboratories engineering societies and world's fairs In the process his book situates technology within the dynamic history of an emergent industrial nation and elucidates its enduring place in American society *The Forest Service* Gerald W. Williams, 2006-11-30

Established in 1905 The Forest Service is steeped in history conflict strong personalities including Theodore Roosevelt and Gifford Pinchot and the challenges of managing 193 million acres of national forests and grasslands This unique federal agency is one that combines forest management with wildlife fish recreation mining grazing and hundreds of other uses It operates in the midst of controversy and change The original intent was to protect the public forests protect the water supplies and when appropriate provide timber Much has changed over the last 100 years including many new laws but the fact that these lands are still fought over today shows the foresight of politicians foresters scientists and communities This work brings to light the many and varied activities of the agency that many people know little about in a world that is constantly changing Written by a former Forest Service national historian topics discussed in the work include wilderness and the Wilderness Act of 1964 recreation battles and interagency rivalry with the National Park Service timber management including clearcutting ecosystem management roadless area and controversies over RARE and RARE II studies fish and wildlife management including endangered species before and after the Endangered Species Act of 1973 and mining and the General Mining Act of 1872 It also discusses the future challenges forest fires water protection and restoration recreation involving the public and fish and wildlife *The United States Forest Service*, 1973 Montana Michael P. Malone, Richard B. Roeder, William L. Lang, 1991 Montana A History of Two Centuries first appeared in 1976 and immediately became the standard work in its field In this thoroughgoing revision William L. Lang has joined Michael P. Malone and Richard B. Roeder in carrying forward the narrative to the 1990s Fully twenty percent of the text is new or revised incorporating the results of new research and new interpretations dealing with pre history Native American studies ethnic history women's studies oral history and recent political history In addition the bibliography has been updated and greatly expanded new maps have been drawn and new photographs have been selected **Forests and Ecological History of Assam, 1826-2000** Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam's forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of forest policy in the postcolonial period

was defined by the complexities of the political matrix. It discusses plantation silvicultural practices, protection and regeneration of forests and livelihood practices. The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act. Extracting Appalachia Geoffrey L. Buckley, 2004. As a function of its corporate duties, the Consolidation Coal Company had photographers take hundreds of pictures of nearly every facet of its operations. Here, geographer Geoffrey L. Buckley examines the company's photograph collection housed at the Smithsonian Institution's National Museum of American History. **Trees in Paradise** Jared Farmer, 2013-10-28. Describes how the first settlers in California changed the brown landscape there by creating groves, wooded suburbs and landscaped cities through planting eucalypts in the lowlands, citrus colonies in the south and palms in Los Angeles. Empire Express David Haward Bain, 2000-09-01. After the Civil War, the building of the transcontinental railroad was the nineteenth century's most transformative event. Beginning in 1842 with a visionary's dream to span the continent with twin bands of iron, Empire Express captures three dramatic decades in which the United States effectively doubled in size, fought three wars and began to discover a new national identity. From self-made entrepreneurs such as the Union Pacific's Thomas Durant and era-defining figures such as President Lincoln to the thousands of laborers whose backbreaking work made the railroad possible, this extraordinary narrative summons an astonishing array of voices to give new dimension not only to this epic endeavor but also to the culture, political struggles and social conflicts of an unforgettable period in American history. *The Ingenuity Gap* Thomas Homer-Dixon, 2010-01-29. As crises multiply, ingenuity lags. This prescient classic explains why societies falter when problems outpace solutions and offers a roadmap to close the gap before risks from climate shocks, pandemics, inequality and AI spiral beyond control. First published at the turn of the millennium, *The Ingenuity Gap* by Thomas Homer-Dixon anticipated the turbulent world we now inhabit: pandemics, climate disasters, political polarization, disruptive runaway technologies and escalating global instability. With remarkable foresight, Homer-Dixon warned that the complexity of our problems would accelerate faster than our collective ingenuity to solve them and that failure to close this gap would leave societies fragile and exposed. A quarter century later, his vision has proven prophetic. Homer-Dixon takes readers on a global tour of ingenuity under pressure: from the desperate improvisation of pilots fighting to land United Airlines Flight 232 in Iowa to the water-hungry expansion of Las Vegas to a harrowing search for a missing child in Patna and the collapse of Canada's cod fisheries. Vivid and far-reaching, it is a sweeping portrait of what happens when societies are stretched beyond their capacity to adapt and an enlightening case for why ingenuity is humanity's most vital resource. Celebrating over twenty-five years in print, *The Ingenuity Gap* remains both a visionary diagnosis of our age and a call to reimagine how we generate creativity, resilience and leadership in uncertain times.
