*Elevators--autonomous Transporters for Deep Sea Benthic Sample Recovery* M. F. Bowen, 2000      Marine Mammal Protection Act and Endangered Species Act Implementation Program 2000 Anita L. Lopez, Robyn P. Angliss, 2001      **Marine Mammals** Peter G.H. Evans, Juan Antonio Raga, 2012-12-06 Interest in marine mammals has increased dramatically in the last few decades as evidenced by the number of books scientific papers and conferences devoted to these animals Nowadays a conference on marine mammals can attract between one and two thousand scientists from around the world This upsurge of interest has resulted in a body of knowledge which in many cases has identified major conservation problems facing particular species At the same time this knowledge and the associated activities of environmental organisations have served to introduce marine mammals to a receptive public to the extent that they are now perceived by many as the living icons of biodiversity conservation Much of the impetus for the current interest in marine mammal conservation comes from Save the Whale campaigns started in the 1960s by environmental groups around the world in response to declining whale populations after over exploitation by humans This public pressure led to an international moratorium on whaling recommended in 1972 by the United Nations Conference on the Human Environment in Stockholm Sweden and eventually adopted by the International Whaling Commission ten years later This moratorium largely holds sway to this day and further protective measures have included the delimitation of extensive areas of the Indian Ocean 1979 and Southern Ocean 1994 as whale sanctuaries      **Marine Mammal Protection Act and Endangered Species Act Implementation Program 2001** Anita L. Lopez, S. E. Moore, 2002      **Report of the Commission - International Whaling Commission** International Whaling Commission, 1996      Numbers of Calling Whales in the North Pacific William A. Watkins, Mary Ann Daher, Joseph E. George, 2001 Since November 1995 the U S Navy's Sound Surveillance System SOSUS and other hydrophone arrays were used to regularly sample the occurrence of whale sounds in four regions bordering the continental margins across the North Pacific The numbers of whales heard calling varied with season and location for each species blue whales *Balaenoptera musculus* fin whales *Balaenoptera physalus* and humpback whales *Megaptera novaeangliae* For blue whales calling during the fall season averaged 5 whales per event winter averaged 1.5 whales per event spring averaged 1 whale and summer averaged 1.5 whales For fin whales the numbers of whales heard F calls from individuals during winter averaged 3 whales per event spring and fall calling averaged 1.5 whales and summer averaged 1 whale The J calling events regardless of season were judged to be from at least 6 fin whales Humpback singing typically was from 3 whales These numbers demonstrated seasonal variations in calling whales for each region      *What the Ear Hears (And Doesn't)* Richard Mainwaring, 2022-12-27 You'll never listen to the world the same way again A truly ear opening experience Chris Ferrie award winning physicist and author of *Where Did the Universe Come From And Other Cosmic Questions* For readers of Neil deGrasse Tyson and Bill O Neill *What the Ear Hears and Doesn't* is a fascinating science book for adults that explores the physics principle of frequency

and the sometimes weird role it plays in our everyday lives What do the world's loneliest whale a black hole and twenty three people doing Tae Bo all have in common In 2011 a skyscraper in South Korea began to shake uncontrollably without warning and was immediately evacuated Was it an earthquake An attack No one seemed quite sure The actual cause emerged later and is utterly fascinating Twenty three middle aged folks were having a Tae Bo fitness class in the office gym on the twelfth floor Their beats had inadvertently matched the building's natural frequency and this coincidence harnessing a basic principle of physics caused the building to shake at an alarming rate for ten minutes Frequency is all around us but little understood Musician composer TV presenter and educator Richard Mainwaring uses the concept of the Infinite Piano to reveal the extraordinary world of frequency in a multitude of arenas from medicine to religion to the environment to the paranormal through the universality of music and a range of memorable human and animal stories laced with dry humor Whether you're science curious musically inclined or just want to know what a Szechuan pepper has to do with physics What the Ear Hears and Doesn't is an immensely enjoyable read filled with did you know trivia you'll love to share with friends
