The Kirwan Years 1998 2002:

The Kirwan Years, 1998-2002 Christopher L. Perry, 2006 Starting under President Edward Jennings and continuing under Gordon Gee The Ohio State University began a long term drive to match the school's ranking in football with a commensurate reputation for academic excellence Initiatives to admit better prepared students attract and retain world class faculty and build highly rated programs were promising but the university needed a broad strategy to coordinate these and other initiatives into a focused approach Enter President William Brit Kirwan who understood this need perfectly and whose major legacy became widely known as the Academic Plan This document became and remains the centerpiece of Ohio State's agenda with budget and other priorities emanating from its six strategies and 14 initiatives Continuing the Ohio State tradition of chronicling the university's history through the work of its past presidents The Kirwan Years recounts the Academic Plan's creation acceptance and initial implementation along with many major university accomplishments from mid 1998 through mid 2002 It also details the university's ongoing uphill struggle to maximize state financial support and its success in private and other fundraising It provides a compelling look at the complexity permeating today's research universities And yes it describes the firing of football coach John Cooper and the hiring of Jim Tressel

Evaluation of NSF's Program of Grants for Vertical Integration of Research and Education in the Mathematical Sciences (VIGRE) National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee to Evaluate the NSF's Vertically Integrated Grants for Research and Education (VIGRE) Program, 2010-01-22 In 1998 the National Science Foundation NSF launched a program of Grants for Vertical Integration of Research and Education in the Mathematical Sciences VIGRE These grants were designed for institutions with PhD granting departments in the mathematical sciences for the purpose of developing high quality education programs at all levels that are vertically integrated with the research activities of these departments To date more than 50 departments at 40 institutions have received VIGRE awards As requested by NSF the present volume reviews the goals of the VIGRE program and evaluates how well the program is designed to address those goals The book considers past and current practices for assessing the VIGRE program draws tentative conclusions about the program's achievements based on the data collected to date and evaluates NSF's plans for future data driven assessments In addition critical policy and programmatic changes for the program are identified with recommendations for how to address these changes

Smart Leadership for Higher Education in Difficult Times David W. Breneman, Paul J. Yakoboski, 2011-01-01 In an era of sound bites *Smart Leadership for Higher Education in Difficult Times* provides an outstanding analysis of the context in which today's colleges and universities operate The essays are thought provoking insightful and valuable for preparing our institutions for an uncertain future Through case studies and personal experience contributors challenge readers to reflect on our own institutions and re imagine higher education Graham B Spanier The Pennsylvania State University US *Smart Leadership for Higher Education in Difficult Times* makes the case that bridging the time from recession to recovery with typical belt tightening tactics without a strategy for fundamental change in the higher education business model is a formula for failure Globalization changing demographics evolving technology and jobs of the future are only beginning to impact the business of higher education These trends combined with the lingering effects of constrained revenue are the building blocks of a new business environment Reading this book will jump start your thinking about how innovation reorganization prioritization and strategic investing are necessary for institutional success John Walda National Association of College and University Business Officers US In response to falling state support limited returns from endowments and increasing costs colleges and universities have turned to examinations of the mission of higher education and new ways in which its missions can be achieved Two of the many provocative insights described in this series of papers concern the permanent nature of change in the economic demographic and competitive environment and the need for more creativity and innovation Risa Palm Georgia State University US *Smart Leadership for Higher Education in Difficult Times* offers positive ideas and encouragement from some of the leading thinkers and doers in higher education about how to lead proactively in response to the sobering challenges now facing colleges and universities economic stagnation the completion imperative rapid

demographic changes global competition the stunning pace of technological change and the tensions among affordability and the stubborn growth in college unit costs William Zumeta University of Washington and Association for the Study of Higher Education US As the US economy emerges from the severest recession in a generation large questions regarding its long term ramifications for higher education remain unanswered In fact the harshest effects of the economic downturn are likely ahead as campus leadership focuses on enrollment affordability and fundraising This volume of essays examines the challenges and opportunities for advancing higher education s core missions of education research and service in a resource constrained environment Many parties will wish to return to the old normal but fulfilling the mission of higher education will require implementing change in the face of opposition gaining support from key stakeholders and maintaining morale in the process The new normal entails innovating to meet the needs for higher education among a growing population of potential students from disadvantaged socioeconomic backgrounds many of whom are ill prepared for a college education and unaware of how to access it and a population of mid career students seeking to retool or reinvent themselves for the labor market The economic success of both individuals and the US economy are directly dependent upon increasing the share of the population receiving a higher education Chapter authors include college and university presidents and chancellors and other senior administrators and thought leaders from the higher education community They provide new and actionable information to enhance decision making and inform strategic planning as well as a contemporary examination of the business of higher education and areas of potential new research

Simulator-based Human Factors Studies Across 25 Years Ann Britt Skjerve,Andreas Bye,2010-12-07 The Halden Man Machine Laboratory HAMMLAB has been at the heart of human factors research at the OECD Halden Reactor Project HRP The HRP is sponsored by a group of national organizations representing nuclear power plant regulators utilities and research institutions The HRP is hosted by the Institute for Energy Technology IFE in Halden Norway HAMMLAB comprises three full scale nuclear power plant control room research simulators The simulator studies performed in HAMMLAB have traditionally been experimental in nature In a simulator it is possible to study events as they unfold in real time in a highly realistic operational environment under partially controlled conditions This means that a wide range of human factors issues which would be impossible or highly impracticable to study in real life settings can thus be addressed in HAMMLAB

