wonders of an ordinary day from dawn to nighttime Long before we had the tools of knowledge to explain what we observed in the skies overhead we built mythologies and folklore around these occurrences immortalized them in poetry and art created special places for them in our collective imagination and even our language In Apollo's Fire Sims explores the celestial events that form our days fusing lively explanations of these phenomena with a richly layered history of what they meant to us before we knew how they worked He explains the colors of sunrise the characteristics of shadow the mysteries of twilight Characters in this vital drama include Galileo watching sunrise on the moon Eratosthenes measuring the Earth with a noontime shadow and Edgar Allan Poe figuring out why the night sky is dark instead of glowing with the light of a million suns Our story ranges from the movie High Noon to Darwin's plant experiments from The Time Machine to the afternoon rise in air pollution In the witty and elegant style that has earned him the designation science raconteur Sims weaves a dazzling array of strands into a single tapestry of daily experience and makes the oldest story on Earth new again **Cosmos and**
