emerged as a director and producer of his own animation while remaining inside Disney's studio. Through Kimball, the studio developed a series of nonfiction animation programs in the 1950s that members of Congress pointed to as paving the way for NASA. The studio also allowed Kimball's work to abandon some ties to conventional animation, looking instead to high art and graphic design as a means of creating new animated forms which resulted in films that received multiple Academy Award nominations and two awards. Throughout his life, Kimball was a maverick animator, an artist who helped define the field of American animation and a visionary who sought to expand the influence of animated films. **Primary Education**, 1903

*Popular Educator*, 1903 **Ski Films** Bryan Senn, 2022-05-02 Skiing in movies like the sport itself grew more prevalent beginning in the 1930s when it was a pastime of the elite with depictions reflecting changes in technique, fashion, and social climate. World War II saw skiing featured in a dozen films dealing with that conflict. Fueled by postwar prosperity, the sport exploded in the 1950s; filmmakers followed suit using scenes on snow-covered slopes for panoramic beauty and the thrill of the chase. Through the free-spirited 1960s and 1970s, the downhill lifestyle shushed into everything from spy thrillers to beach party romps. The extreme sports era of the 1980s and 1990s brought snowboarding to the big screen. This first-ever critical history of skiing in film chronicles a century of alpine cinema with production information and stories and quotes from directors, actors, and stuntmen. **Investigation of Attempts to Subvert the United States Armed Services: November 9, 10, 16, and 18, 1971, and May 2 and 3, 1972 (including index)** United States.