Simulator based Human Factors Studies Across 25 Years celebrates the twenty fifth anniversary of HAMMLAB by reviewing the human factors studies performed in HAMMLAB across this time span A range of human factors issues have been addressed including human system interfaces alarm systems computerized procedures human automation interaction staffing teamwork and human reliability The aim of HAMMLAB studies has always been the same to generate knowledge for solving

current and future challenges in nuclear power plant operation to contribute to safety The outcomes of HAMMLAB studies have been used to support design and assessment of nuclear power plant control rooms **What Makes Racial Diversity**

Work in Higher Education Frank W. Hale, 2023-07-03 A unique reference describing successful diversity initiatives in higher education Higher education like the nation is facing major demographic changes Our colleges and universities recognize they not only have to be more inclusive but that they have to provide an environment that will effectively retain and develop the growing population of ethnically and racially diverse students How ready are they and what should they be doing Frank W Hale Jr known as the Dean of Diversity for his pioneering efforts in establishing Ohio State as one of the institutions graduating the most Black Ph D s has gathered twenty two leading scholars and administrators from around the country who describe the successful diversity programs they have developed Recognizing the importance of diversity as a means of embracing the experiences perspectives and expertise of other cultures this book shares what has been most effective in helping institutions to create an atmosphere and a campus culture that not only admits students faculty and staff of color but accepts and welcomes their presence and participation This is a landmark reference for every institution concerned with inclusivity and diversity The successes it presents offers academic leaders much they can learn from and ideas and procedures they can adapt as they discuss and develop their own campus policies and initiatives Contributors Samuel Betances Donald Brown Carlos E Cort s Myra Gordon Linda S Greene Frank W Hale Jr Margaret N Harrigan William B Harvey Freeman A Hrabowski III Lee Jones William Brit Kirwan Paul Kivel Antoinette Miranda JoAnn Moody Leslie N Pollard Neil L Rudenstine William E Sedlacek Mac A Stewart M Rick Turner Clarence G Williams Raymond A Winbush *The Kirwan Years* Christopher L Perry, 2021-01-29 Starting under President Edward Jennings and continuing under Gordon Gee The Ohio State University began a long term drive to match the school s ranking in football with a commensurate reputation for academic excellence Initiatives to admit better prepared students attract and retain world class faculty and build highly rated programs were promising but the university needed a broad strategy to coordinate these and other initiatives into a focused approach Enter President William Brit Kirwan who understood this need perfectly and whose major legacy became widely known as the Academic Plan This document became and remains the centerpiece of Ohio State s agenda with budget and other priorities emanating from its six strategies and 14 initiatives Continuing the Ohio State tradition of chronicling the university s history through the work of its past presidents The Kirwan Years recounts the Academic Plan s creation acceptance and initial implementation along with many major university accomplishments from mid 1998 through mid 2002 It also details the university s ongoing uphill struggle to maximize state financial support and its success in private and other fundraising It provides a compelling look at the complexity permeating today s research universities And yes it describes the firing of football coach John Cooper and the hiring of Jim Tressel **The European Archaeologist: 1 - 21a** Henry Cleere, Karen Waugh, Ross Samson, 2014-09-11 This volume gathers together the first 10 years of The European Archaeologist

Human Factors Models for Aviation Accident Analysis and Prevention Thomas G.C. Griffin,Mark S. Young,Neville A. Stanton,2017-03-02 The investigation and modelling of aviation accident causation is dominated by linear models Aviation is however a complex system and as such suffers from being artificially manipulated into non complex models and methods This book addresses this issue by developing a new approach to investigating aviation accident causation through information networks These networks centralise communication and the flow of information as key indicators of a system s health and risk This holistic approach focuses on the system environment the activity that takes place within it the strategies used to conduct this activity the way in which the constituent parts of the system both human and non human interact and the behaviour required Each stage of this book identifies and expands upon the potential of the information network approach maintaining firm focus on

the overall health of a system The book s new model offers many potential developments and some key areas are studied in this research Through the centralisation of barriers and information nodes the method can be applied to almost any situation The application of Bayesian mathematics to historical data populations provides scope for studying error migration and barrier manipulation The book also provides application of these predictions to a flight simulator study for the purposes of validation Beyond this it also discusses the applicability of the approach to industry Through working with a legacy airline the methods discussed are used as the basis for a new and prospective safety management system

The Human Factors of Fratricide Laura A. Rafferty, Neville A. Stanton, 2017-11-01 Fratricide has been defined as firing on your own forces when mistaking them for enemy forces which results in injury or death Rates of fratricide incidence have been steadily increasing and the complexity of the contemporary operating environment may lead to a continuation of this trend Although the majority of research into fratricide has focused on the development of technological decision aids recent explorations highlight the need to emphasise the social aspects within a socio technical framework This book presents and validates via the use of case studies a model of teamwork and decision making factors that are associated with incidents of fratricide In summary it offers a review and evaluation of contemporary theoretical perspectives on teamwork and fratricide as well as a range of accident analysis approaches A novel theory of fratricide is then presented followed by a new methodology for assessing fratricide Naturalistic case studies of teams are undertaken in the military domain These studies illustrate the approach and offer early validation evidence In closing the book presents a series of principles designed to reduce the likelihood of fratricide in the future
