$y - k = m(x - h)$ where m is the slope of the line and h, k is a point on the line any point works to write an equation in point slope form given a graph of that equation first determine the slope by picking two points then pick any point on the line and write it as an ordered pair h, k

point slope form review linear equations khan academy - Feb 16 2023

point slope is a specific form of linear equations in two variables $y - b = m(x - a)$ when an equation is written in this form m gives the slope of the line and a, b is a point the line passes through this form is derived from the slope formula want to learn more about point slope form check out this video
