France's Long Reconstruction Herrick Chapman, 2018-01-08 Postwar recovery required a transformation of France but what form it should take remained a question Herrick Chapman charts the course of France s reconstruction from 1944 to 1962 offering insights into the ways the expansion of state power produced fierce controversies at home and unintended consequences abroad in France s crumbling empire

Nationalism, Labour and Ethnicity 1870-1939 Angel Smith, Stefan Berger, 1999 This text looks at the inter relationships between labour nationalist movements and ethnicity during the Age of Imperialism Two of the most debated contemporary issues focus on the decline of labour particularly socialist ideologies and the rise of nationalism It is sometimes assumed that the demise of one led to the triumph of the other It is also thought that labour as an internationalist movement underestimated and misunderstood the power of nationalism This text links these historical phenomena and sets the debate in more accurate historical context

Who Ran the Cities? Robert Beachy, Ralf Roth, 2007 This volume furthers our understanding of who actually ran cities in the eighteenth nineteenth and twentieth centuries and develops greater understanding of the relationship between elite and power in cities To develop answers two fields of research which have often remained separate have been brought together the economic social and cultural history of elite and the political history of power resources and decision making By looking at specific case studies through the lens of these issues the volume will encourage the reader to challenge common perceptions of a monolithic elite and to replace them with a more sophisticated view of urban power as an interplay between various economic social political and cultural elite groups

The Word on the Streets Brooks E. Hefner, 2017-10-27 From the hard-boiled detective stories of Dashiell Hammett to the novels of Claude McKay *The Word on the Streets* examines a group of writers whose experimentation with the vernacular argues for a rethinking of American modernism one that cuts across traditional boundaries of class race and ethnicity The dawn of the modernist era witnessed a transformation of popular writing that demonstrated an experimental practice rooted in the language of the streets Emerging alongside more recognized strands of literary modernism the vernacular modernism these writers exhibited lays bare the aesthetic experiments inherent in American working class and ethnic language forging an alternative pathway for American modernist practice Brooks Hefner shows how writers across a variety of popular genres from Gertrude Stein and William Faulkner to humorist Anita Loos and ethnic memoirist Anzia Yezierska employed street slang to mount their own critique of genteel realism and its classist emphasis on dialect hierarchies the result of which was a form of American experimental writing that resonated powerfully across the American cultural landscape of the 1910s and 1920s

Ideologies and Political Theory Michael Freeden, 1996-10-25 Ideologies play a crucial role in the way we understand and shape the political world But no one has yet satisfactorily explained the nature of ideologies themselves In this important study Michael Freeden offers a ground-breaking approach to the subject Drawing on the political experience of Britain France Germany and the USA over the past two centuries the author provides an in-depth examination of the key political ideologies liberalism conservatism socialism feminism and green political thought He goes on to outline a powerful and sophisticated new theory of ideologies and argues that by paying special attention to the complexity conceptual inter-relationship and historical and contemporary context of ideologies we can both better understand them and reinvigorate the study of political theory From reviews of the hardback What is on offer here is both a highly original and profoundly stimulating analysis of ideological thinking Freeden's book will undoubtedly shape and redefine the field of ideological studies as it presently stands initiating fruitful lines of research for many years to come There is much to admire in this book *History of European Ideas* The approach is immensely illuminating The outstanding merit of Freeden's work is that he has shown what political philosophy presently lacks and has

done so by demonstrating that ideologies should not be dismissed as merely the poor cousins of philosophies Both political theory and political philosophy have a great deal to learn from this book **Radical Philosophy** **Sociology and Music Education** Ruth Wright, 2017-07-05 Sociology and Music Education addresses a pressing need to provide a sociological foundation for understanding music education The music education community academic and professional has become increasingly aware of the need to locate the issues facing music educators within a broader sociological context This is required both as a means to deeper understanding of the issues themselves and as a means to raising professional consciousness of the macro issues of power and politics by which education is often constrained The book outlines some introductory concepts in sociology and music education and then draws together seminal theoretical insights with examples from practice with innovative applications of sociological theory to the field of music education The editor has taken great care to select an international community of experienced researchers and practitioners as contributors who reflect current trends in the sociology of music education in Europe and the UK The book concludes with an Afterword by Christopher Small

Research and development projects United States. Employment and Training Administration, 1976 **The Modern World-System IV** Immanuel Wallerstein, 2011-06-10 Immanuel Wallerstein's highly influential multi volume opus The Modern World System is one of this century's greatest works of social science An innovative panoramic reinterpretation of global history it traces the emergence and development of the modern world from the sixteenth to the twentieth century This new volume encompasses the nineteenth century from the revolutionary era of 1789 to the First World War In this crucial period three great ideologies conservatism liberalism and radicalism emerged in response to the worldwide cultural transformation that came about when the French Revolution legitimized the sovereignty of the people Wallerstein tells how capitalists and Great Britain brought relative order to the world and how liberalism triumphed as the dominant ideology

Humanities Index , 1997 **Workers Or Citizens** Matthew Benjamin Karush, 2002 In a provocative study based on extensive original research Karush reinterprets Argentina's first experiment with electoral democracy By the early twentieth century massive immigration and rapid economic growth had generated severe class conflict In 1912 the nation's elite attempted to defuse this conflict by enacting electoral reforms designed to incorporate the working class children of immigrants into the body politic The book reconstructs the ensuing struggles over national identity and political representation as they played out in Rosario then the country's second largest city Most of Rosario's politicians saw democracy not as a means to extend representation to subordinate social groups but as a nation building tool aimed at transforming class conscious workers into classless citizens Intent on preserving their own hegemony these politicians tried unsuccessfully to banish appeals to class interests from the political marketplace Karush draws upon a wide range of sources including the mainstream and anarchist press political speeches popular literature and tango lyrics to show that in the voting booth and on the picket line workers selectively appropriated and manipulated the various identities made available by

politicians and popular culture In charting the course of Rosario s political history this book also offers a new perspective on both the collapse of Argentine democracy in 1930 and the rise of Peronism in 1945
