Professional Practice in Engineering and Computing Riadh Habash,2019-03-18

This book has been developed with an intellectual framework to focus on the challenges and specific qualities applicable to graduates on the threshold of their careers. Young professionals have to establish their competence in complying with multifaceted sets of ethical, environmental, social, and technological parameters. This competence has a vital impact on the curricula of higher education programs because professional bodies today rely on accredited degrees as the main route for membership. Consequently, this four-part book makes a suitable resource for a two-semester undergraduate course in professional practice and career development in universities and colleges. With its comprehensive coverage of a large variety of topics, each part of the book can be used as a reference for other related courses where sustainability, leadership, systems thinking, and professional practice are evident and increasingly visible.

**Features:** Identifies the values that are unique to the engineering and computing professions and promotes a general understanding of what it means to be a member of a profession. Explains how ethical and legal considerations play a role in engineering practice. Discusses the importance of professional communication and reflective practice to a range of audiences. Presents the practices of leadership, innovation, entrepreneurship, safety, and sustainability in engineering design. Analyzes and discusses the contemporary practices of project management, artificial intelligence, and professional career development.

*The Practical Real-Time Enterprise* Bernd Kuglin, 2005-02-21

The basic idea of the real-time enterprise is to become quicker. A business which wants to become a real-time enterprise has to acquire three main abilities. Internal and external data is integrated quickly and in real time in a well-organized company data pool. Analyses of information in the company data pool can be obtained in real time across function boundaries and at the touch of a button. The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time. The issue of communications or real-time communications plays a special role here. Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time. In other words, when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted. The necessity of acquiring these three abilities has implications for the process-related technical and organizational aspects of a business that are dealt with in detail in this book.

*The Ventilator Project* Srikant Sastri, Amitabha Bandyopadhyay, 2021-03-07

A raging pandemic, a dearth of life-saving equipment, and ninety days to manufacture a world-class ventilator. On 24 March 2020, a nationwide lockdown was imposed in India in the face of a formidable adversary, the Covid-19 pandemic. With the number of cases increasing exponentially, hospitals were faced with a dangerous shortage of life-saving equipment and personnel. In response to the imminent crisis, Amitabha Bandyopadhyay and Srikant Sastri formed the IIT Kanpur Ventilator Consortium as a task force to assist a young startup, Nocca Robotics, in building affordable, high-quality ventilators for India's cash-strapped hospitals. Under the mentorship of reputed industry leaders, the task force and the Nocca team worked tirelessly against unprecedented odds, trammelled by a ban on imports and telecommuting through Zoom and Whatsapp in the face of stringent lockdown.

restrictions to manufacture the Noccarc V310 in record time This is the incredible story of its conception creation and success in the words of the task force co leaders themselves Inspiring and riveting The Ventilator Project also offers an unmatched blueprint for business in the post Covid era through first hand lessons gleaned during the task force s phenomenal ninety day run It proves that India with its deep recesses of talent and ingenuity has the potential to be a world leader in both business and social impact      Computerworld ,1999-08-09 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network      *International Conference on Advanced Intelligent Systems for Sustainable Development* Janusz Kacprzyk,Mostafa Ezziyyani,Valentina Emilia Balas,2023-06-09 This book describes the potential contributions of emerging technologies in different fields as well as the opportunities and challenges related to the integration of these technologies in the socio economic sector In this book many latest technologies are addressed particularly in the fields of computer science and engineering The expected scientific papers covered state of the art technologies theoretical concepts standards product implementation ongoing research projects and innovative applications of Sustainable Development This new technology highlights the guiding principle of innovation for harnessing frontier technologies and taking full profit from the current technological revolution to reduce gaps that hold back truly inclusive and sustainable development The fundamental and specific topics are Big Data Analytics Wireless sensors IoT Geospatial technology Engineering and Mechanization Modeling Tools Risk analytics and preventive systems      Leadership Intelligence Andrew Kakabadse,Ali Qassim Jawad,2019-02-21 In today s complex corporate world contemporary governance calls for a varied and versatile cognitive approach to problems demanding times require nimble minds and rounded perspectives The authors research has identified five key leadership intelligences the 5Qs which high performing leaders need to simultaneously employ in order to achieve transformational change These are IQ cognitive intelligence EQ emotional intelligence PQ political intelligence RQ resilience quotient and MQ moral intelligence The 5Qs come together to inform every aspect of leadership and each of them can in different ways be nurtured and practised through learning and development Andrew Kakabadse and Ali Qassim Jawad have tested the 5Qs on leaders worldwide applying them at all levels of leadership in order to explore the combinations of intelligences needed to become a well rounded effective leader in any situation
