Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later. Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753-1837 has persevered through the centuries rather than waning around the time of his death. Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today, concluding with the recent return to pure revivalism. Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence; this is the first in depth study of his impact over the course of two centuries. Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era, reaching throughout the British Isles and beyond to North America and even colonial Australia. Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture.

The

Environmental Imagination Dean Hawkes, 2008 This volume presents a chronologically ordered and detailed account of the developing relationship between technics and poetics in environmental design in architecture through a consideration of the work of major names in the field

Art, Agency and Living Presence Caroline van Eck, 2015-03-10 Throughout history and all over the world viewers have treated works of art as if they are living beings speaking to them falling in love with them kissing or beating them Although over the past 20 years the catalogue of individual cases of such behavior towards art has increased immensely there are few attempts at formulating a theoretical account of them or writing the history of how such responses were considered defined or understood That is what this book sets out to do to reconstruct some crucial chapters in the history of thought about such reflections in Western Europe and to offer some building blocks towards a theoretical account of such responses drawing on the work of Aby Warburg and Alfred Gell

Studies in the History of Services and Construction James Campbell, Amy Boyington, Yiting Pan, Nina Baker, Michael Heaton, Michael Tutton, David Yeomans, Henrik Schoenefeldt, Michael Driver, 2018 Building services are often overlooked in the history of architecture and engineering This volume presents 41 papers presented at the Fifth Annual Conference of the Construction History Society held at Queens College Cambridge from 6-8 April 2018 which cover a wide variety of topics on aspects of construction history and building services

The Idea of the Cottage in English Architecture, 1760 - 1860 Daniel Maudlin, 2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture

Architecture and Narrative Sophia Psarra, 2009-01-06 Conceptual ordering spatial and social narrative are fundamental to the ways in which buildings are shaped used and perceived This intriguing book explores the ways in which these three dimensions interact in the design and life of buildings

Shadow-Makers Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history Shadow Makers tells for the first time the history of shadows in architecture It weaves together a rich narrative combining close readings of significant

buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built

The Emergence of the Professional Watercolourist Greg Smith, 2018-01-12 This title was first published in 2002 Drawing on extensive primary research Greg Smith describes the shifting cultural identities of the English watercolour and the English watercolourist at the end of the eighteenth and the beginning of the nineteenth century His convincing narrative of the conflicts and alliances that marked the history of the medium and its practitioners during this period includes careful detail about the broader artistic context within which watercolours were produced acquired and discussed Smith calls into question many of the received assumptions about the history of watercolour painting His account exposes the unsatisfactory nature of the traditional narrative of watercolour painting's development into a high art form which has tended to offer a celebratory focus on the innovations and genius of individual practitioners such as Turner and Girtin rather than detailing the anxieties and aspirations that characterized the ambivalent status of the watercolourist

The Emergence of the Professional Watercolourist is published with the assistance of the Paul Mellon Foundation

Glorious Visions Helene Furján, 2011-05-05 Focusing on the house and museum and its considerable collections of architectural fragments models drawings folios and publications this book is about thirteen Lincoln's Inn Fields in London England built in the early 1800s by the renowned eighteenth century architect Sir John Soane The book maps the influences references connections extensions and productions at play in Soane's house museum The house still a public museum was highly original in its period and it continues to influence and impress architects and historians alike Today's visitor is confronted by a dense complex series of spaces a strange accumulation of rooms objects and effects This book examines the ways in which Soane enlisted light shadow color fiction and narrative vistas spatial complexity the fragment and the mirror to produce a spectacular space

Architecture Re-assembled Trevor Garnham, 2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer

von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making

The challenge of the sublime Hélène Ibata, 2018-02-05 This book examines the links between the unprecedented visual inventiveness of the Romantic period in Britain and eighteenth century theories of the sublime Edmund Burke's Philosophical Enquiry into the Origin of our Ideas of the Sublime and Beautiful 1757 in particular is shown to have directly or indirectly challenged visual artists to explore not just new themes but also new compositional strategies and visual media such as panoramas and book illustrations by arguing that the sublime was beyond the reach of painting More significantly it began to call into question mimetic representational models causing artists to reflect about the presentation of the unrepresentable and drawing attention to the process of artistic production itself rather than the finished artwork

Ugliness and Judgment Timothy Hyde, 2023-01-31 A novel interpretation of architecture ugliness and the social consequences of aesthetic judgment When buildings are deemed ugly what are the consequences In Ugliness and Judgment Timothy Hyde considers the role of aesthetic judgment and its concern for ugliness in architectural debates and their resulting social effects across three centuries of British architectural history From eighteenth century ideas about Stonehenge to Prince Charles's opinions about the National Gallery Hyde uncovers a new story of aesthetic judgment where arguments about architectural ugliness do not pertain solely to buildings or assessments of style but intrude into other spheres of civil society Hyde explores how accidental and willful conditions of ugliness including the gothic revival Houses of Parliament the brutalist concrete of the South Bank and the historicist novelty of Number One Poultry have been debated in parliamentary committees courtrooms and public inquiries He recounts how architects such as Christopher Wren John Soane James Stirling and Ludwig Mies van der Rohe have been summoned by tribunals of aesthetic judgment With his novel scrutiny of lawsuits for libel changing paradigms of nuisance law and conventions of monarchical privilege he shows how aesthetic judgments have become entangled in wider assessments of art science religion political economy and the state Moving beyond superficialities of taste in order to see how architectural improprieties enable architecture to participate in social transformations Ugliness and Judgment sheds new light on the role of aesthetic measurement in our world

Gothic Antiquity Dale Townshend, 2019-09-26 Gothic Antiquity History Romance and the Architectural Imagination 1760-1840 provides the first sustained scholarly account of the relationship between Gothic architecture and Gothic literature fiction poetry drama in the late eighteenth and early nineteenth centuries Although the relationship between literature and architecture is a topic that has long preoccupied scholars of the literary Gothic there remains to date no monograph length study of the intriguing and complex interactions between these two aesthetic forms Equally Gothic literature has received

only the most cursory of treatments in art historical accounts of the early Gothic Revival in architecture interiors and design In addressing this gap in contemporary scholarship Gothic Antiquity seeks to situate Gothic writing in relation to the Gothic architectural theories aesthetics and practices with which it was contemporary providing closely historicized readings of a wide selection of canonical and lesser known texts and writers Correspondingly it shows how these architectural debates responded to and were to a certain extent shaped by what we have since come to identify as the literary Gothic mode In both its survivalist and revivalist forms the architecture of the Middle Ages in the long eighteenth century was always much more than a matter of style Incarnating for better or for worse the memory of a vanished Gothic age in the modern enlightened present Gothic architecture be it ruined or complete prompted imaginative reconstructions of the nation s past a notable visionary turn as the antiquary John Pinkerton put it in 1788 in which Gothic writers architects and antiquaries enthusiastically participated The volume establishes a series of dialogues between Gothic literature architectural history and the antiquarian interest in the material remains of the Gothic past and argues that these discrete yet intimately related approaches to vernacular antiquity are most fruitfully read in relation to one another
